The Mythomanias The Nature Of Deception And Self Deception:

The Mythomanias Michael Myslobodsky, 1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company

The Mythomanias Michael S. Myslobodsky, 2013-06-17 Recently there has been a renewal of interest in the broad and loosely bounded range of phenomena called deception and self deception This volume addresses this interest shared by philosophers social and clinical psychologists and more recently neuroscientists and cognitive scientists Expert contributors provide timely reliable and insightful coverage of the normal range of errors in perception memory and behavior They place these phenomena on a continuum with various syndromes and neuropsychiatric diseases where falsehood in perception self perception cognition and behaviors are a peculiar sign Leading authorities examine the various forms of mythomania deception and self deception ranging from the mundane to the bizarre such as imposture confabulations minimization of symptomatology denial and anosognosia Although the many diverse phenomena discussed here share a family resemblance they are unlikely to have a common neurological machinery In order to reach an explanation for these phenomena a reliable pattern of lawful behavior must be delineated It would then be possible to develop reasonable explanations based upon the underlying neurobiological processes that give rise to deficiencies designated as the mythomanias The chapters herein begin to provide an outline of such a development Taken as a whole the collection is consistent with the emerging gospel indicating that neither the machinery of nature nor the forces of nurture taken alone are capable of explaining what makes cognition and behaviors aberrant

Self-Deception Unmasked Alfred R. Mele, 2001 Self deception raises complex questions about the nature of belief and the structure of the human mind In this book Alfred Mele addresses four of the most critical of these questions What is it to deceive oneself How do we deceive ourselves Why do we deceive ourselves Is self deception really possible Drawing on cutting edge empirical research on everyday reasoning and biases Mele takes issue with commonplace attempts to equate the processes of self deception with those of stereotypical interpersonal deception Such attempts he demonstrates are fundamentally misguided particularly in the assumption that self deception is intentional In their place Mele proposes a compelling empirically informed account of the motivational causes of biased beliefs At the heart of this theory is an appreciation of how emotion and motivation may without our knowing it bias our assessment of evidence for beliefs Highlighting motivation and emotion Mele develops a pair of approaches for explaining the two forms of self deception the straight form in which we believe what we want to be true and the twisted form in which we believe what we wish to be false Underlying Mele s work is an abiding interest in understanding and explaining the behavior of real human beings The result is a comprehensive elegant empirically grounded theory of everyday self deception that should engage philosophers and social scientists alike

Hidden Resources Dan Zahavi, 2004 To what extent can the current discussion of consciousness in mainstream cognitive science and analytical philosophy of mind profit from insights drawn from the investigations of subjectivity found in the Kantian and post Kantian tradition Kant

Schleiermacher Kierkegaard as well as in the phenomenological and hermeneutical tradition

Encyclopedia of Deception Timothy R. Levine, 2014-02-20 The Encyclopedia of Deception examines lying from multiple perspectives drawn from the disciplines of social psychology sociology history business political science cultural anthropology moral philosophy theology law family studies evolutionary biology philosophy and more From the little white lie to lying on a resume to the grandiose lies of presidents this two volume reference explores the phenomenon of lying in a multidisciplinary context to elucidate this common aspect of our daily lives Not only a cultural phenomenon historically lying is a frequent occurrence in our everyday lives Research shows that we are likely to lie or intentionally deceive others several times a day or in one out of every four conversations that lasts more than 10 minutes Key Features More than 360 authored by key figures in the field are organized A to Z in two volumes which are available in both print and electronic formats Entries are written in a clear and accessible style that invites readers to explore and reflect on the use of lying and self deception Each article concludes with cross references to related entries and further readings This academic multi author reference work will serve as a general non technical resource for students and researchers within social and behavioral science programs who seek to better understand the historical role of lying and how it is employed in modern society

Confabulation William Hirstein, 2009 When people confabulate they make an ill grounded claim that they honestly believe is true for example recalling an event from their childhood that never actually happened This interdisciplinary book brings together some of the leading thinkers on confabulation in neuroscience psychiatry psychology philosophy

Problems of Living Dan J. Stein, 2021-05-11 Problems of Living Perspectives from Philosophy Psychiatry and Cognitive Affective Science addresses philosophical questions related to problems of living including questions about the nature of the brain mind reason and emotion happiness and suffering goodness and truth and the meaning of life It draws on critical pragmatic and embodied realism as well as moral naturalism and brings arguments from metaphysics epistemology and ethics together with data from cognitive affective science This multidisciplinary integrated approach provides a novel framework for considering not only the nature of mental disorders but also broader issues in mental health such as finding pleasure and purpose in life Draws on the strongest aspects of polar positions in philosophy and psychiatry to help resolve important perennial debates in these fields Explores continuities between early philosophical work and current cognitive affective sciences including neuroscience and psychology Employs findings from modern cognitive affective science to rethink key long standing debates in philosophy and psychiatry Builds on work showing how mind is embodied in the brain and embedded in society to provide an integrated conceptual framework Assesses both the insights and the limitations of cognitive affective science for addressing the big questions and hard problems of living

Flourishing in Tensions Michael Bräutigam, 2022-09-09 Following Jesus Christ presents unique challenges to disciples today In our current climate of relativism materialism and consumerism Christians are increasingly perplexed as to who they are and what following after Christ means today Drawing on the Protestant tradition in particular

Dietrich Bonhoeffer Martin Luther and Adolf Schlatter and findings from psychology this book offers a fresh integrative interpretation of Jesus's radical call into discipleship This call is interpreted through a christological lens as Jesus Christ in his role as Prophet calls us to self denial in his role as Priest invites us to cross bearing and as King demands us to follow him Jesus's call to discipleship challenges disciples to embrace various tensions by faith and to grow and even flourish in and through them By denying themselves they find their true self by taking up their cross they find real life and by following Christ they find the great friend and befriend the world as the community of disciples This book is for Christians who seek to mature in intentional self reflection and discover practical ways of living out Christ's radical call into discipleship today

Delusion and Self-Deception Tim Bayne, Jordi Fernández, 2010-10-18 This volume is an interdisciplinary examination of the relationship between delusions and self deception bringing recent work on motivated reasoning to bear on the problems posed by these forms of pathological belief The volume will appeal to cognitive scientists clinicians and philosophers

interested in the nature of belief and the disturbances to which it is subject **Why Everyone (Else) Is a Hypocrite** Robert Kurzban, 2012-05-27 The evolutionary psychology behind human inconsistency We're all hypocrites Why Hypocrisy is the natural state of the human mind Robert Kurzban shows us that the key to understanding our behavioral inconsistencies lies in understanding the mind's design The human mind consists of many specialized units designed by the process of evolution by natural selection While these modules sometimes work together seamlessly they don't always resulting in impossibly contradictory beliefs vacillations between patience and impulsiveness violations of our supposed moral principles and overinflated views of ourselves This modular evolutionary psychological view of the mind undermines deeply held intuitions about ourselves as well as a range of scientific theories that require a self with consistent beliefs and preferences Modularity suggests that there is no I Instead each of us is a contentious we a collection of discrete but interacting systems whose constant conflicts shape our interactions with one another and our experience of the world In clear language full of wit and rich in examples Kurzban explains the roots and implications of our inconsistent minds and why it is perfectly natural to believe that everyone else is a hypocrite
