Bakhtin and the Human Sciences Michael Bell, Michael E Gardiner, 1998-08-28 Bakhtin and the Human Sciences demonstrates the abundance of ideas Bakhtin's thought offers to the human sciences and reconsiders him as a social thinker not just a literary theorist. The contributors hail from many disciplines and their essays' implications extend into other fields in the human sciences. The volume emphasizes Bakhtin's work on dialogue, carnival, ethics and everyday life as well as the relationship between Bakhtin's ideas and those of other important social theorists. In a lively introduction Gardiner and Bell discuss Bakhtin's significance as a major intellectual figure and situate his ideas within current trends and developments in social theory.

The Research Game In Academic Life Lucas, Lisa, 2006-10-01 What are the implications of an increasingly competitive global system of higher education research? In what ways have policy changes to the evaluation and funding of university research impacted on higher education institutions in the UK and in other countries? How do institutional and departmental managers and individual academics organise and manage research to best maximise the gains of being successful in research? *The Research Game in Academic Life* turns a spotlight on the importance of research in determining the reputation and success of universities and the academics who work within them. It provides an overview of the changing policies of funding and evaluating university research during the last twenty years and analyses how this has impacted on the status and hierarchical positioning of universities in the United Kingdom. Comparisons of research policies in other national systems of higher education are also made with examples from Hong Kong, the Netherlands and Australia. Empirical data is drawn from qualitative case studies of two UK universities and focuses on the way in which the management and organisation of research within these institutions has responded to the demands of economic and accountability pressures and successive rounds of the Research Assessment Exercise. More particularly the book reflects the human stories and accounts from the individuals who serve to maintain the important research and teaching work of these institutions. *The Research Game in Academic Life* offers a thoughtful analysis and will make essential reading for researchers, department leaders, policy makers and managers in higher education.

The Partnership Model in Human Services Rosalyn Benjamin Darling, 2005-12-11 This book provides students and practitioners with a theoretical and methodological foundation for implementing client and family centered partnership approaches in human services. Unlike other texts in the field the author integrates the principles and practices of sociology with applied work in the helping professions and shows how key sociological concepts can be used to explain the nature of clients' perspectives and expand client opportunities.
