Pension Reform in Southeastern Europe Robert Holzmann, Landis MacKellar, Jana Repansek, 2009-01-01 Around the world pension reform remains at the center of public debate Its social fiscal and macroeconomic implications confront policy makers practitioners and academia with challenging questions Pension systems in aging societies in need of reform and further stressed by the pressures of globalization require parallel reforms of the labor market and effective lifelong learning not only to promote working longer but to ensure that people can actually do so

Pension Reforms in Central, Eastern, and Southeastern Europe Igor Guardiancich, 2013 This book traces and analyzes the legislation and implementation of pension reforms in four Central Eastern and Southeastern European countries Croatia Hungary Poland and Slovenia By comparing the political economy of their policymaking processes it seeks to pinpoint

regularities between institutional settings actor constellations decision making strategies and reform Guardiancich employs a historical institutionalist framework to analyze the policies actors and institutions that characterized the period between the collapse of socialism and the global financial crisis of 2008 2011 He argues that viable pension reforms should not be seen simply as an event but rather as a continuing process that must be fiscally socially and politically sustainable In particular the primary goal of a pension scheme is to reduce poverty provide adequate retirement income and insure against the risks of old age within given fiscal constraints and this will happen only if the scheme enjoys continuing political support at all levels To this end the author individuates those institutional characteristics of countries that increase the consistency of reforms and lower the likelihood of policy reversals in time Pension Reforms in Central Eastern and Southeastern Europe will be of interest to students and scholars of political science political economy social policy and economics *Social Policy and International Interventions in South East Europe* Bob Deacon, Paul Stubbs, 2007-01-01 Social Policy and International Interventions in South East Europe proves a comprehensive dense and thought provoking read particularly successful in framing both the historical and institutional contexts of the countries examined as well as literary debates on the subject and is thus a precious resource Irene Dioli Journal of Southeastern Europe The questions broached by the volume are of interest to all who are concerned with development and politics Experts will find the data and its presentation quite useful others will benefit from the background information presented in each chapter Social Policy and International Interventions in South East Europe is an excellent addition to the academic literature and will serve all those who are trying to keep pace with fluid developments in the transitional states of south east Europe Richard P Farkas Slavic Review This is a remarkably rich and thought provoking collection Its substantial case studies make it a vital resource for studying social policy in South East Europe Its focus on the flows of international actors agencies ideas and resources poses critical questions about how the emergence of social policy the emergence of new forms of governance and the creation of new spaces of welfare are connected The implications of this concern with emergent forms and directions reach far beyond the region itself John Clarke The Open University UK A brilliant book that shows conclusively that transnational actors have taken their place alongside states in setting social policy in Europe Through careful and comprehensive case studies of a wide range of South East European countries this volume systematically presents a wealth of new data on transnational actor interventions It helps to shape an emerging debate on the relative power of transnational and domestic actors and makes a unique empirical contribution to the discussion The authors have done an amazing job of coordinated digging and produced some impressive results Mitchell Orenstein Johns Hopkins University US This comprehensive and engaging book investigates the role of international actors in the making of social policy in South East Europe Introductory chapters on transnationalism and Europeanization are followed by a series of nine linked case studies depicting research undertaken within this region The book charts the variable influence that international actors such as formal organizations non governmental organizations

consulting companies and individual transnational policy entrepreneurs have on key policy issues including pensions social protection labour markets and health The authors conclude that welfare settlements are a complex product of historical and institutional legacies the neo liberal interventions of the World Bank the emerging impact of the EU and the crowded international arena resulting from war and post war reconstruction agendas Written by leading researchers in the field Social Policy and International Interventions in South East Europe will be of great interest to researchers and students of social policy policy studies and regional studies as well as policymakers within international and governmental organizations

Impavido,Esperanza Lasagabaster,Manuel Garc a-Huitr n,2010-06-04 Mandatory defined contribution pension markets are present in a growing number of countries around the world But despite their popularity policymakers continue to struggle with two key policy concerns On the one hand a number of design shortcomings encourages pension firms to charge high administrative fees On the other hand the global crisis that started in 2007 has reignited the debate on whether pension participants bear excessive investment risk Both are valid policy concerns as their incidence can imply higher than expected levels of poverty among old age individuals Both concerns have the same root problem the limited capacity of individuals to choose what is best for them This in turn stems from a combination of inadequate financial education bounded rationality and the use of simplistic rules of thumb that produce systematic biases in the decision making process of individuals While improving financial education is an obvious avenue to pursue this book is more concerned with design features that can exploit these systematic biases to protect consumers from themselves New Policies for Mandatory Defined Contribution Pensions Industrial Organization Models and Investment Products i discusses the main implications for the functioning of mandatory defined contribution pensions of consumers inability to make rational choices ii describes how jurisdictions have tried to address these problems through ad hoc policy interventions and iii proposes new policy directions in the areas of industrial organization models and investment products to address these concerns more effectively Written for practitioners and researchers around the world this book provides access to new thinking on mandatory defined contribution pension systems and it makes an important contribution to the on going policy debate on how to best structure mandatory defined contribution pillars *Reforming Pensions in Developing and Transition Countries* K.
