Davis, Prem Phyak, 2016-12-08 Engaged Language Policy and Practices re envisions language policy and planning as an engaged approach drawing on and portraying theoretical and educational equity perspectives It calls for the right to language policy making in which all concerned communities parents students educators and advocates collectively imagine new strategies for resisting global neoliberal marginalization of home languages and cultural identities This book subsequently emphasizes the means by which engaged dialectic processes can inform and clarify language policy making decisions that promote equity In other words rather than descriptions of outcomes the authors emphasize the need to detail the means by which local regional actors resist and transform inequitable policies These descriptions of processes thereby provide all actors with ideological pedagogical and equity policy tools that can inform situated school and community policy making This book depicts ways in which engaged language policy embodies the intersection of critical inquiry participant involvement and ongoing engaged language planning processes It further offers an alternative to the traditional top down approach to language education policy making Engaged Language Policy and Practices is essential reading for scholars teachers students communities and others concerned with worldwide language and identity equity *Theories and Methods* Peter Auer, Jürgen Erich Schmidt, 2009-12-22 The dimensions of time and space fundamentally cause and shape the variability of all human language To reduce investigation of this insight to manageable proportions researchers have traditionally concentrated on the deepest dialects But it is increasingly apparent that although most people still speak with a distinct regional coloring the new mobility of speakers in recently industrialized and postindustrial societies and the efflorescence of communication technologies cannot be ignored This has given rise to a reconsideration of the relationship between geographical place and cultural space and the fundamental link between language and a spatially bounded territory Language and Space An International Handbook of Linguistic Variation seeks to take full account of these developments in a comprehensive theoretically rich way The introductory volume examines the concept of space and linguistic approaches to it the structure and dynamics of language spaces and relevant research methods A second volume offers the first thorough exploration of the interplay between linguistic investigation and cartography and subsequent volumes uniformly document the state of research into the spatial dimension of particular language groupings Key features comprehensive coverage of the field in terms of theory and methods the unique volume stands alone since it neither is a handbook of dialectology or of areal linguistics nor a handbook on language variation alone gathers together a great number of distinguished scholars and experts in the field **Choreographies of Multilingualism** Tong-King Lee, 2022 Singapore boasts a complex mix of languages and is therefore a rich site for the study of multilingualism and multilingual society In particular writing is a key medium in the production of the nation s multilingual order one that is often used to organize language relations for public

consumption In *Choreographies of Multilingualism* Tong King Lee examines the linguistic landscape of written language in Singapore from street signage and advertisements to institutional anthologies and text based memorabilia to language primers and social media based poetry to reveal the underpinning language ideologies and how those ideologies figure in political tensions The book analyzes the competing official and grassroots narratives around multilingualism and takes a nuanced approach to discuss the marginalization celebration or appropriation of Singlish Bringing together theoretical perspectives from sociolinguistics multimodal semiotics translation and cultural studies Lee demonstrates that multilingualism in Singapore is an emergent and evolving construct through which identities and ideologies are negotiated and articulated Broad ranging and cross disciplinary this book offers a significant contribution to our understanding of language in Singapore and more broadly to our understanding of multilingualism and the sociolinguistics of writing

Reimagining Rapport Zane Goebel, 2021 To do ethnography a researcher must have rapport with research subjects But what is rapport Ethnography and ethnographic methods have increasingly become a feature of social inquiry in general and sociolinguistics in particular and rapport is generally considered a prerequisite for fieldwork And yet unlike related terms such as communication and phatic communion this concept has remained largely unexamined *Reimagining Rapport* turns a critical eye to the use of the term rapport across disciplines The collection analyzes the very idea of rapport both exploring how it has been shaped by historical forces and actors within sociocultural anthropology and questioning its usefulness Rather than viewing the term as simply denoting a type of positive social relationship that needs to be formed between researcher and consultant before research can begin this book invites us to reimagine rapport theoretically methodologically and meta methodologically Zane Goebel and other leading sociolinguists challenge readers to think about how rapport has been constructed within these disciplines and ultimately to see rapport as an emergent co constructed social relationship that is actively built during situated multimodal encounters The contributors collectively examine the role of ideology and mediation in the construction of rapport and argue that reconceptualizing research subject relationships is essential for establishing more sophisticated ways of understanding interpreting and representing research context A valuable resource for scholars and students of sociolinguistics and linguistic anthropology as well as for others engaged in ethnographic fieldwork *Reimagining Rapport* is the first collection to provide an in depth investigation of this critically important but previously unexamined concept

In Pursuit of English Joseph Sung-Yul Park, 2021-08-13 Tracing how anxieties insecurities and moral desire about English instilled through South Korea's neoliberal transformation led to the country's heated pursuit of English in the 1990s and 2000s this book presents subjectivity as a theoretical and analytical perspective for studying the intersection of language and political economy

Intertextuality 2.0 Cynthia Gordon, 2023 Intertextuality is the overarching idea that all texts and conversations are linked to other texts and conversations and that people create and infer meanings in discourse through making and interpreting these links Intertextuality is fundamentally connected to

metadiscourse when a person draws on or references one text or conversation in another intertextuality they necessarily communicate something about that text or conversation metadiscourse While scholars have long recognized the interrelatedness of these two theoretical concepts existing studies have tended to focus on one or the other leaving underexplored the specific ways in which these phenomena are intertwined at the micro interactional level especially online and for what purposes This interactional sociolinguistic study contributes to filling this gap by demonstrating how specific intertextual linking strategies both linguistic e g word repetition deictic pronouns and multimodal e g emojis symbols and GIFs are mobilized by posters participating in online weight loss discussion boards These strategies serve as a resource to accomplish the metadiscursive activities targeted at various levels of discourse through which participants construct shared understandings negotiate the group s interactional norms and facilitate engagement in the group s primary shared activity exchanging information about and providing support for weight loss healthful eating and related issues By rigorously applying the perspective of metadiscourse in a study of intertextuality Intertextuality 2 0 offers important new insights into why intertextuality occurs and what it accomplishes it helps people manage the challenges of communication

Talk that Counts Ronald K. S. Macaulay, 2005-01-13 *Talk That Counts* is a sociolinguistic study of variation in discourse employing quantitative methods to explore age gender and social class differences in the use of features such as you know I mean adverbs and pronouns Unlike many studies of discourse variation that focus on a single social factor *Talk That Counts* examines age gender and social class differences in a gender balanced sample of middle class and working class adolescents

and adults recorded under the same conditions Differences between adults and adolescents provided the greatest number of statistically significant results followed by differences between males and females The smallest number of statistically significant differences were related to social class The range of variation underlines the need to look at more than a single extra linguistic variable when examining discourse It also shows the dangers of generalizing about social class for example on the basis of a limited sample e g adolescent boys In *Talk That Counts* distinguished sociolinguist Ronald Macaulay presents an important new approach to the sociolinguistic investigation of discourse variation *Socio-syntax* Emma Moore, 2023-11-02 Challenging traditional assumptions about grammar this book shows how language variation takes on social meaning in everyday interaction Drawing on an ethnolinguistic study of working class high school girls along with the author's own experience it is essential reading for scholars and students in sociolinguistics and educational linguistics

Handbook of Language and Mobility Alfonso Del Percio, 2025-07-21 The *Handbook of Language and Mobility* challenges the assumption that mobility is a new norm It maps new developments in language and mobility scholarship tracing how the mobility of language people and knowledge intersects with multiplicity infrastructures historicity new political formations and processes of world making By decentering mobility this handbook questions which processes come to be recognized as mobile and how mobility is historically shaped regulated valued and stigmatized By recentering mobility it explores its productive dimensions how it sustains and aligns with celebratory ideologies of globalization technology and agency creates value and contributes to the management and legitimation of difference and inequality Mobility here is not just about movement it shapes time space subjectivities power and systems of accumulation
