Opportunities Yearbook **The Metabolism of Islands** Simron Singh, Marina Fischer-Kowalski, Marian Chertow, 2021 This book makes the case for why we should care about islands and their sustainability Islands are hotspots of biocultural diversity and home to 600 million people that depend on one sixth of the earth's total area including the surrounding oceans for their subsistence Today they are at the frontlines of climate change and face an existential crisis Islands are however potential hubs of innovation that are uniquely positioned to be leaders in sustainability and climate action This volume argues that a full fledged program on island industrial ecology is urgently needed with the aim of offering policy relevant insights and strategies to sustain small islands in an era of global environmental change The nine contributions in this volume cover a wide range of applications of socio metabolic research from flow accounts to stock analysis and their relationship to services in space and time They offer insights into how reconfiguring patterns of resource use will allow island governments to build resilience and adapt to the challenges of climate change **The Hebrides** Paul Murton, 2024-07-04 Paul Murton has spent half a lifetime exploring some of the most beautiful islands in the world the Hebrides He has travelled the length and breadth of the Scotland's rugged six thousand mile coast line and sailed to over eighty islands In this new and updated edition of his acclaimed book Paul visits each of the Hebridean islands in turn introducing their myths and legends history culture and extraordinary natural beauty In addition he also meets the people who live there and learns their story He has met crofters fishermen tweed weavers Gaelic singers clan chiefs artists postmen and bus drivers people from every walk of life who make the islands tick This blend of the contemporary and the traditional creates a vivid account of the Hebrides and serves as a unique guide to the less well known aspects of life among the islands Environmental Planning in the Caribbean Jonathan Pugh, Janet Henshall Momsen, 2006-01-01 Illustrated by case studies from both smaller nations such as Carriacou Barbados and St Lucia and larger countries including Cuba Mexico and Jamaica this volume brings together leading writers concerned with environmental planning in the Caribbean to provide an interdisciplinary contemporary critical overview They argue that context is central to the practice of environmental planning in this region Rather than focusing on a deterministic colonial geography and history this volume proposes that whilst a wide range of foreign planning influences can be felt in different contexts environmental planning emerges in specific settings through the fluid interaction between local and global relations of power Thus a number of chapters explore the effects of external discourses upon the region while others examine discourses on the US style democracy and on tourism **The Oxford Handbook of Climate Change and Society** John S. Dryzek, Richard B. Norgaard, David Schlosberg, 2011-08-18 A systematic examination by the best writers in a variety of fields working on issues of how climate change affects society and how social economic and political systems can do and should respond Sixty Years behind the Mast Edward Carus, 2021-08-03 Although the theme of *Sixty Years behind the Mast* is sailing blue water cruising in particular it is much more than just about sailing First it is hoped the book will be added to the libraries of many blue water sailors For example on the author's forty foot yacht AEOLUS its library included three or four

dozen sailing books including Joshua Slocum's *Sailing Alone Around the World* 1894 and Richard Henry Dana's *Two Years Before the Mast* 1840 Dana's book is an excellent description of the eighty four foot Boston brig PILGRIM trading with the ranchers in Alta California in the 1830s A good library consisting of many other well known sailing adventure stories is essential on a cruising yacht *Second Sixty Years behind the Mast* also should be included in the libraries of armchair adventurers who dream of making voyages to the distant islands in the South Pacific The romantic South Pacific is famous for its out of the box authors artists beachcombers lone sailors and scallywags such as Robert Louis Stevenson In the South Seas James Michener Tales of the South Pacific impressionist painter Paul Gauguin who lived out his tragic life on Hiva Oa an island of the Marquesas Archipelago and American musician Eddie Lund and his Tahitians sometimes referred to as the Irving Berlin of island music The Romance of the South Pacific was also well illustrated by famed film director John Ford's movie *The Hurricane* 1937 starring Dorothy Lamour and Jon Hall *Third Sixty Years behind the Mast* is a good reference manual for parents who have adolescent children Several weeks even just one week of blue water sailing on a small boat is an amazing way to help children successfully navigate the rite of passage from adolescence to adulthood Cruising motivates a person to become self reliant builds self confidence enhances compassion helps develop the skills required for effective teamwork and leadership and makes one more sensitive to nature and sympathetic to the environment
