The New Consciousness In Science And Religion:

The New Consciousness in Science and Religion Harold Kistler Schilling, 1973 *The Reenchantment of Science* David Ray Griffin, 1988-05-06 This book describes the move from modern mechanistic science to a post modern organismic science David Ray Griffin gives voice to a revisionary postmodernism based on the work of Whitehead and Hartshorne that contrasts with the relativistic nihilistic postmodernism of Heidegger Derrida and Wittgenstein The book brings together some of today s most creative thinking about science Griffin s introductory essay summarizes the way in which the mechanistic view led to the disenchantment of science and the various reasons for the reversal of this process in our time The essays on physics cosmology biology ecology psychosomatic medicine and parapsychology bring out the various dimensions of the reenchantment of science the replacement of modern dualism and reductionism with an ecological organismic paradigm the priority of internal relations to external the causal power of experience the presence of experience purpose and intrinsic value throughout nature influence at a distance the laws of nature as habits the presence of a divine whole in all the parts and the history of the universe as a self creative meaningful story This book gives a powerful voice to this emerging movement s proposals for a postmodern science spirituality and world order

SPIRITUAL SCIENCE: THE UNIFICATION OF SCIENCE AND RELIGION Raul Valverde PhD, 2018-07-31 Spiritual science uses concepts from different fields including metaphysics transpersonal psychology quantum physics parapsychology and gnostic studies into a unified system that describes the multi dimensional nature of man and the universe Dr Valverde attempts with this book to teach the reader how to unfold the real self in order to connect the individual with the universal life and power enabling the person to manifest that power in his or her own life The book introduces the concepts of the kingdom within right thinking meditation living in the present time emotional control law of nonresistance law of giving faith love mission in life how to reach peace health and happiness metaphysics of success christ consciousness wisdom and reaching perfection

The New Frontier of Religion and Science J. Hick, 2010-04-09 This is the first major response to the challenge of neuroscience to religion It considers eastern forms of religious experience as well as Christian viewpoints and challenges the idea of a mind identical to or a by product of brain activity It explores religion as inner experience of the Transcendent and suggests a modern spirituality

The Cambridge Companion to Postmodern Theology Kevin J. Vanhoozer, 2003-07-31 Postmodernity allows for no absolutes and no essence Yet theology is concerned with the absolute the essential How then does theology sit within postmodernity Is postmodern theology possible or is such a concept a contradiction in terms Should theology bother about postmodernism or just get on with its own thing Can it Theologians have responded in many different ways to the challenges posed by theories of postmodernity In this introductory 2003 guide to a complex area editor Kevin J Vanhoozer addresses the issue head on in a lively survey of what talk about God might mean in a postmodern age and vice versa The book then offers examples of different types of contemporary theology in relation to postmodernity while the second part examines the key

Christian doctrines in postmodern perspective Leading theologians contribute to this clear and informative Companion which no student of theology should be without *Unsettling Science and Religion* Whitney Bauman, Lisa Stenmark, 2018-05-24

This book borrows from the intellectual labor of queer theory in order to unsettle or queer the discourses of religion and science and by extension the science and religion discourse Drawing intellectual and social cues from works by influential theorists such as Michel Foucault Judith Butler and Eve Sedgwick chapters in this volume converge on at least three common features of queer theory First queer theory challenges givens that on occasion still undergird religiously and scientifically informed ways of thinking Second it takes embodiment seriously Third this engagement inevitably generates new pathways for thinking about how religious and scientific truths matter These three features ultimately lend support to critical investigations into the meanings of science and religion and the relationships between the two *The Social Relations of Physics, Mysticism, and Mathematics* S. Restivo, 2012-12-06

The problems I address in this book are among the least studied in the sociology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the critical as opposed to apologetic or worshipful sociology of knowledge

Science, Religion and Nationalism Jaume Navarro, Kostas Tampakis, 2023-12-22

Science and Religion have been two major elements in the building of modern nation states While contemporary historiography of science has studied the interactions between nation building and the construction of modern scientific and technological institutions science and religion is still largely based on a supposed universal historiography in which global notions of science and of religion are seldom challenged This book explores the interface between science religion and nationalism at a local level paying attention to the roles religious institutions specific confessional traditions or an undefined notion of religion played in the construction of modern science in national contexts the use of anti clerical rhetoric as scapegoat for a perceived scientific and technological backwardness the part of religious tropes in the emergence of a sense of belonging in new states the creation of invented traditions that included religious and scientific myths so as to promote new identities the struggles among different confessional traditions in their claims to pre eminence within a specific nation state etc Moreover the chapters in this book illuminate the processes by which religious myths and institutions were largely substituted by stories of progress in science and technology which often contributed to nationalistic ideologies

Science Fiction: A Critical Guide Patrick Parrinder, 2021-05-18 This book first published in 1979 presents a portrait of science fiction as a distinct form of serious and creative literature Contributors are drawn from Britain America and Europe and range from well known academic critics to young novelists The essays establish the common properties of science fiction writing and assess the history and significance of a field in which critical judgements have often been unreliable The material ranges from the earliest imaginative journeys to the moon to later developments of British American and European science fiction
