examination draws on original documents from local agricultural collectives newly accessible government archives and his own fieldwork in Qin village of Jiangsu province to highlight the continuities in rural transformation. Firmly disagreeing with those who claim that recent developments in rural China represent a radical break with pre-reform sociopolitical practices and patterns of production, Li instead draws a clear history connecting the current situation to ecological, social, and institutional changes that have persisted from the collective era.

Going to the Countryside Yu Zhang, 2020-03-03 Since the beginning of the twentieth century, modern Chinese intellectuals, reformers, revolutionaries, leftist journalists, and idealistic youth had often crossed the increasing gap between the city and the countryside, which made the act of going to the countryside a distinctively modern experience and a continuous practice in China. Such a spatial crossing eventually culminated in the socialist state program of down to the villages movements during the 1960s and 1970s. What then was the special significance of going to the countryside before that era? *Going to the Countryside* deals with the cultural representations and practices of this practice between 1915 and 1965, focusing on individual, homecoming, rural reconstruction, revolutionary journeys to Yan'an, the revolutionary going down to the people, as well as going to the frontiers and rural hometowns for socialist construction. As part of the larger discourses of enlightenment, revolution, and socialist industrialization, going to the countryside entailed new ways of looking at the world and ordinary people brought about new experiences of space and time, initiated new means of human communication and interaction, generated new forms of cultural production, revealed a fundamental epistemic shift in modern China, and ultimately created a new aesthetic, social, and political landscape. As a critical response to the urban turn in the past few decades, this book brings the rural back to the central concern of Chinese cultural studies and aims to bridge the city and the countryside as two types of important geographical entities which have often remained as disparate scholarly subjects of inquiry in the current state of China studies. Chinese modernity has been characterized by a dual process that created problems from the vast gap between the city and the countryside but simultaneously initiated constant efforts to cope with the gap personally, collectively, and institutionally. The process of crossing two distinct geographical spaces was often presented as continuous explorations of various ways of establishing the connectivity, interaction, and relationship of these two imagined geographical entities. *Going to the Countryside* argues that this new body of cultural productions did not merely turn the rural into a constantly changing representational space; most importantly, the rural has been constructed as a distinct modern experiential and aesthetic realm characterized by revolutionary changes in human conceptions and sentiments.

The Distribution of Wealth in Rural China Terry McKinley, 2016-09-16 Based on an analysis of a 1988 nationwide sample survey of 10,258 households, this book aims to offer insights into issues of rural inequality in China. The work focuses on the study of wealth rather than income as the primary measure.

Rural Roots of Reform Before China's Conservative Change Lynn T. White III, 2018-05-24 China's economic and military rise dominates discussions of the world's most populous country. Resilient authoritarian government is

credited with great successes but this book expands the discourse to include governance by village heads who often ignored central politicians Chinese reforms for prosperity started circa 1970 under rural and suburban leaders They could act autonomously then because of unexpected political and technological opportunities Their localization of power eroded socialist controls Since 1990 central leaders have tried to reverse reforms made by resilient local bosses New findings especially from the Yangzi delta around Shanghai challenge the top down approach to thinking about governance As Deng Xiaoping admitted the nation's spurt of prosperity began in local communities rather than Beijing Reforms for triple cropping and rural industrialization started long before Mao's death not in 1978 the date most writers cite Country factories competed with state industries for materials and markets Shortages by the 1980s led to inflation government deficits unofficial credit unenforceable planning illegal migrations then international exports and severe political tensions After 1990 Party leaders sought policies to build a Leninist regime that is mostly post socialist These reactionary changes have lasted into the era of Xi Jinping China's reforms and subsequent changes can be understood as results of unintended situations not just ideas and local not just central politics This book will interest students and scholars of Chinese as well as any readers who wonder about comparative development

China After Socialism Barrett L. McCormick, Jonathan Unger, 2017-07-05 As part of the series Socialism and Social Movements this volume explores the conditions and prospects of China moving toward a type of developmental state The lessons of economic and political reform in Eastern Europe are discussed in relation to the overall topic

The Struggle Between the Two Roads in China's Countryside, 1968 *Surging Tide of Socialism in China's Countryside*, 1956 *Going to the Countryside* Yu Zhang, 2020-03-03 Since the beginning of the twentieth century modern Chinese intellectuals reformers revolutionaries leftist journalists and idealistic youth had often crossed the increasing gap between the city and the countryside which made the act of going to the countryside a distinctively modern experience and a continuous practice in China Such a spatial crossing eventually culminated in the socialist state program of down to the villages movements during the 1960s and 1970s What then was the special significance of going to the countryside before that era Going to the Countryside deals with the cultural representations and practices of this practice between 1915 and 1965 focusing on individual homecoming rural reconstruction revolutionary journeys to Yan'an the revolutionary going down to the people as well as going to the frontiers and rural hometowns for socialist construction As part of the larger discourses of enlightenment revolution and socialist industrialization going to the countryside entailed new ways of looking at the world and ordinary people brought about new experiences of space and time initiated new means of human communication and interaction generated new forms of cultural production revealed a fundamental epistemic shift in modern China and ultimately created a new aesthetic social and political landscape As a critical response to the urban turn in the past few decades this book brings the rural back to the central concern of Chinese cultural studies and aims to bridge the city and the countryside as two types of important geographical entities which have often remained as disparate scholarly subjects of
