The New Global Economy and the Developing Countries Gerald Karl Helleiner,1990 *The New Global Economy and the Developing Countries: Essays in International Economics and Development* Gerald K. Helleiner,1993 **The Dynamics of Asian Economic Development** Hitoshi Hirakawa,Ferdinand C. Maquito,2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world s attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China s Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China s BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China **Proceedings of International Conference on Emerging Technologies and Intelligent Systems** Mostafa Al-Emran,Mohammed A. Al-Sharafi,Mohammed N. Al-Kabi,Khaled Shaalan,2021-08-07 This book sheds light on the emerging research trends in intelligent systems and their applications It mainly focuses on three different themes including software engineering ICT in education and management information systems Each chapter contributes to the aforementioned themes by discussing the recent design developments and modifications of intelligent systems and their applications Revolutionizing World Trade Kati Suominen,2019-11-19 Almost 15 years ago in The World is Flat Thomas Friedman popularized the latest wave of globalization as a world of giant corporate supply chains that tripled world trade between 1990 and 2010 Major corporations such as Apple Dell and GE offshored manufacturing to low cost economies China became the world s factory mass producing and exporting computers and gadgets to Western shoppers This paradigm of globalization has dominated global trade policy making and guided hundreds of billions of dollars in business

investments and development spending for almost three decades But we are now on the cusp of a new era Revolutionizing World Trade argues that technologies such as ecommerce 3D printing 5G the Cloud blockchain and artificial intelligence are revolutionizing the economics of trade and global production empowering businesses of all sizes to make move and market products and services worldwide and with greater ease than ever before The twin forces of digitization and trade are changing the patterns players politics and possibilities of world trade and can reinvigorate global productivity growth However new policy challenges and old regulatory frameworks are stifling the promise of this most dynamic prosperous and inclusive wave of globalization yet This book uses new empirical evidence and policy experiences to examine the clash between emerging possibilities in world trade and outdated policies and institutions offering several policy recommendations for navigating these obstacles to catalyze growth and development around the world **World Development Report 2021**

World Bank,2021-07-02 The unprecedented growth of data and its ubiquity in our daily lives signal that the digital revolution is transforming the world But much of the value of data remains untapped waiting to be realized Data collected for one particular purpose has the potential to generate economic value in applications far beyond those originally anticipated However many barriers stand in the way of the beneficial reuse of data ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust The World Development Report 2021 Data for Better Lives will explore the tremendous potential of the changing data landscape to improve the lives of poor people but also to open backdoors that can harm individuals businesses and societies The first part of the report assesses how better use and reuse of data can enhance the design of public policies programs and service delivery as well as improve market efficiency and job creation through private sector growth The second part of the report focuses on issues of governance law and policy that can help realize data s potential benefits while safeguarding against harmful outcomes By examining these issues the report aims to show how data can be leveraged to benefit the lives of poor people **World Development Report 2016** World Bank

Group,2016-01-14 This Report aims to inspire and guide the researchers and practitioners who can help advance a new set of development approaches based on a fuller consideration of psychological and social influences p 2 ICIE 2014 Proceedings of the 2nd International Conference on Innovation and Entrepreneurship Academic Conferences and Publishing
