

The New England Mill Village, 1790–1860

Edited by Gary Klintworth, Roger Parks, and Theodore Z. Pann

The New England Mill Village 1790 1860

Kirk Shivell

The New England Mill Village 1790 1860:

The New England Mill Village, 1790-1860 Gary Kulik,Roger N. Parks,Theodore Z. Penn,1982 This book documents the growth of industrial technology in these little hamlets covering the social labor economic and technical aspects of this fascinating chapter in the development of American enterprise

The New England Mill Village, 1790-1860 Gary Kulik,Roger N. Parks,Theodore Z. Penn,1982 This book documents the growth of industrial technology in these little hamlets covering the social labor economic and technical aspects of this fascinating chapter in the development of American enterprise

Murder in a Mill Town Bruce Dorsey,2023-08-01 History as true crime Murder in a Mill Town tells a story of sex religion and violence delving into the nation s first trial of the century Illuminating how the young American nation confronted sexual violence abortion suicides mobs fake news conspiracy politics and sensational popular culture its plots and twists echo from the past into the present

The Steeples of Old New England Kirk Shivel,1998 The church steeple was one of the first art forms to be cultivated in this new land becoming one of early Americas principal artistic achievements The backstory of this distinctive art form is a fascinating one The Yankees a homogenous group emerged in New England in the early 18th century Their artistic abilities in design are also prevalent in silverwork and furniture craft however it was in their steeples that they excelled and in which they were best expressed In The Steeples of Old New England Kirk Shivel traces both the history of these steeples and the Yankee society that built them including many examples and anecdotes covering the period between 1701 through 1860 This book provides a wealth of information students of history architecture and religion or anyone else interested in reading about or visiting these historical landmarks These magnificent edifices rose up everywhere on the newly settled New England landscape the earliest built only a half century before the American Revolution and the last built right before the Civil War There are over 115 exquisitely beautiful illustrations some full color and others taken from documents of the period A comprehensive directory and bibliography are also included

The Age of Homespun Laurel Thatcher Ulrich,2009-08-26 They began their existence as everyday objects but in the hands of award winning historian Laurel Thatcher Ulrich fourteen domestic items from preindustrial America ranging from a linen tablecloth to an unfinished sock relinquish their stories and offer profound insights into our history In an age when even meals are rarely made from scratch homespun easily acquires the glow of nostalgia The objects Ulrich investigates unravel those simplified illusions revealing important clues to the culture and people who made them Ulrich uses an Indian basket to explore the uneasy coexistence of native and colonial Americans A piece of silk embroidery reveals racial and class distinctions and two old spinning wheels illuminate the connections between colonial cloth making and war Pulling these divergent threads together Ulrich demonstrates how early Americans made used sold and saved textiles in order to assert their identities shape relationships and create history

The Texture of Industry Robert B. Gordon,Patrick M. Malone,1997-02-06 While historians have given ample attention to stories of entrepreneurship invention and labor conflict

they have told us little about actual work places and how people worked Workers seldom wrote about their daily employment However they did leave behind their tools products shops and factories as well as the surrounding industrial landscapes and communities In this book Gordon and Malone look at the industrialization of North America from the perspective of the industrial archaeologist Using material evidence from such varied sites as Indian steatite quarries automobile plants and coal mines they examine manufacturing technology transportation systems and the effects of industrialization on the land Their research greatly expands our understanding of industry and focuses attention on the contributions of anonymous artisans whose skills shaped our industrial heritage

The Conquest of Labor Curtis J. Evans, 2014-12-12 The Conquest of Labor offers the first biography of Daniel Pratt 1799 1873 a New Hampshire native who became one of the South's most important industrialists After moving to Alabama in 1833 Pratt started a cotton gin factory near Montgomery that by the eve of the Civil War had become the largest in the world Pratt became a household name in cotton growing states and Prattville the site of his operations one of the antebellum South's most celebrated manufacturing towns Based on a rich cache of personal and business records Curtis J. Evans's study of Daniel Pratt and his Yankee town in the heart of the Deep South challenges the conventional portrayal of the South as a premodern region hostile to industrialization and shows that contrary to current popular thought the South was not so markedly different from the North

Structures of Change in the Mechanical Age Ross Thomson, 2009-05-08 The United States registered phenomenal economic growth between the establishment of the new republic and the end of the Civil War Ross Thomson's fresh study accounts for the unprecedented technological innovations that helped propel antebellum growth Thomson argues that the transition of the United States from an agrarian economy in 1790 to an industrial leader in 1865 relied fundamentally on the spread of technological knowledge within and across industries Essential to this spread was a dense web of knowledge diffusing institutions new occupations and industries the patent office machine shops mechanics associations scientific societies public colleges and the civil engineering profession Together they composed an integrated innovation system that generated disseminated and employed new technical knowledge across ever widening ranges of the economy To trace technological change in fourteen major industries and the economy as a whole Thomson analyzes 14 000 patents the records of two dozen machinery firms census data for 1 800 companies and hundreds of business directories This exhaustive research leads to his interesting interpretation of technological diffusion and development Thomson's impressive study of the infrastructure that fueled and supported the young country's economic and industrial successes will interest students of economic technological and business history

Blackstone River Valley United States. National Park Service. Northeast Region. Park Planning & Special Studies Division. Boston Office, 2011 *Building the Workingman's Paradise* Margaret Crawford, 1995 This innovative and absorbing book surveys a little known chapter in the story of American urbanism the history of communities built and owned by single companies seeking to bring their workers homes and place of employment together on a single site By 1930 more than two

million people lived in such towns dotted across an industrial frontier which stretched from Lowell Massachusetts through Torrance California to Norris Tennessee Margaret Crawford focuses on the transformation of company town construction from the vernacular settlements of the late eighteenth century to the professional designs of architects and planners one hundred and fifty years later Eschewing a static architectural approach which reads politics history and economics through the appearance of buildings Crawford portrays the successive forms of company towns as the product of a dynamic process shaped by industrial transformation class struggle and reformers efforts to control and direct these forces
