Post-Modern and the Post-Industrial Margaret A. Rose,1991-06-28 The first book to provide a critical survey of the many different uses made of the term post modern across a number of different disciplines *A Philosophical Journey into the Anthropocene* Agostino Cera,2023-01-09 A Philosophical Journey into the Anthropocene Discovering Terra Incognita presents the Anthropocene not only as a geological epoch but rather as the potential mar cit of our age and the most faithful expression of the current zeitgeist Insofar as the Anthropocene establishes that the human agency as technological omni power represents a global geophysical force capable of altering the destiny of the Earth system the coming of this new epoch shows that technology now embodies the subject of both history and nature In this totalized form technology achieves the status of an integral epochal phenomenon the new environment for human life Agostino Cera argues that the technisches Zeitalter age of technology outlined by twentieth century philosophical thought is fully realized in the Anthropocene and that a more appropriate name for this planetary framework is therefore Technocene The book develops along four basic directions epistemological ontological anthropological and ethical It argues that the Anthropocene is something radically new a terra incognita or an epistemic hyperobject with a geo historical barycenter giving rise to an unprecedented form of reification of nature pet ification of nature an unexpected version of anthropocentrism Aidosean Prometheanism and an unpredictable ethical paradox paradox of omni responsibility Methodological Imaginations Joan Busfield,E. Stina Lyon,1996-04-01 This book brings together a collection of essays which look creatively and imaginatively at issues of research methods and methodology in sociology Some papers critically revisit and redefine techniques such as the classic community study the use of diaries photography and art others examine the need for reflexivity in the research process and the epistemological issues arising from being a researcher in administrative and political contexts The diversity of research approaches discussed in this reader should make it an important contribution to research methods teaching for undergraduate and graduate students of sociology Design: Mind the Gap scott trent,2015-10-29 PLEASE NOTE THE FIRST 70 REVIEWS WERE PAID FOR BY THE AUTHOR AS AN EXPERIMENT TO TEST REPUTATION MGMT AND DRIVING TRAFFIC TO THE BOOK SUBJECT This is Design Thinking Similar to a man with no country Design with a capital D has no home yet design is a part of many many disciplines Big D design is a process between disciplines It is a practice embraced by all fields but founded in its own process It is the space between thoughts and the actions that dictate the next act Design thinking is a perspective an approach an art and a life style It dictates how the world is viewed and provides a tool to address issues beyond the current comprehension To understand design thinking you must navigate the space between disciplines ideas and conventions To practice Design Thinking you must mind the gap This book explores Design Design Thinking

creativity and innovation *From Counterculture to Cyberculture* Fred Turner, 2024-05-31 In this unique provocative work of cultural history Turner teases apart the visions myths and rhetoric that have swept us into cyberspace Booklist starred review In the early 1960s computers haunted the American popular imagination Bleak tools of the cold war they embodied the rigid organization and mechanical conformity that made the military industrial complex possible But by the 1990s and the dawn of the Internet computers started to represent a very different kind of world a collaborative and digital utopia modeled on the communal ideals of the hippies who so vehemently rebelled against the cold war establishment in the first place *From Counterculture to Cyberculture* is the first book to explore this extraordinary and ironic transformation Fred Turner here traces the previously untold story of a highly influential group of San Francisco Bay area entrepreneurs Stewart Brand and the Whole Earth network Between 1968 and 1998 via such familiar venues as the National Book Award winning Whole Earth Catalog the computer conferencing system known as WELL and ultimately the launch of the wildly successful Wired magazine Brand and his colleagues brokered a long running collaboration between San Francisco flower power and the emerging technological hub of Silicon Valley Thanks to their vision counterculturalists and technologists alike joined together to reimagine computers as tools for personal liberation the building of virtual and decidedly alternative communities and the exploration of bold new social frontiers Shedding new light on how our networked culture came to be this fascinating book reminds us that the distance between the Grateful Dead and Google between Ken Kesey and the computer itself is not as great as we might think *American Television* Nick Browne, 2013-07-18 This work brings together writings on television published in Quarterly Review of Film and Video from essays by Nick Browne and Beverle Houston to the latest historical and critical research It considers television s economics technologies forms and audiences from a cultural perspective that links history theory and criticism The authors address several key issues the formative period in American television history the relation between television s political economy and its cultural forms gender and melodrama and new technologies such as video games and camcorders Originally published in 1993 **Watching the Traffic Go By** Paul Mason Fotsch, 2009-06-03 2007 Jane Jacobs Urban Communication Publication Award Urban Communication Foundation As twentieth century city planners invested in new transportation systems to deal with urban growth they ensured that the automobile rather than mass transit would dominate transportation Combining an exploration of planning documents sociological studies and popular culture Paul Fotsch shows how our urban infrastructure developed and how it has shaped American culture ever since *Watching the Traffic Go By* emphasizes the narratives underlying our perceptions of innovations in transportation by looking at the stories we have built around these innovations Fotsch finds such stories in the General Motors Futurama exhibit at the 1939 World s Fair debates in Munsey s magazine films such as *Double Indemnity* and even in footage of the O J Simpson chase along Los Angeles freeways Juxtaposed with contemporaneous critiques by Lewis Mumford Theodor Adorno and Max Horkheimer Fotsch argues that these narratives celebrated new technologies that fostered stability for business and

the white middle class At the same time transportation became another system of excluding women and the poor especially African Americans by isolating them in homes and urban ghettos A timely interdisciplinary analysis *Watching the Traffic Go By* exposes the ugly side of transportation politics through the seldom used lens of popular culture
