Neugarten,Robert James Havighurst,1976 *The Limits of Social Policy* Nathan Glazer,1988 Many social policies of the 1960s and 1970s designed to overcome poverty and provide a decent minimum standard of living for all Americans ran into trouble in the 1980s with politicians with social scientists and with the American people Nathan Glazer has been a leading analyst and critic of those measures Here he looks back at what went wrong arguing that our social policies although targeted effectively on some problems ignored others that are equally important and contributed to the weakening of the structures family ethnic and neighborhood ties commitment to work that form the foundations of a healthy society What keeps society going after all is that most people feel they should work however well they might do without working and that they should take care of their families however attractive it might appear on occasion to desert them Glazer proposes new kinds of social policies that would strengthen social structures and traditional restraints Thus to reinforce the incentive to work he would attach to low income jobs the same kind of fringe benefits health insurance social security vacations with pay that now make higher paying jobs attractive and that paradoxically are already available in some form to those on welfare More generally he would reorient social policy to fit more comfortably with deep and abiding tendencies in American political culture toward volunteerism privatization and decentralization After a long period of quiescence social policy and welfare reform are once again becoming salient issues on the national political agenda Nathan Glazer s deep knowledge and considered judgment distilled in this book will be a source of advice ideas and inspiration for citizens and policymakers alike

Social Policy and Planning for the 21st Century Donald G. Reid,2016-07-15 The greatest problems facing humanity today are climate change poverty and the increasing separation between the rich and poor The aim of this book is to examine the social constructions that have led to these breakdowns and provide potential solutions that are based on a fundamental change in the structure of society and the values on which a new and better social system can be built Unless we as a society set a drastically different course soon human life as we know it will suffer greatly perhaps even cease altogether Excess consumption is becoming anti social as the effects of global warming and increasing poverty become apparent What then will form the new social values on which society replaces the present emphasis on work and material consumption that now prevail This book s answer to that question is accomplishment and aesthetic consumption This proposed refocused existence will necessitate a new economic order that provides access to a livelihood beyond the market system This groundbreaking
