Stallings,2016-07-19 A Fusion of Horizons Unrolled Stone proposes to do nothing less than treat the Rolling Stones for the first time ever as a genuine cultural phenomenon worthy of what might be called philosophical attention The fundamental significance of this analysis acquires its incisive shape on the scaffolding of Heidegger s Being and Time Even though the focal point of the existential analytic employed focuses around the late Brian Jones still the book is designed to situate the truth claim of the Rolling Stones within the broader horizon of a universal radical uprootedness which constitutes the necessary point of departure for any serious reflection concerning the very meaning of existence in today s belongingless historical epoch

Information Status and Noncanonical Word Order in English Betty J. Birner, Gregory L. Ward, 1998-01-01 This work provides a comprehensive discourse functional account of three classes of noncanonical constituent placement in English preposing postposing and argument reversal and shows how their interaction is accounted for in a principled and predictive way In doing so it details the variety of ways in which information can be given or new and shows how an understanding of this variety allows us to account for the distribution of these constructions in discourse Moreover the authors show that there exist broad and empirically verifiable functional correspondences within classes of syntactically similar constructions Relying heavily on corpus data the authors identify three interacting dimensions along which individual constructions may vary with respect to the pragmatic constraints to which they are sensitive old vs new information relative vs absolute familiarity and discourse vs hearer familiarity They show that preposed position is reserved for information that is linked to the prior discourse by means of a contextually licensed partially ordered set relationship postposed position is reserved for information that is new in one of a small number of distinct senses and argument reversing constructions require that the information represented by the preverbal constituent be at least as familiar within the discourse as that represented by the postverbal constituent Within each of the three classes of constructions individual constructions vary with respect to whether they are sensitive to familiarity within the discourse or assumed familiarity within the hearer's knowledge store Thus although the individual constructions in question are subject to distinct constraints this work provides empirical evidence for the existence of strong correlations between sentence position and information status The final chapter presents crosslinguistic data showing that these correlations are not limited to English
