Social Work Practice People And Environments:

Social Work Practice Caryl B. Germain, 1979 *Social Work Practice People and Environments* advances a theory that embraces every aspect of the field that the psychosocial distress social workers must alleviate can most usefully be seen as an inharmonious fit between the individual or group and the physical and social environments This ecological viewpoint is gaining wide acceptance not only in social work but also in the academic disciplines and in the human service professions of psychiatry nursing education and psychology As a comprehensive guide to the ecological viewpoint *Social Work Practice* can serve as a basic text for graduate and undergraduate courses in social work practice Caryl B Germain and the fourteen contributors to this volume contend that social work practice comprises two complementary functions These are to help clients develop their capacities for growth and adaptation and to help them reshape their environment for a better fit with their needs and aspirations Fourteen case studies illustrate the application of the ecological view in health mental health and child welfare settings and in work with families the aged and delinquent youth

Social Work Practice Bloomsbury Publishing, 1996-03-30 Pardeck demonstrates that the ecological approach to social work practice stresses effective intervention and that effective intervention occurs through not only working with individuals but also with the familial social and cultural factors that impact their social functioning The power of the ecological approach through focusing on multiple factors for assessment and intervention is that it integrates empirically based theories from various fields including social work psychology sociology and anthropology Pardeck provides an orientation to the role of social work practitioners within the human services He differentiates the unique contributions of social work and explains them in terms of the needs and goals of an ecological approach to practice An ecological approach to practice stresses that effective social work intervention occurs through not only working with individuals but also with the familial social and cultural factors that impact their social functioning The power of the ecological approach through focusing on multiple factors for assessment and intervention is that it integrates empirically based theories from various fields including social work psychology and anthropology The book represents an effort to define the goals commitments and approaches that have emerged out of the history of social work and to relate them to similar concepts and values that are central to an ecological approach to practice Three pervasive and unifying themes run through the book One is the constant commitment to goals of facilitating human development Pardeck suggests this is a central ethic that defines and distinguishes an ecological approach to social work practice The second theme is an affirmation of the basic utility of a systems approach in conceptualizing and intervening in human needs concerns and problems The ecological perspective views human beings as social organisms engaged in patterns of relationships that nurture or inhibit this basic humanity The third theme is an interactionist view of the importance of person environment fit as a central dynamic in human functioning The traditional intra psychic aspects of human behavior have tended to obscure the immense importance of both nurturing and potentially damaging forces at work in the social

environment This volume will be of considerable interest to social work educators and practitioners as well as their research libraries *Social Work Practice, 1965*, 1965 **Social Work and the Environment** Michael Kim Zapf, 2009 This groundbreaking new work provides a detailed and extensive comparison of how the physical environment has been conceptualized in social work and other professions and offers a new and attractive foundational metaphor for social work The author acknowledges the need for greater awareness and action regarding environmental impacts and the book promotes more comprehensive notions of responsibility identity and stewardship that lead to a dynamic metaphor of people as place as the foundation for relevant social work practice in the early 21st century Why is that a profession with a declared focus on person in environment has been so silent on the environmental crisis Mainstream social work theory has narrowed the understanding of environment to include merely the social environment but this approach is no longer sufficient for participation in multi disciplinary efforts to tackle urgent environmental issues Transformative notions of responsibility identity and stewardship have been developed on the fringes of our professional community rural remote social workers Aboriginal social workers and international and spiritual social workers They must now move to the core of the profession

Environmental Justice as Social Work Practice Christina L. Erickson, 2018-05-30 Environmental Justice as Social Work Practice places the natural environment as central to practice Utilizing the Phases of Practice and micro to macro levels of practice the book integrates neatly into a college semester course Chapters cover important components of social work such as theory ethics conceptual foundations as well as distinct chapters on micro mezzo and macro practice Each chapter expands the discipline's commitment to and applied efforts in the environmental movement while recognizing the unique contributions social work has to offer to ameliorate environmental inequities Chapters include real world stories from environmental social work practitioners case studies and boxed sections highlighting organizations and people who bridge the human and natural justice divide Each chapter concludes with learning activities and critical thinking questions providing learning activities that map easily to a course syllabus A matrix identifying the placement of educational competencies from the Council on Social Work Education is included The textbook provides a framework for social work educators to bravely and competently teach environmental social work as a stand alone college course or to incorporate into a traditional practice course
