M. Gansinger, 2022-08-17 The Sufi tradition remains one of the most mysterious and least understood systems of self realization This book demystifies the practice of the sohbet an ad hoc discourse as the central instructional tool in the globally influential Naqshbandi Haqqani Order It approaches the practice using categories of improvised music to establish a framework for analyzation Its ritualized formal structure illustrated via selected talks of Shaykh Nazim Adil al Haqqani discloses the underlying and assumingly primary function to provoke prolonged states of raised awareness in listeners and condition their sympathetic nervous system In an extensive discussion based on several years of field research in Cyprus the book relates this intention to similar practices in other traditional knowledge systems by proposing psychophysical interpretations based on psychology biochemistry neuroscience or quantum physics It will appeal to scholars and students of Sufism Islamic studies and comparative religion as well as those interested in performance studies and improvised music interpersonal communication and education **Shadows of the Prophet** Douglas S. Nelson,2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental und

standings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult
