Reconsidering a Century of Flight Janet Rose Daly Bednarek, Roger D. Launius, 2003 Contains twelve essays in which leading aerospace historians consider the role of aviation in the twentieth century exploring topics related to innovation and the technology of flight civil aeronautics and government policy aerial warfare and aviation in the American imagination

Inventing Flight John David Anderson, 2004 The invention of flight craft heavier than air counts among humankind's defining achievements In this book aviation engineer and historian John D Anderson Jr offers a concise and engaging account of the technical developments that anticipated the Wright brothers successful first flight on December 17 1903 While the accomplishments of the Wrights have become legendary we do well to remember that they inherited a body of aerodynamics knowledge and flying machine technology How much did they draw upon this legacy Did it prove useful or lead to dead ends Leonardo da Vinci first began to grasp the concepts of lift and drag which would be essential to the invention of powered flight He describes the many failed efforts of the so called tower jumpers from Benedictine monk Oliver of Malmesbury in 1022 to the eighteenth century Marquis de Bacqueville He tells the fascinating story of aviation pioneers such as Sir George Cayley who in a stroke of genius first proposed the modern design of a fixed wing craft with a fuselage and horizontal and vertical tail surfaces in 1799 and William Samuel Henson a lace making engineer whose ambitious aerial steam carriage was patented in 1842 but never built Anderson describes the groundbreaking nineteenth century laboratory

experiments in fluid dynamics the building of the world's first wind tunnel in 1870 and the key contributions of various scientists and inventors in such areas as propulsion propellers not flapping wings and wing design curved not flat He also explains the crucial contributions to the science of aerodynamics by the German engineer Otto Lilienthal later praised by the Wrights as their most im Kitty Hawk as they raced to become the first in flight Anderson shows how the brothers succeeded where others failed by taking the best of early technology and building upon it using a carefully planned step by step experimental approach They recognized for example that it was necessary to become a skilled glider pilot before attempting powered flight With vintage photographs and informative diagrams to enhance the text *Inventing Flight* will interest anyone who has ever wondered what lies behind the miracle of flight undergraduates that would tell the connected prehistory of the airplane from Cayley to the Wrights In light of the recognized excellence of his technical textbooks with their stimulating historical vignettes I can't think of a better person than Professor Anderson for the job He has the rare combination of technical and historical knowledge that is essential for the necessary balance *Inventing Flight* will be a welcome addition to undergraduate classrooms Walter G Vincenti Stanford University

The Smithsonian's History of America in 101 Objects Richard Kurin, 2016-10-25 The Smithsonian Institution is America's largest most important and most beloved repository for the objects that define our common heritage Now Under Secretary for Art History and Culture Richard Kurin aided by a team of top Smithsonian curators and scholars has assembled a literary exhibition of 101 objects from across the Smithsonian's museums that together offer a marvelous new perspective on the history of the United States Ranging from the earliest years of the pre-Columbian continent to the digital age and from the American Revolution to Vietnam each entry pairs the fascinating history surrounding each object with the story of its creation or discovery and the place it has come to occupy in our national memory Kurin sheds remarkable new light on objects we think we know well from Lincoln's hat to Dorothy's ruby slippers and Julia Child's kitchen including the often astonishing tales of how each made its way into the collections of the Smithsonian Other objects will be eye-opening new discoveries for many but no less evocative of the most poignant and important moments of the American experience Some objects such as Harriet Tubman's hymnal *Sitting Bull's* ledger Cesar Chavez's union jacket and the *Enola Gay* bomber tell difficult stories from the nation's history and inspire controversies when exhibited at the Smithsonian Others from George Washington's sword to the space shuttle *Discovery* celebrate the richness and vitality of the American spirit In Kurin's hands each object comes to vivid life providing a tactile connection to American history Beautifully designed and illustrated with color photographs throughout *The Smithsonian's History of America in 101 Objects* is a rich and fascinating journey through America's collective memory and a beautiful object in its own right
