**The Rise of the French Novel** Martin Turnell, 1978 Martin Turnell s *The Rise of the French Novel* is a successor to his highly praised earlier books *The Novel in France* 1951 and *The Art of French Fiction* 1959 His aim now however is somewhat different as can be seen from the title It is well known that the reputations of many writers novelists especially diminish for a period following their deaths Although in the eighteenth century Marivaux Cr billon fils and Rousseau all enjoyed a great deal of popularity during their lifetimes it is only recently that they have been subject to truly searching studies Yet they remain little read in English speaking countries Turnell emphasizes that in spite of the hostility of French critics and the fact that the novel did not reach its supremacy even in France until the nineteenth century the beginning of its great rise was indeed with such writers as these Their strong influence led such nineteenth century novelists as Stendhal and Flaubert to all kinds of changes related to style the enormous increase in the range of subject matter and the marked development of language Flaubert is the most striking example It was pointed out some time ago by Eisenstein that *Madame Bovary* anticipates cinematic technique One of Turnell s most interesting chapters explores the connections between the novel and film in general and *Madame Bovary* in particular In our own time two of the most popular French novelists in both the United States and England are Alain Fournier and Radiguet They are given enthusiastic appreciations in Turnell s thoughtful book

### **Proceedings of the 9th International Symposium on Insect-Plant Relationships**

Erich Städler, Martine Rowell-Rahier, Robert Baur, 2012-12-06 The 9th International Symposium on Insect Plant Relationships SIP 9 was once more following the tradition established in 1958 a forum for investigators in both basic and applied entomology interested in the important and fascinating field of interactions between plants and insects We were pleased and honoured to organise this symposium which took place June 24 30 1995 in Gwatt on the shores of the Lake of Thun in Switzerland 168 participants from 26 countries from all over the world actively took part in the symposium by contributing 12 key note lectures and a total of 141 oral presentations and posters The favourable response and the lively interaction of the participants in all symposium activities is the clearest indication of the success of SIP 9 The organisers appreciated the enthusiasm and the willingness to collaborate shown by all participants The following volume contains written contributions 72 of only half of all presentations This is due to the fact that we decided to produce not only an account of the proceedings but also to publish all contributions as a special volume of the journal *Entomologia Experimentalis et Applicata* This procedure was last adopted in 1978 for SIP 4 organised by Reginald F Chapman and Elizabeth A Bernays and ensures a wide distribution of the papers within the scientific community and easy access through libraries Inevitably we had to employ the same review procedure as applicable for the manuscripts regularly submitted to *Entomologia*
