

# SOCIAL TRAP

In psychology, a social trap is a situation where individuals act in their own self-interest to the detriment of long-term interests.

## TYPE

- **Group traps:** occur when decisions beneficial to individuals or groups in the short-term do damage to the entire social group in the long-run.
- **Individual traps:** occur when you do something for short-term benefit that will have a long-term negative consequence for you personally.

## EXAMPLES

- Pollution as a byproduct of industry (group trap)
- Overfishing in the oceans (group trap)
- Lying with the knowledge the lie will eventually be uncovered (individual trap)
- Eating junk food knowing you'll gain weight eventually (individual trap)

## **Social Traps:**

Social Traps and the Problem of Trust Bo Rothstein, 2005-10-06 A social trap is a situation where individuals groups or organisations are unable to cooperate owing to mutual distrust and lack of social capital even where cooperation would benefit all Examples include civil strife pervasive corruption ethnic discrimination depletion of natural resources and misuse of social insurance systems Much has been written attempting to explain the problem but rather less material is available on how to escape it In this book Bo Rothstein explores how social capital and social trust are generated and what governments can do about it He argues that it is the existence of universal and impartial political institutions together with public policies which enhance social and economic equality that creates social capital By introducing the theory of collective memory into the discussion Rothstein makes an empirical and theoretical claim for how universal institutions can be established

**Literacy** David W. Orr, Professor of Environmental Studies and Politics Senior Advisor to the President David W Orr, 1992-01-01 The most important discoveries of the 20th century exist not in the realm of science medicine or technology but rather in the dawning awareness of the earth s limits and how those limits will affect human evolution Humanity has reached a crossroad where various ecological catastrophes meet what some call sustainable development While a great deal of attention has been given to what governments corporations utilities international agencies and private citizens can do to help in the transition to sustainability little thought has been given to what schools colleges and universities can do Ecological Literacy asks how the discovery of finiteness affects the content and substance of education Given the limits of the earth what should people know and how should they learn it *Advances in Environmental Psychology* A. Baum, J. E.

Singer, Jerome L. Singer, 2014-01-14 First published in 1982 It is not difficult to understand why interest in psychological aspects of energy production consumption and conservation has increased during the past decade The stresses of living or working near power plants the problems inherent in reducing fuel consumption and the many applications of behavioral science to these issues have all received attention of late This volume the third in a series is concerned with these issues the ways in which psychology can contribute to understanding and helping to solve what has generally been termed an energy crisis **Parent Traps** Donna G. Kim, 2025-10-16 How do we make the judgments that inform our lives Is there any way of consciously removing bias from the choices we make What do our everyday personal decisions have in common with those made by groups companies and even nations Nancy Kim presents a multidisciplinary introduction to the dynamic field of judgment and decision making This textbook delivers insights from cognitive psychology combined with findings from neuropsychology behavioural economics social psychology developmental psychology clinical psychology and philosophy to give a cohesive overview of the factors that contribute to how we make judgments and decisions Kim explains the neurological structures and cognitive processes that underlie how we make decisions and form judgments in our everyday lives She also explores the implications of these decisions upon an individual's prospects for health and longevity This new edition Incorporates the latest research on central issues in judgement and decision making Includes more coverage of cognitive neuroscience integrated throughout Includes a new chapter on emotional social and group decision making Comes with accompanying online resources including a test bank and additional exercises to further support teaching and learning This is an essential companion for students studying judgment and decision making as part of psychology cognitive neuroscience business or economics courses **Organizations and Unusual Routines** Ronald E. Rice, Stephen D. Cooper, 2010-10-07 Everyone working in and with organizations will from time to time experience frustrations and problems when trying to accomplish tasks that are a required part of their role This is an unusual routine a recurrent interaction pattern in which someone encounters a problem when trying to accomplish normal activities by following standard organizational procedures and then becomes enmeshed in wasteful and even harmful subroutines while trying to resolve the initial problem They are unusual because they are not intended or beneficial and because they are generally pervasive but individually infrequent They are routines because they become systematic as well as embedded in ordinary functions Using a wide range of case studies and interdisciplinary research this book provides researchers and practitioners with a new vocabulary for identifying understanding and dealing with this pervasive organizational phenomenon in order to improve worker and customer satisfaction as well as organizational performance An Introduction to Ecological Economics Robert Costanza, John H Cumberland, Herman Daly, Robert Goodland, Richard B Norgaard, Ida Kubiszewski, Carol Franco, 2014-12-02 From Empty World Economics to Full World Economics Ecological economics explores new ways of thinking about how we manage our lives and our planet to achieve a sustainable equitable and prosperous future Ecological economics extends and integrates the study and management of both nature's household and humankind's household An Introduction to **Addicted to Growth** Robert Costanza, 2022-12-29 This book takes a

compelling approach to describing what is needed to create the kind of future that most people on Earth really want Our global society is hopelessly addicted to a particular vision of the world and a future that has become both unsustainable and undesirable Addicted to Growth frames our current predicament as a societal addiction to a growth at all costs economic paradigm While economic growth has produced many benefits its side effects are now producing existential problems that are rapidly getting worse Robert Costanza considers lessons from what works at the individual level to overcome addictions and applies them to a societal scale Costanza recognises that the first step to recovery is recognising the addiction and that it is leading to disaster however simply pointing out the dire consequences of our societal addiction is only the first step and can be counterproductive by itself in motivating change The key next step is creating a truly shared vision of the kind of world we all want and the book explores creative ways to implement this societal therapy The final step is using that shared vision to motivate the changes needed to achieve it including adaptive transformations of our economic systems property rights regimes and governance institutions An exciting contribution from a key thinker in the field this book will be a valuable resource to students and scholars of public policy and sustainability studies and anyone interested in understanding and overcoming our societal addiction to growth
