Kemp, 2020-05-29 One of the prevailing myths of modern intellectual and cultural history is that there has been a long running war between science and religion particularly over evolution This book argues that what is mistaken as a war between science and religion is actually a pair of wars between other belligerents one between evolutionists and anti evolutionists and another between atheists and Christians In neither of those wars can one align science with one side and religion or theology with the other This book includes a review of the encounter of Christian theology with the pre Darwinian rise of historical geology an account of the origins of the warfare myth and a careful discussion of the salient historical events on which the myth makers rely the Huxley Wilberforce exchange the Scopes Trial and the larger anti evolutionist campaign in which it was embedded and the more recent curriculum wars precipitated by the proponents of Creation Science and of Intelligent Design Theory
