The Andromeda Galaxy and the Rise of Modern Astronomy David Schultz, 2012-04-23 The Andromeda Galaxy Messier's M31 has an almost romantic appeal It is the most distant object and the only extragalactic object that is visible to the unaided human eye Now known to be about 21 2 million light years away it appears in the sky to be several times the width of the full Moon under good seeing conditions The Andromeda Galaxy and the Rise of Modern Astronomy examines the astronomical studies of Andromeda and its importance to our developing knowledge of the universe The book discusses how M31 was described both by the Ancients but more importantly by astronomers from the nineteenth century to the present While at the start of the twentieth century the universe was thought of as a finite cosmos dominated by the Milky Way the study of Andromeda galaxy shattered that image leading ultimately to the conception of an infinite universe of countless galaxies and vast distances Even today M31 is a major focal point for new astronomical discoveries and it also remains one of the most popular and rewarding celestial objects for amateur astronomers to observe and study This book reveals the little known history of M31 and the scientists who study it For all who are interested in astronomy the skies and perhaps even the origins of the universe The Andromeda Galaxy and the Rise of Modern Astronomy provides a first of its kind accessible informative and highly readable account of how the study and observation of this celestial object has driven the development of astronomy from ancient times to the present

new light Take a tour of the universe from our local solar system to the far reaches of deepest space Astronomy Made Simple offers a complete introduction to this science from its birth in ancient times to the different types of super powerful telescopes scientists use today It also includes detailed instructions on how to map the stars and understand the coordinate system as well as fun sidebars ideas for projects for further learning and resources for the student or the amateur astronomer *Popular Astronomy* ,1919 **The Rise of Radio Astronomy in the Netherlands** Astrid Elbers,2016-11-23 Radio astronomy was born during the Second World War but as this book explains the history of early Dutch radio astronomy is in several respects rather anomalous in comparison to the development of radio astronomy in other countries The author describes how these very differences led the Netherlands to become one of the world leaders in radio astronomy Dominated by the Leiden astronomer Jan Hendrik Oort the field embarked on an era of success and to this day the country still holds a leading position To tell this story the book focuses on three key events in the period 1940 1970 namely the construction of the radio telescopes in Kootwijk 1948 in Dwingeloo 1956 and in Westerbork 1970 These projects show that Dutch radio astronomers must not be seen as merely scientists but also as strategic lobbyists networkers and organizers in a specific political and economic context It was in the process of planning designing and constructing these instruments that the interests of the astronomers industrial partners politicians and lobby groups merged to create today s existing research centers for radio astronomy *Highlights of Astronomy* Derek McNally,2012-12-06 It is the customary practice to report the major events of a General Assembly the Invited Discourses Joint Discussions and Joint Commission Meetings in Highlights of Astronomy Vol 8 reports the highlights of the XXth General Assembly of the International Astronomical Union 1988 August 2 11 Baltimore USA The present volume contains the 3 Invited Discourses and papers presented at 7 Joint Discussion Meetings and 6 Joint Commission Meetings Two Joint Commission Meetings will be reported elsewhere JCM5 Spectroscopy of Individual Stars in Globular Clusters and the Early Chemical Evolution of our Galaxy in summary only here published by the Imprimerie de l Observatoire de Paris and JCM7 Star Clusters in the Magellanic Clouds see Transactions of the IAU Vol XXB report of Commission 37 I am most grateful to the authors of the invited discourses R M West and V I Moroz M Schmidt and M Rees for sending me the manuscripts so promptly I am also indebted to the Chairmen of the Joint Discussion and Joint Commission Meetings for their organisation of the meetings and for the assembly of their material for publication Unfortunately the deadline for receipt of manuscripts coincided with an extended postal strike in France which seriously hindered the preparation of the volume for publication *Astronomy and Astro-physics* ,1892 **The Astronomical Journal** ,1891
