Social Hierarchies Essays Towards A Sociophysiological Perspective Contributions In Sociology S:

Perspectives on Method and Theory in the Study of Religion Armin Geertz, Russel McCutcheon, 2000-04-20 This volume collects select papers on methodology in the study of religion that were originally presented at the XVIIth Congress of the International Association for the History of Religions held in Mexico City in 1995. Granted the status of adjunct proceedings for the Congress, the collection opens with the editors' detailed survey of the longstanding importance of discussions on methodology within the IAHR. The twenty-one essays which follow examine religion and the history of the study of religion within a variety of theoretical contexts. The essays are organized in terms of three general sub-divisions: general issues in methodology; from the impact of both postmodernism and reflexive anthropology on the study of religion to the politics of religious studies as practiced in different national settings; reflections on the categories commonly employed by scholars working in the field, e.g. religion, syncretism, gender, New Religious Movements, sacred power, experience, etc. and finally the collection ends with a review symposium on one of the more sophisticated recent treatments of the problem of defining religion. Benson Saler's *Conceptualizing Religion* Brill 1993. Despite carrying out their work in a variety of settings from Denmark and Finland to Britain, Switzerland, Germany, Canada, the USA, and Mexico, the authors all model a similar approach to studying religion as but one instance of human culture. Hierarchy and Democracy Albert Somit, 1991. *Contributions to Indian Sociology*, 1992. *Social Hierarchies* Patricia R. Barchas, 1984-06-15. The authors of the essays presented in this collection use selected animal and human models to inquire into the dynamics of hierarchical behavior. The collection begins with a review of the biological parameters of human behavior and suggests that a biological basis can be found in association with general strategies for organizing human behavior. Barchas has organized the essays proceeding from an evolutionary contextual frame through contributions that illuminate the regulation of hierarchical structures to the final essays that implicate the brain's attentional system as a chief mediator between an individual's position in the group structure and behavior. This provocative volume presents strategies for thinking about some of the issues that necessarily arise when the impact of social behavior, physiology, and evolution on hierarchical behavior is considered. The Sociology of Health and Illness Peter Conrad, Valerie Leiter, 2023-06-12. This anthology for Medical Sociology courses brings together a collection of readings from the scholarly literature on health, medicine, and health care covering some of the most timely health issues of our day.
