The Social Dimension: Volume 2 Henri Tajfel, Colin Fraser, Joseph Maria Franciscus Jaspars, 1984-05-24 The two

volumes of *The Social Dimension* present a comprehensive survey of the major developments in social psychology which took place in Europe during the very active 1970s and 1980s. They aim to capture the diversity and vitality of the discipline, stress the growing emphasis on fully social analyses of social psychological phenomena, hence the social dimension, and to provide a valuable resource for researchers in the future. Although comprehensive in scope, the volumes are not written in the formal style of a reference handbook. Instead, the authors of the thirty-three chapters, drawn from more than a dozen mainly European countries, and all experts in their own fields, were invited to present their own personal overviews of the issues in social psychology on which they were actively working. Both volumes are organized into three main Parts. Volume 1 is concerned with the social development of the child, interpersonal communication and relationships, and the social reality, group processes, and intergroup relations. This ambitious enterprise has produced a distinctive yet authoritative summary and evaluation of the growth points of social psychology in Europe, which will interest and influence not only social psychologists but many readers from related disciplines.

The Social Dimension of Higher Education in Europe, 2020-11-23

The social dimension of higher education emphasises the need to create more flexible learning and participation pathways within higher education for all students. In recent years, several projects have been developed and research groups created that have allowed considerable progress in the promotion and monitoring of more inclusive policies in this field. However, designing and implementing programmes providing attention to vulnerable groups remains a challenge for universities. Including the most significant contributions of the European project ACCESS4ALL, the book presents conceptual aspects related to the inclusive university, such as the quality and transitions linked to the treatment of diversity, good inclusion practices in six European countries, and a set of tools to identify dysfunctions and promote inclusion in higher education.
