- Context of the interaction
- Strength of situational cues

### Barriers

- Selective perception
- Stereotyping
- First-impression errors
- Projection
- Self-fulfilling prophecies

# Social Perception

**Marcel A. Müller**

## **Social Perception:**

*Social Perception* Leslie A. Zebrowitz, 1990 This book argues that the mainstream approach to social perception is a cognitive one which focuses primarily on the processes of perceiving people It aims to redress the imbalance by giving greater emphasis to the content of social perceptions the stimulus information on which they are based and the functions which they serve

**Social Perception and Social Reality** Lee Jussim, 2012-04-06 Social Perception and Social Reality contests the received wisdom in the field of social psychology that suggests that social perception and judgment are generally flawed biased and powerfully self fulfilling Jussim reviews a wealth of real world survey and experimental data collected over the last century to show that in fact social psychological research consistently demonstrates that biases and self fulfilling prophecies are generally weak fragile and fleeting Furthermore research in the social sciences has shown stereotypes to be accurate Jussim overturns the received wisdom concerning social perception in several ways He critically reviews studies that are highly cited darlings of the bias conclusion and shows how these studies demonstrate far more accuracy than bias or are not replicable in subsequent research Studies of equal or higher quality which have been replicated consistently are shown to demonstrate high accuracy low bias or both The book is peppered with discussions suggesting that theoretical and political blinders have led to an odd state of affairs in which the flawed or misinterpreted bias studies receive a great deal of attention while stronger and more replicable accuracy studies receive relatively little attention In addition the author presents both personal and real world examples such as stock market prices sporting events and political elections that routinely undermine heavy handed emphases on error and bias but are generally indicative of high levels of rationality and accuracy He fully embraces scientific data even when that data yields unpopular conclusions or contests prevailing conventions or the received wisdom in psychology in other social sciences and in broader society

New Research on Social Perception John A. Zebrowski, 2007 The contemporary concept of social perception is considered to be an umbrella term that includes various other traditional and related phenomena such as person perception impression and attitude formation social cognition attribution stereotypes prejudice social categorisation and social comparison and implicit personality theories This book presents research on social perspectives and behavioural responses which follow These include child perceptions social class issues perceived attractiveness theories occupational prestige and related communication factors

**Social Perception and Social Reality** Lee Jussim, 2012-04-06 This title contests the received wisdom in the field of social psychology that suggests that social perception and judgment are generally flawed biased and powerfully self fulfilling

**Social Perception from Individuals to Groups** Steven J. Stroessner, Jeffrey W. Sherman, 2015-02-11 This volume focuses on social perception the processing of information about people This issue has always been central to social psychology but this book brings together literatures that in large part have been separated by the nature of the social target that is involved Historically research on person perception developed quite independently from research involving

perceptions of groups Whereas the former research generally focused on the cognitive processes involved in forming impressions of individuals research on group perception examined the content of stereotypes and the conditions under which they are used in social judgment There was been little overlap in the theories and methods of these subfields and different researchers were central in each The chapters in this book highlight research and theorizing about social perception exploring the processes involved in social perception from persons to groups Some chapters describe work that was originally developed in person perception but is being extended to understanding groups Other chapters illustrate how some processes studied in the domain of stereotyping also affect perceptions of individual persons Finally other chapters focus on variables that affect perceptions and judgments of both individuals and groups providing opportunities for greater recognition of the common set of factors that are central to all types of social perception This groundbreaking book highlights the research contributions of David L Hamilton whose research has played a central role in uniting these previously independent areas of research It provides essential reading for upper level courses on social cognition or social perception and could also serve as an auxiliary text in courses on interpersonal perception relations and courses on stereotyping intergroup relations

**Motivated Social Perception** Steven J. Spencer, Steven Fein, Mark P. Zanna, James M. Olson, 2003-01-30 The 9th book in the Ontario Symposium series It highlights research on motivated social perception The targeted market includes scholars researchers and advanced students interested in social perception Social Perception Jenifer B. Teiford, 2008 The contemporary concept of social perception is considered to be an umbrella term that includes various other traditional and related phenomena such as person perception impression and attitude formation social cognition attribution stereotypes prejudice social categorisation and social comparison and implicit personality theories This new book presents research on issues related to social perception and behavioural responses which follow These include child perceptions social class issues perceived attractiveness theories occupational prestige and related communication factors *Encyclopedia of Perception* E. Bruce Goldstein, 2009-09-15 The field of perception is devoted to explaining the operation of the senses and the experiences and behaviors resulting from stimulation of the senses Perceptual processes such as recognizing faces seeing color hearing music and feeling pain represent the actions of complex mechanisms yet we usually do them easily The Encyclopedia of Perception presents a comprehensive overview of the field of perception through authoritative essays written by leading researchers and theoreticians in psychology the cognitive sciences neuroscience and medical disciplines It presents two parallel and interacting approaches the psychophysical or determining the relationship between stimuli in the environment and perception and the physiological or locating the biological systems responsible for perception Are there any processes not associated with perception Surely there are but the pervasiveness of perception is truly impressive and the phenomena of perception and its mechanisms are what this encyclopedia is about Key Features Contains 16 pages of color illustration and photography to accompany the entries Offers a varied and broad list of topics including basic research as well as

methodologies theoretical approaches and real world applications of perceptual research Emphasizes human perception but includes ample research because of its importance in its own right and because of what this research tells us about human perception Written by recognized experts from many disciplines but for an audience with no previous background in perception students and members of the general public alike Key Themes Action Attention Audition Chemical Senses Cognition and Perception Computers and Perception Consciousness Disorders of Perception Illusory Perceptions Individual Differences Human and Comparative Across Species Not Including Ageing Disorders and Perceptual Development Methods Perceptual Development Experience Philosophical Approaches Physiological Processes Sense Interaction Skin and Body Senses Theoretical Approaches Visual Perception Social Perception Ilona Roth,1976 Social and Affective Neuroscience GE Federation of Psychologists, Social and Affective Neuroscience Defining Affective Neuroscience The Brain s Emotional Processing Pathways The Role of the Amygdala The Neurobiology of Fear The Neurobiology of Anxiety The Neurobiology of Depression The Neurobiology of Happiness The Neurobiology of Love The Neurobiology of Empathy The Social Brain Hypothesis The Mirror Neuron System Imitation and Social Learning Emotional Contagion Nonverbal Communication The Neuroscience of Attachment The Neuroscience of Rejection The Neuroscience of Trust The Neuroscience of Cooperation The Neuroscience of Competition The Neuroscience of Morality The Neuroscience of Prosocial Behavior The Neuroscience of Prejudice The Neuroscience of Stereotyping The Neuroscience of Empathy Disorders The Neuroscience of Autism Spectrum Disorder The Neuroscience of Psychopathy The Neuroscience of Emotional Regulation The Neuroscience of Mindfulness The Neuroscience of Cognitive Behavioral Therapy The Neuroscience of Social Cognition The Neuroscience of Decision Making The Neuroscience of Risk Taking The Neuroscience of Persuasion The Neuroscience of Advertising The Neuroscience of Music and Emotion The Neuroscience of Art and Emotion The Neuroscience of Film and Emotion The Neuroscience of Video Games and Emotion The Neuroscience of Social Media and Emotion The Neuroscience of Loneliness The Neuroscience of Belonging The Neuroscience of Leadership The Neuroscience of Teamwork The Neuroscience of Cultural Differences The Future of Affective Neuroscience Conclusion Implications and Applications

**Social Perception** M.D. Rutherford,Valerie A. Kuhlmeier,2013-08-30 An interdisciplinary exploration of perceptual and cognitive processes underlying the ability to perceive social information drawing on current research and new experimental techniques As we enter a room full of people we instantly have a number of social perceptions We have an automatic perception of others as subjective agents with their own points of view thoughts and goals and we can quickly interpret minimal visual information to infer that something is animate This book explores the perceptual and cognitive processes that allow humans to perceive and understand this social information quickly and apparently effortlessly Top researchers in fields ranging from developmental psychology to vision science consider the perception of biological and animate motion inferences based on this motion and the early development of these abilities These innovative contributions reflect a recent renewal of

interest in the attribution of agency and the understanding of goal directed behavior which has been accompanied by a rapid increase in empirical discoveries enabled by such new experimental techniques as brain imaging The research presented in Social Perception suggests that an intuitive understanding of others is an integral part of human psychology develops early relies on a network of brain regions and may be compromised in autism Contributors Dare Baldwin Lara Bardi H Clark Barrett Erin Cannon You jung Choi Willem E Frankenhuys Tao Gao Emily D Grossman Antonia Hamilton Petra Hauf Valerie A Kuhlmeier Jeff Loucks Scott A Love Yuyan Luo Elena Mascalzoni Phil McAleer Richard Ramsey Lucia Regolin M D Rutherford Kara Sage Brian J Scholl Maggie Shiffrar Francesca Simion Jessica Sommerville James P Thomas Nikolaus Troje Amanda Woodward
