The Great Canadian Book of Lists Randy Ray,Mark Kearney,1999-09-01 Chronicles a century of achievements trends important and influential people and events that have shaped this country *High Time* Andrew Potter,Daniel M. Weinstock,2019-03-04 Canada has become the first G7 country to legalize cannabis and the world is watching The primary concern facing the Liberal government as it seeks to fulfill its 2015 campaign promise to legalize regulate and restrict access to marijuana is whether it can be done without making the situation worse As the Liberal platform pointed out the current regime lets illegal cannabis fall into the hands of minors pours large profits into organized crime and traps many people in the criminal justice system for what is arguably a victimless crime While the legalization of marijuana in Canada begins with a straightforward change of the criminal code its ramifications go far beyond this Legalization will have a serious impact on the country's international treaty commitments interprovincial relations taxation and regulatory regimes and social and health policies The essays in this book address these outcomes from three main perspectives the decades long political path

to legalization the assumptions that underwrite the new policy in particular the desire to stamp out the black market and how legalization in Canada looks in an international context Bringing together analysis by policy makers and scholars including the architect of marijuana legislation in Portugal a trailblazing jurisdiction High Time provides an urgent and necessary overview of Canada's Cannabis Act **Lobbyists, Governments and Public Trust, Volume 1 Increasing Transparency through Legislation** OECD,2009-12-01 This report reviews the experiences of Australia Canada Hungary Poland the United Kingdom and the United States with government regulations designed to increase scrutiny for lobbying and lobbyists

Tobacco Control and Tobacco Farming Wardie Leppan,Natacha Lecours,Daniel Buckles,2014-09-15 The bulk of the world's tobacco is produced in low and middle income countries In order to dissuade these countries from implementing policies aimed at curbing tobacco consumption such as increased taxes health warnings advertising bans and smoke free environments the tobacco industry claims that tobacco farmers will be negatively affected and that no viable sustainable alternatives exist This book based on original research from three continents exposes the myths behind these claims

Contraband Tobacco in Canada , Golden Holocaust Robert N. Proctor,2012-02-28 The cigarette is the deadliest artifact in the history of human civilization It is also one of the most beguiling thanks to more than a century of manipulation at the hands of tobacco industry chemists In Golden Holocaust Robert N Proctor draws on reams of formerly secret industry documents to explore how the cigarette came to be the most widely used drug on the planet with six trillion sticks sold per year He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco cancer hazards even as they ensnare legions of scientists and politicians in a web of denial Proctor tells heretofore untold stories of fraud and subterfuge and he makes the strongest case to date for a simple yet ambitious remedy a ban on the manufacture and sale of cigarettes Racing to the Bottom? Kathryn Harrison,2011-11-01 The spectre of a race to the bottom is increasingly prominent in debates about globalization and also within federal systems where the mobility of both capital and individuals prompts fears of interjurisdictional competition with respect to taxes and environmental and welfare standards While there has been no shortage of either political rhetoric or academic theorizing on this subject empirical studies have been in shorter supply This volume seeks to fill that gap by asking Are Canadian provinces engaged in a race to the bottom and if so what are the consequences The contributors apply insights from economics and political science to several policy fields What emerges is a theoretical and empirical picture of interprovincial competition that shows it to be more complex than the popular image of a race to the bottom and that also contradicts predictions of an inexorable downward spiral This timely practical volume will be of interest to public policy practitioners as well as to students and scholars of economics and political science **The Global Tobacco Epidemic and the Law** Andrew D. Mitchell,Tania Voon,2014-07-31 Tobacco use represents a critical global health challenge The World Health Organization estimates that tobacco kills nearly 6 million people a year with the toll expected to rise to 8 million annually over the next two decades Written by health and Canada the Good Marcel

Martel,2014-03-27 To invest in vice can be a sound financial decision but despite the lure of healthy profits individuals and mutual funds have been reluctant to invest in this type of stock After all who would take pride in supporting the tobacco industry knowing it sells a deadly product And what social responsibilities do investors bear with respect to compulsive gamblers who have lost so much money that suicide becomes an attractive option Canada the Good considers more than five hundred years of debates and regulation that have conditioned Canadians attitudes towards certain vices Early European settlers implemented a Christian moral order that regulated sexual behaviour gambling and drinking Later some transgressions were diagnosed as health issues that required treatment Those who refused the label of illness argued that behaviours formerly deemed as vices were within the range of normal human behaviour This historical synthesis demonstrates how moral regulation has changed over time how it has shaped Canadians lives why some debates have almost disappeared and others persist and why some individuals and groups have felt empowered to tackle collective social issues Against the background of the evolution of the state the enlargement of the body politic and mounting forays into court activism the author illustrates the complexity over time of various forms of social regulation and the control of vice

Disease Prevention as Social Change Constance A. Nathanson,2007-04-02 From mad cow disease and E coli tainted spinach in the food supply to anthrax scares and fears of a bird flu pandemic national health threats are a perennial fact of American life Yet not all crises receive the level of attention they seem to merit The marked contrast between the U.S. government's rapid response to the anthrax outbreak of 2001 and years of federal inaction on the spread of AIDS among gay men and intravenous drug users underscores the influence of politics and public attitudes in shaping the nation's response to health threats In *Disease Prevention as Social Change* sociologist Constance Nathanson argues that public health is inherently political and explores the social struggles behind public health interventions by the governments of four industrialized democracies Nathanson shows how public health policies emerge out of battles over power and ideology in

which social reformers clash with powerful interests from dairy farmers to tobacco lobbyists to the Catholic Church. Comparing the history of four public health dilemmas: tuberculosis and infant mortality at the turn of the last century and more recently smoking and AIDS in the United States, France, Britain, and Canada, Nathanson examines the cultural and institutional factors that shaped reform movements and led each government to respond differently to the same health challenges. She finds that concentrated political power is no guarantee of government intervention in the public health domain. France, an archetypical strong state, has consistently been decades behind other industrialized countries in implementing public health measures in part because political centralization has afforded little opportunity for the development of grassroots health reform movements. In contrast, less government centralization in America has led to unusually active citizen-based social movements that campaigned effectively to reduce infant mortality and restrict smoking. Public perceptions of health risks are also shaped by politics, not just science. Infant mortality crusades took off in the late nineteenth century not because of any sudden rise in infant mortality rates but because of elite anxieties about the quantity and quality of working class populations. *Disease Prevention as Social Change* also documents how culture and hierarchies of race, class, and gender have affected governmental action and inaction against particular diseases. Informed by extensive historical research and contemporary fieldwork, *Disease Prevention as Social Change* weaves compelling narratives of the political and social movements behind modern public health policies. By comparing the vastly different outcomes of these movements in different historical and cultural contexts, this path-breaking book advances our knowledge of the conditions in which social activists can succeed in battles over public health.
