The Nature Of Man:

The Nature of Man Erich Fromm, Ramón Xirau, 1968 Verzameling teksten van filosofen *A Treatise on the Nature of Man* Thomas Woodward, 2023-02-18 Reprint of the original first published in 1874 *The Nature of Man and God* Simon S. Godfrey, 2003 The search for understanding the meaning of the self and the nature of the Supreme Being has been the nub problem in history Although these concepts have been expounded in all ages by innumerable philosophers theologians and other writers the fact that they still remain nebulous indicates that more work is warranted in these perennial areas The Nature of Man and God deals with these two fundamental issues in a clear concise and down to earth manner As a psychologist the author has spent some thirty years investigating the issues in question The study of the self led him willy nilly to the reality of something that William James called a More or something that is popularly known as God The author found close affinity between the reality of the self and the reality of the Deity Owing to this affinity the author proposes that a more palpable way of knowing the Deity is to know one's own true self On the subject of the self the author distinguishes between two types a nominal self which is a mere echo of the early experiences of the individual and a transcendental self the latter can be realized only when human beings set themselves to unlearn what they have been taught on such matters rely on their inner resources and become their own gurus instead of following the instructions of self proclaimed authorities Regarding the Divine nature the author puts forth several challenging new theses In particular he enlarges on matters relating to ultimate concerns the human task freedom of will responsibility and theodicy explicating why there is evil and suffering in the world The book invites the reader to reach for a higher plain of humanness The topics covered are pivotal as the whole of humankind does indeed pivot around them It is the author's conviction that none of the current personal or international crises can be effectively resolved until humans first learn who they are and what genre of supratemporal intellect powers the scheme of things in the world The book should appeal to multiple audiences at a time when it seems nothing can disentangle the state of human affairs there is a crying need for this kind of book In particular it should prove of great interest to all those sincerely seeking to know themselves and their God the book also provides a workable tool for those seriously involved in improving the human lot or those weary of on going superficialities and trivialities of modern life

Humanity and the Nature of Man Ebsen William Amarteifio Bsc (Hons), 2013-06 This book is about the invaluable contribution of charities and humanitarians in our world the benevolence of the majority and the atrocities of a very small minority Mankind's difficulties often stem from natural disasters including terrible weather conditions creating human misery The tsunami and the famine in Ethiopia are typical examples The other difficulties that have beset humanity from time immemorial are man made like wars slavery and pogroms We also have dictatorships pariah states and police

states which do not seek to serve their people and alienate the international community The people in these places become outcasts despite genuine and determined efforts by others to bring them into the fold In any society we see the destructive effects of misunderstanding greed envy hatred and discrimination Senseless acts of individual barbarism also pose a problem Governments democratic or otherwise are installed with all the natural and human resources as well as the goodwill of the global community to serve and where necessary manage the difficulties of the people History and current affairs indicate that no government is capable of delivering utopia to its people even those unhampered by ideology political sensitivities self interest and retribution Mankind s difficulties are ever so complex Invariably the void left has to be managed for mankind to have a life worth living Nature abhors a vacuum so says the adage Political stalwarts like Abraham Lincoln and courageous clergymen William Wilberforce rise to the fore This pious hegemony is ably supported by charities humanitarians and ordinary individuals who have shown courage and compassion and the willingness to save and improve lives Charities continue to make the difference The courage and compassion of Lincoln Wilberforce Nightingale and Mother Teresa may be unsurpassed but Providence will continue to provide heroes and heroines for humanity *The nature of man* Erich
