The New Eu Public Procurement Directives:

The New EU Public Procurement Directives Ruth Nielsen, Steen Treumer, 2005 31 March 2004 the EU adopted two new public procurement directives one for the public sector 2004/18/EC and one for utilities 2004/17/EC. The new directives aim at simplification and modernisation of the previously existing directives including adaptation to electronic purchasing techniques. On 4-5 November 2004 the Copenhagen Business School organised a European research conference on the new directives. The conference focused on a number of topics which are of particular interest within the field of procurement law in EU these years including ECJ case law utilities electronic auctions transparency requirements competitive dialogue framework agreements use of social and environmental criteria Partnering and Public Private Partnerships and concessions. This book contains contributions based on presentations given by a number of the international and Danish speakers at the conference.

EU Public Procurement and Innovation Pedro Cerqueira Gomes, 2021-01-29 This insightful book provides readers with a practical and theoretical explanation of the ways in which the new tailor made Innovation Partnership Procedure can be used throughout all Member States in the European Union. With a focus on the Procurement Directive for the public sector Directive 2014/24/EU Pedro Cerqueira Gomes argues that innovation is a crucial policy of the EU that must be extended to public procurement implying interesting harmonisation challenges mostly regarding the use of the Innovation Partnership Procedure and the national administrative law traditions of the Member States.

EU Public Procurement Law Christopher Bovis, 2012 The Second Edition of EU Public Procurement Law provides a comprehensive view of the policies legislation and cases that define this area of law. Written from a pan European perspective it will be a useful guide for students and practitioners alike. As well as describing the public contracts utilities and remedies directives this work details the European cases that have shaped the law and the relationship between procurement law and other forms of regulation such as state aid. EU Public Procurement Law Ruth Nielsen Copenhagen Business School Denmark In this fully revised and updated edition Christopher Bovis provides a detailed critical concise and accessible overview of the public procurement legal framework and its interaction with policies within the European Union and the its Member States. Public procurement represents an essential part of the Single Market project launched by European Institutions in 2011. Its regulation will insert competition and transparency in the market and be a safeguard to the attainment of fundamental principles of the Treaties. This book demonstrates the impact of the relevant Directives on Member States through the development of the case law of the European Court of Justice and assesses the judicial review of

public contracts at national level It positions public procurement at the centre of the legal and policy debate surrounding the delivery of public services and the advancement of competitiveness and industrial policy in the EU The book highlights the pivotal role of public procurement for the Europe 2020 Growth Strategy Demonstrating the concepts and principles of public procurement this comprehensive book will have a strong appeal to academic researchers lawyers judges practitioners and policymakers at the European international and national levels as well as students of law policy and management

Research Handbook on EU Public Procurement Law Christopher Bovis, 2016-07-27 Public procurement law is a necessary component of the single market because it attempts to regulate the public markets of Member States and represents a key priority for the European Union This Research Handbook makes a major contribution to the understanding of the current EU public procurement regime its interface with the law of the internal market and the pivotal role that this will play in the delivery of the European 2020 Growth Strategy

Discretion in EU Public Procurement Law Sanja Bogojevic, Xavier Groussot, Jörgen Hettne, 2019-05-30 The EU public procurement regime has recently undergone an overhaul and now allows Member States and their contracting authorities to pursue strategic goals via public procurement including environmental and social objectives The extent to which such interests may be accommodated in the procurement process is ultimately determined by the broader legal context in which the EU public procurement regime exists which raises pressing questions regarding the scope and limits of Member States discretion This volume scrutinises these new legal acts particularly Directive 2014/24/EU focusing on discretion and engaging with questions central to the public procurement regime against the EU legal backdrop including internal market law and environment law as well as law beyond the EU

Reformation or Deformation of the EU Public Procurement Rules Grith Skovgaard Ølykke, Albert Sanchez-Graells, 2016-11-25 Using an innovative law and political science methodology this timely book carries out a critical assessment of the reform of the EU public procurement rules It provides a rich account of the policy directions and the spaces for national regulatory decisions in the transposition of the 2014 Public Procurement Package as well as areas of uncertainty and indications on how to interpret the rules in order to make them operational in practice Most EU law research focuses on the content of rules and the impact of case law on their interpretation and application It rarely discusses how the CJEU's case law influences the creation of new rules or the way EU law makers enact them issues which conversely are a staple for political scientists By blending both approaches this book finds that political science provides a useful framework to describe the law making process and shows that the influence of the CJEU was significant Though the specific case studies identify many reforms the ultimate assessment is that EU public procurement law was deformed Offering a clear contribution to the emerging scholarship on flexible EU law making this book's novel methodology will appeal to scholars and students of both law and political science Law and policy makers as well as legal practitioners will also find its practical approach compelling

Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2015-06-25 Public

procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted but not closely examined. This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law.

EU Public Procurement Law Christopher Bovis, 2008-01-01. This book will serve as an essential resource for anyone interested in the legal regime of public procurement. It offers a comprehensive and topical analysis of EU law and its interaction with national law and policies in an area of growing economic importance. Ruth Nielsen, Copenhagen Business School, Denmark. EU Public Procurement Law addresses one of the most important areas of European integration. With a magnitude approaching 1 trillion euros in supplies, works and services and representing almost 12 percent of the European Union's GDP, public procurement regulation represents a key objective of the vision of the European Union in becoming the most competitive economy in the world by 2010. In this book, Christopher Bovis offers a clear and lucid assessment of the new public procurement legal framework and its interplay with policy within the European Union and the member states. The new regime is based on three principles: simplification, modernization and flexibility, and the book considers the new directives which are intended to simplify and modernize a regulatory regime that aims to gradually establish a public market in the European Union. The book exposes the instrumental role of the European Court of Justice in shaping many of the newly introduced concepts in public procurement regulation. Finally, the author provides for the most comprehensive taxonomy and codification of case law on public procurement. This comprehensive overview of enforcement and compliance of public procurement at European and national levels will be of great interest to academic researchers and lawyers within the EU, USA, Canada and other continents. It will also appeal to postgraduate students in law, policy and management, judges at the European Court of Justice and national courts, and policy makers at European, international and national levels.
