cultural institutions that the hippies challenged or abandoned mainly prevailed Yet the nonviolent egalitarian hippie principles led an era of civic protest that brought an end to the Vietnam War Their enduring impact was the creation of a 1960s frame of reference among millions of baby boomers whose attitudes and aspirations continue to reflect the hip ethos of their youth

Easternization of the West Colin Campbell,2015-11-17 In this provocative and groundbreaking book Colin Campbell shows that the civilization of the West is undergoing a revolutionary process of change one in which features that have characterized the West for two thousand years are in the process of being marginalized to be replaced by those more often associated with the civilizations of the East Moving far beyond popular trends Campbell assembles a powerful range of evidence to show how Easternization has been building throughout the last century especially since the 1960s Campbell demonstrates how it was largely in the 1960s that new interpretations in theology political thought and science were widely adopted by a new generation of young culture carriers This highly original and wide ranging book advances a thesis that will be of interest to scholars in many disciplines in the humanities and social sciences

Theorising Religion John Walliss,2017-10-24 Religion is controversial and challenging Whilst religious forces are powerful in numerous societies they have little or no significance for wide swaths of public or private life in other places The task of theoretical work in the sociology of religion is therefore to make sense of this apparently paradoxical situation in which religion is simultaneously significant and insignificant The chapters of Part One consider the classical roots of ideas about religion that dominated sociological ways of thinking about it for most of the twentieth century Each chapter offers sound reasons for continuing to find theoretical inspiration and challenge in the sociological classics whilst also seeking ways of enhancing and extending their relevance to religion today Part Two contains chapters that open up fresh perspectives on aspects of modern post modern and ultra modern religion without necessarily ignoring the classical legacy The chapters of Part Three chart new directions for the sociological analysis of religion by fundamentally re thinking its theoretical basis by extending its disciplinary boundaries and by examining previously overlooked topics

Disability Protests Sharon N. Barnartt,Richard K. Scotch,2001 In 1952 the Federal Republic of West Germany concluded a treaty with Israel whereby the Germans had to pay three billion Deutschmarks in compensation for the Holocaust However the Israelis felt that Germany owed Israel a moral as well as a financial debt and thus expected further aid and protection Although Germany made several concessions in favour of the Jewish State particularly in the domain of armament as Germany s political status increased its national interest gradually took priority over that of Israel George Lavy examines the grounds which motivated Germany to grant aid to Israel and the change in their relations as the German economy flourished and gained influence in world affairs

The Countercultural Logic of Neoliberalism David Hancock,2019-01-10 Why since the financial crisis of 2008 has neoliberal capitalism remained seemingly impregnable Why when it is shown as no longer capable of delivering on its economic promises does its logic pervade all facets of contemporary life How has it seduced us This book examines the seductive

appeal of neoliberalism by understanding it as a fundamentally counter cultural logic Unlike earlier modes of capitalism neoliberalism is infused by spirit of rebellion and self creation with the idealised neoliberal subject overturning traditional morality whilst creating new modes of being based on risk and excess Tracing the development of the logic of neoliberalism from its beginnings in the thought of Friedrich Hayek in the wake of the post war period through the work of neoconservative writers overcoming and moving beyond what they perceived as the nihilism of both the counter culture and capitalism of the 1960s and 70s to its establishment as a new moral order underpinning the economic system from the 1980s onwards the author argues that it is only through a clear understanding of the seduction of neoliberalism that it can be overcome by reimagining our relationships to work and society

Decolonization as World Counterculture Sandra Holtgreve, 2025-10-28

Decolonization as World Counterculture captures the underlying conditions of the rise of post and decolonial theories by asking how we arrived at this moment when decolonial arguments seem to be everywhere and yet not enough While efforts to decolonize knowledge and disciplines continue to expand this book takes a different theory reflecting approach It examines instead how decolonization itself has become a global although unequally addressed phenomenon Bringing together world culture research with postcolonial studies in the field of social work the book analyzes social work curricula from Germany Mexico and Ecuador to explore how de coloniality is embedded in diverging horizons of meanings but shaped by strikingly similar institutions in the educational setting To this end the book offers a knowledge sociological view on how decolonization itself is globalized It mobilizes the neo institutional approach of world culture to describe the decolonial imperative as world counterculture an integrative frame of otherwise different and diverging social justice agendas In this way taking the theoretical premises of decolonization seriously the book examines the promises and limitations of connecting decolonization with Western theories of globalization Assembling these distinct pieces of a puzzle spanning different fields this book is a testimony to the most successful and thriving theoretical views of the last decades in the human and social sciences It is sure to challenge fascinate and inspire readers across the specialist fields of postcolonial studies the sociology of knowledge global social theory and international social work
