Social Expenditure 1960-1990 Problems Of Growth And Control:

Aging and Social Expenditure in the Major Industrial Countries, 1980-2025 Ziba Farhadian, Mr. Bernard Nivollet, Mr. Robert Alan Feldman, Mr. Peter S. Heller, Mr. Richard Hemming, Mr. Menachem Katz, Ahsan S. Mansur, Mr. Donogh McDonald, Mr. Edgardo Ruggiero, Mr. Peter Kohnert, 1986-09-15 Most of the seven major industrial countries are now experiencing significant changes in their demographic structure. A persistent pattern of declining fertility and improving life expectancy has created major segments of the population that are already relatively aged or will become so in the near future. This paper examines the impact of prospective demographic trends on the level and structure of social expenditure by the governments of the seven major industrial countries: the Group of Seven through the year 2025. The Control and Management of Government Expenditure OECD, 2009-05-18 Public expenditure control has become a central element of economic policy in many countries. This report analyses budget practices and some recent innovations from the point of view of senior public servants in the central budget offices of **Social Expenditure, 1960-1990** Organisation for Economic Co-operation and Development, 1985 **In Defense of Public Debt** Barry J. Eichengreen, Asmaa El-Ganainy, Rui Esteves, Kris James Mitchener, 2021 Debt in service of the state: States and the limits of borrowing. Democratization and globalization: Caveat emptor. Managing problem debts: Successful consolidation. Warfare to welfare: Cycles of debt. Oil and water: Missed opportunities. Debt to the rescue: COVID 19. The Future of the Welfare State Francis G. Castles, 2004-07-08 This assessment of the threat posed to modern welfare states by globalization and demographic change brings together empirical methods, current information from 21 countries, and insights from across the social sciences. The author also presents likely trajectories of welfare state development in coming decades. **Managing Mixed Economies** Francis G. Castles, Franz Lehner, Manfred G. Many have argued that globalization has undermined national policies to raise the living standards and enhance the economic opportunities of the poor. This book by sixteen of the world's leading authorities in international economics and the welfare state suggests a surprisingly different set of consequences. Globalization does not preclude social insurance and egalitarian redistribution, but it does change the mix of policies that can accomplish these ends. Globalization and Egalitarian Redistribution demonstrates that the free flow of goods, capital, and labor has increased the inequality or volatility of labor.

earnings in advanced industrial societies while constraining governments ability to tax the winners from globalization to compensate workers for their loss This flow has meanwhile created opportunities for enhancing the welfare of the less well off in poor and middle income countries Comprising eleven essays framed by the editors introduction and conclusion this book represents the first systematic look at how globalization affects policies aimed at reducing inequalities The contributors are Keith Banting Pranab Bardhan Carles Boix Samuel Bowles Minsik Choi Richard Johnston Covadonga Meseguer Yebra Karl Ove Moene Layna Mosley Claus Offe Ugo Pagano Adam Przeworski Kenneth Scheve Matthew J Slaughter Stuart Soroka and Michael Wallerstein *The Future of Social Welfare Systems in Canada and the United Kingdom* Institute for Research on Public Policy,1987 Informed observers and policy makers are well aware that in recent years social welfare systems on both sides of the Atlantic have been subject to growing scrutiny debate and controversy especially due to high unemployment rates and extreme interest rates experienced during the last recession as well as important demographic changes such as the increase of women into the labour market and the aging population The papers included in the colloquium discuss the situation of social welfare policy in three stages historical developments and forces for change the influence of the political process on social security developments and the nature of policy responses to demographic change

Political Data Handbook Jan-Erik Lane,David McKay,Kenneth Newton,1996-12-26 This fully revised and updated edition of an established reference book provides in one volume the most comprehensive and detailed statistical guide available to the government and politics of the twenty four countries in the OECD There is no lack of statistical data about the OECD countries the nineteen countries of Western Europe together with Canada the United States Japan Australia and New Zealand but much of the material is hard to track down and little is available in comparative form The editors of the present volume have sifted through many hundreds of sources to select the essential facts and figures on population social structure employment the economy public finance government structures and political parties from 1950 to the present day In addition they provide social and economic background for each of the countries covered to enable the data to be put in context A short final section lists sources of further information The resulting combination is both invaluable and fascinating whether it is used casually to check up a fact or two or systematically to make detailed comparisons between the most advanced political systems of the Western world

Decision Costs and Democracy: Trade-offs in Institutional Design Robert A. Bohrer,2017-07-12 This title was first published in 2001 This text addresses the variations in democratic institutional design and seeks to determine not only if these differences matter but also to explain how they matter Using data from established economically well off systems the book shows that not only are there a multitude of ways to construct a democracy but also how a democracy is constructed influences the outcomes produced by that system That is to say institutional differences create distinct incentives for behaviour that in turn influence the type of outcome produced

In Search of National Economic Success Lane Kenworthy,1995-05-02 Recent work in comparative political economy has generated a host of alternative explanations

for variation in national economic performance institutional sclerosis flexible specialization governance relations etc In each case these explanations have trouble accounting for more than a handful of instances In *Search of National Economic Success* uses detailed case studies with statistical analysis to comparatively assess the market liberal belief in free markets limited government and the tradeoff between economic efficiency and social justice Lane Kenworthy argues that the key to economic success lies in combining competition with cooperation Among advanced industrialized nations the countries achieving the best economic performance results over the past three decades have been the most committed to combining competition and cooperation Those faring the worst rely predominantly on atomistic individualistic competition In the end the comparative record strongly supports a focus on cooperation inducing institutions This volume will prove invaluable to scholars and students in comparative politics international political economy and comparative economics This volume presents an alternative explanation of the cross national variation in performance arguing that national economic success lies in combining competition with cooperation *Journal of Economic Literature* **De Gruyter Handbook of Degrowth** Lauren Eastwood, Kai Heron, 2024-03-04 Degrowth has emerged as one of the most exciting and contested fields of research into the drivers of global heating ecological collapse and economic injustice The perspective is both a critique of existing growth based models of development which it argues have put humanity on a collision course with non negotiable ecological limits and a vision for a brighter future in which humans and non humans alike can flourish By putting an end to growth seeking economic development and boundless energetic and material throughputs degrowth s proponents suggest we can build an economy that meets the material needs of people and planet for generations to come This handbook s contributions signal the importance of degrowth across multiple disciplines and practices Along the way they grapple with some of the most critical questions ideological assumptions policies and social struggles of our time The handbook approaches degrowth as a loosely knit and developing set of interdisciplinary propositions about what it might take to achieve a world of human and non human flourishing Contributors explore challenge and critique degrowth s propositions and its prospects of shaping scholarly agendas policy frameworks and social movements Essays consider degrowth from a variety of empirical and theoretical vantages including urban design architecture political economy political ecology critical geography and political theory This integrative approach at once critical and constructive aims to preserve for readers the sense of possibility that has drawn people to degrowth scholarship thus far *The Third World* Jim Norwine, Alfonso Gonzalez, 1988 This book aims to present an impressionistic picture that reflects the heterogeneous nature of the Third World Contributions from Western and Third World authors illustrate the complex reality of problems and issues using case studies from the Caribbean South America the Arab countries Asia and Africa **Shaping Race Policy** Robert Lieberman, 2011-06-27 *Shaping Race Policy* investigates one of the most serious policy challenges facing the United States today the stubborn persistence of racial inequality in the post civil rights era Unlike other books on the topic it is comparative examining American developments

alongside parallel histories of race policy in Great Britain and France Focusing on on two key policy areas welfare and employment the book asks why America has had such uneven success at incorporating African Americans and other minorities into the full benefits of citizenship Robert Lieberman explores the historical roots of racial incorporation in these policy areas over the course of the twentieth century and explains both the relative success of antidiscrimination policy and the failure of the American welfare state to address racial inequality He chronicles the rise and resilience of affirmative action including commentary on the recent University of Michigan affirmative action cases decided by the Supreme Court He also shows how nominally color blind policies can have racially biased effects and challenges the common wisdom that color blind policies are morally and politically superior and that race conscious policies are merely second best *Shaping Race Policy* has two innovative features that distinguish it from other works in the area First it is comparative examining American developments alongside parallel histories of race policy in Great Britain and France Second its argument merges ideas and institutions which are usually considered separate and competing factors into a comprehensive and integrated explanatory approach The book highlights the importance of two factors America s distinctive political institutions and the characteristic American tension between race consciousness and color blindness in accounting for the curious pattern of success and failure in American race policy

Social Capitalism Kees van Kersbergen, 2003-09-02 Christian democracy has been the most successful political movement in post war Western Europe yet its crucial impact on the development of the modern European welfare state has been critically neglected In this study Kees van Kersbergen demonstrates the precise nature of the links between Christian democracy and the welfare state Using a variety of sources the author describes the origin and development of the Christian democratic movement and presents comparative accounts of the varying degrees of political entrenchment of national christian democratic parties Drawing upon cross national indicators of welfare state development he identifies and explains the existence of a distinctively Christian democratic as opposed to a liberal or social democratic welfare state regime which he labels social capitalism This book compares the different national contexts under which christian democratic social theory has been turned into political action Kees van Keersbergen shows how the different social policy performances of crucial cases Germany Italy and the Netherlands have been affected not just by prevalent power structures but also by the coalitional strategies and political abilities of christian democratic parties

Analysing Social Policy Concepts and Language Daniel Béland, Klaus Petersen, 2015-10-07 Social policy scholars and practitioners have long employed concepts such as welfare state and social security but where do these concepts come from and how has their meaning changed over time What characterizes social policy language in different places and how do some social concepts travel between them Addressing such questions in a systematic manner the contributors to this collection analyze the concepts and language used to describe contemporary social policy Combining detailed chapters on particular countries with broader comparative chapters the book offers a variety of perspectives on just what we mean when we use these terms

Issues and Alternatives in Comparative Social Research Ragin, 2021-11-01 *International Analysis Poverty* Peter Townsend, 2014-06-06 First published in 1993 The scientific and political debate about poverty has been changing fast with dramatic implications for intellectual interpretation and action by governments and the intention in publishing this volume is to contribute to that debate Scientists concerned to analyse poverty have been thrust by events into greater international service But there are sinister forces at work which are seeking to divert them into petty issues to blame the victims of poverty or to cut them off from the resources or opportunities to investigate and report freely This book is born of that frustration and represents the changing debate during the late 1980s and early 1990s A Disease-based Comparison of Health Systems What is Best and at what Cost? OECD, 2003-05-14 This book combines a collection of essays by leading experts from several OECD countries with papers discussing the results of the OECD Ageing Related Diseases study
