Smith,2017-02-21 This book offers one of the most comprehensive studies of social pathology to date following a cross disciplinary and methodologically innovative approach It is written for anyone concerned with understanding current social conditions individual health and how we might begin to collectively conceive of a more reconciled postcapitalist world Drawing reference from the most up to date studies Smith crosses disciplinary boundaries from cognitive science and anthropology to critical theory systems theory and psychology Opening with an empirical account of numerous interlinked carises from mental health to the physiological effects of environmental pollution Smith argues that mainstream sociological theories of pathology are deeply inadequate Smith introduces an alternative critical conception of pathology that drills to the core of how and why society is deeply ailing The book concludes with a detailed account of why a progressive and critical vision of social change requires a holistic view of individual and societal transformation Such a view is grounded in the awareness that a sustainable transition to postcapitalism is ultimately a many sided social individual and structural healing process Teacher Decision-Making in the Classroom John Eggleston,2018-10-03 Making decisions is one of the main activities of the teacher s work Considered or apparently unconsidered these decisions significantly affect the lives of all who work in classrooms both children and the teachers themselves Originally published in 1979 the aim of this collection of papers was to achieve greater understanding of classroom decision making and its consequences to identify and

map existing knowledge and to indicate where it might be augmented The contributors were researchers and teachers from schools universities and colleges at the time and they examine the process of teacher decision making from sociological psychological economic and other perspectives The book includes a detailed analysis of life in the classroom from a phenomenological perspective explorations based on micro economic techniques and structural perspectives on the role of the teacher in the school The concluding papers examine the possibilities for social change given the constraints on the work of the teacher

High Weirdness Erik Davis, 2019-11-05 An exploration of the emergence of a new psychedelic spirituality in the work of Philip K Dick Terence McKenna and Robert Anton Wilson A study of the spiritual provocations to be found in the work of Philip K Dick Terence McKenna and Robert Anton Wilson High Weirdness charts the emergence of a new psychedelic spirituality that arose from the American counterculture of the 1970s These three authors changed the way millions of readers thought dreamed and experienced reality but how did their writings reflect as well as shape the seismic cultural shifts taking place in America In High Weirdness Erik Davis America's leading scholar of high strangeness examines the published and unpublished writings of these vital iconoclastic thinkers as well as their own life changing mystical experiences Davis explores the complex lattice of the strange that flowed through America's West Coast at a time of radical technological political and social upheaval to present a new theory of the weird as a viable mode for a renewed engagement with reality

What Else Works? Jo Brayford, Francis B Cowe, John Deering, 2013-05-13 What Else Works has developed out of a growing awareness amongst practitioners that centralized notions of what works and one size fits all approaches to work with offenders and other groups is inevitably limited in its scope and effectiveness The book seeks to dispel the view of probation service users as offenders and socially excluded people as problems to be managed and treated and instead considers more creative alternatives to reduce both re offending and social exclusion These include working separately with women black and minority ethnic groups local community focussed projects in education and nature and conservation programmes The reader is encouraged to think about past and current policy practice and the relationship between practitioners and offenders or other socially excluded people Questions are raised as to whether and how practice could be different and contributors explore the theme of creative and change focussed practice or focus on a particular approach to a practice This book will appeal to students on criminal justice criminology and social work courses professionals operating in these fields as well as the wider audience of professionals and academics who may engage with these service users from a range of policy and practice perspectives
