Counseling on Personal Decisions Irving L. Janis, 1981-12-11 This book is designed to assist counselors to be more effective in their relationship with clients who seek help in choosing and adhering to a difficult course of action It presents a thoughtful theoretical analysis of the conditions that lead to successful short term counseling and then tests these hypotheses through a series of controlled field experiments carried out in a variety of counseling situations In his initial chapters Irving Janis identifies three critical phases of activity for the counselor in a helping relationship building an image as a reliable source of self esteem enhancement endorsing certain norms such as dieting or recommending sound decision making

procedures minimizing the client's separation reactions to the termination of direct contact. The main body of the book consists of field experiments conducted by Janis and his colleagues which assess the effects of numerous variations in counseling procedures. Field studies of weight reducing, smoking ending and marital and career counseling are among those used for evaluation of counseling techniques. In the final chapters Janis draws together the empirical findings of the field experiments, revising some aspects of his theory in response to the complexities of the research results. Written in a style that is lively and easily understood, *Counseling on Personal Decisions* provides a unique combination of theory, research and applications. It is a valuable tool not only for counselors but for physicians, lawyers, social workers and other professional advisors.

Self-Concept, Motivation and Identity Frédéric Guay, Herbert Marsh, Dennis M. McInerney, Rhonda G. Craven, 2015-06-01 The concept of the Self has a long history that dates back from the ancient Greeks such as Aristotle to more contemporary thinkers such as Wundt James Mead Cooley Freud Rogers and Erikson Tesser Felson 2000 Research on the Self relates to a range of phenomena including self esteem self concept self protection self verification self awareness identity self efficacy self determination etc that could be sharply different or very similar Despite this long tradition of thinkers and the numerous studies conducted on the Self this concept is still not very well defined More precisely it is not a precise object of study but rather a collection of loosely related subtopics Baumesiter 1998 Also in the philosophical literature the legitimacy of the concept of self has been brought into question Some authors have argued that the self is not a psychological entity per se but rather an illusion created by the complex interplay between cognitive and neurological subsystems Zahavi 2005 Although no definitive consensus has been reached regarding the Self we emphasis in this volume that the Self and its related phenomena including self concept motivation and identity are crucial for understanding consciousness and therefore important to understand human behavior Self concept motivation and identity Underpinning success with research and practice provides thus a unique insight into self concept and its relationship to motivation and identity from varied theoretical and empirical perspectives This volume is intended to develop both theoretical and methodological ideas and to present empirical evidence demonstrating the importance of theory and research to effective practice
