Source Book in Bioethics Albert R. Jonsen, Robert M. Veatch, LeRoy Walters, 1999-09-07 Government agencies and commissions courts and legislatures have during the past several decades produced reports rendered decisions and passed laws that have both defined the fundamental issues in the field of bioethics and established ways of managing them in our society Providing a history of these key bioethical decisions this Source Book in Bioethics is the first and only comprehensive collection of the critical public documents in biomedical ethics including many hard to find or out of print materials Covering the period from 1947 to 1995 this volume brings together core legislative documents court briefs and reports by professional organizations public bodies and governments around the world Sections on human experimentation care of the terminally ill genetics human reproduction and emerging areas in bioethics include such pivotal works as The Nuremberg Code The Tuskegee Report and In the Matter of Baby M as well less readily available documents as The Declaration of Inuyama the Council for International Organizations of Medical Sciences statement on genetic engineering and The Warnock Committee Report on reproductive technologies from the United Kingdom Three eminent scholars in the field provide brief introductions to each document explaining the significance of these classic sources This historical volume will be a standard text for courses in bioethics health policy and death and dying and a primary reference for anyone interested in this increasingly relevant field The new genetics and the future of man Michael Hamilton (ed), America and the Future of Man ,1973

In the Name of Eugenics Daniel J. Kevles, 2013-05-08 Daniel Kevles traces the study and practice of eugenics the science of improving the human species by exploiting theories of heredity from its inception in the late nineteenth century to its most recent manifestation within the field of genetic engineering It is rich in narrative anecdote attention to human detail and stories of competition among scientists who have dominated the field America and the Future of Man Jane L. Scheiber, 1973 The Human Gene Editing Debate John Hyde Evans, 2020 For decades the debate on human gene editing has identified and agreed upon certain limits that draw the line between ethical and unethical territory for example applications for diseases are accepted but not for enhancements However society keeps pushing the limits as seen with the advent of CRISPR technology and the birth of the first genetically modified babies in China John H Evans rethinks how we discuss and debate these collective limits which have long been characterized as a slippery slope He examines past present and future arguments and argues which limits can hold and which cannot before we reach the dystopian bottom Future Perfect? Celia Deane-Drummond, Peter Manley Scott, 2010-02-02 **Genetic Medicine** Barton Childs, 2003-09-15 In Genetic Medicine A Logic of Disease Barton Childs demonstrates that knowledge of the ways both genes and environment contribute

to disease provides a rational basis for medical thinking This genetic medicine he explains should help the physician use the results of laboratory tests to perceive the uniqueness of the patient as well as that of the family and the cultural conditions in which the patient s condition arose Childs thus provides a conceptual framework within which to teach and practice a humane medicine
