Peaceful Change Frank Möller, 2007-02-09 Frank Möller explores why the states and societies of the Baltic Sea region have not yet evolved into a security community despite the area undergoing since the mid 1980s considerable change with little turmoil. This book focuses on the tensions resulting from policies in the Baltic states aiming at an increase in both security and sovereignty. Möller shows how these states' attempts at increasing their security were intricately bound up with their efforts at autonomous nation state building. Möller argues that a primary obstacle to security community building was the construction of nation states based upon an exceedingly traditional template emphasizing the connection between the state sovereignty and military security. The Baltic states aspired to NATO membership amid unique challenges such as the perceived threat of renascent Russian imperialism and the perseverance of a collective memory emphasizing anti Soviet resistance. Möller also examines such key issues as the demise of the Soviet Union, the nonviolent withdrawal of Russian troops from the Baltic states and U.S. foreign policy in northern Europe. Here is a profound multifaceted look at issues of security in the contemporary world, a crucial tool for researchers and students of peace and conflict studies.

Boundaries, Territory and Postmodernity David Newman, 2013-11-05 Contributions to this collection seek to determine the extent to which states and boundaries have in fact disappeared or are simply changing their functions as we move from an era of fixed territories into a post Westphalian territorial system. A group of international political geographers and political scientists examine the changing nature of the state, pointing to significant changes on the one hand but equally noting the continued importance of territory and boundaries in determining the political ordering of the post modern world.

International Arms Transfers and the Middle East Ian Anthony, Peter Jones, 1998-11-19 The end of the Cold War and the relentless pace of technological change are altering the patterns of international arms transfers. For a number of economic and technological reasons the US is becoming increasingly dominant, particularly with respect to the very highest military capabilities which these technologies promise, though this will not be without dislocations for the Israeli military and society. Other countries such as Iran, Iraq and Saudi Arabia may acquire some additional conventional capabilities but they are not likely to be decisive in relation to Israel, though they could increase tensions associated with other disputes in the region. Finally, in the absence of progress towards a resolution of the Arab Israeli and other regional disputes, Israel's increasing technological edge will likely have the effect of further encouraging the efforts of some countries to explore asymmetric responses such as acquiring non conventional weapons or resorting to terrorism.

China's Relations with Arabia and the Gulf 1949-1999 Mohamed Mousa Mohamed Ali Bin Huwaidin, 2003-09-02 This book provides a detailed analysis of China's foreign policy towards the Gulf and Arabian peninsula region from the establishment of the People's Republic of China in 1949 to the end of the 20th century. Based on extensive original research, it looks at the relations between China and each of the countries of the region over the entire period. It demonstrates that two key factors have shaped China's foreign policy with the region: China's relations with the United States and the Soviet Union and China's drive to increase its economic ties with the countries of the

region especially after becoming a net importer of oil in the early 1990s Political Economy and the New Capitalism Jan Toporowski,2002-01-31 Political Economy and the New Capitalism examines the relevance of Sam Aaronovitch s pioneering empirical studies of British capitalism in the light of modern developments A wide range of problems are reviewed from industrial concentration today to the co ordination of economic policies in Europe Aaronovitch s work on the role of finance in the British economy is the subject sustained reflection Individual chapters examine orthodox and left wing criticisms of finance exchange rate instability and employment growth and regions in the context of European Union This work concludes with a bibliography of the published writings of Sam Aaronovitch and collects the reflections of some of the most distinguished thinkers in economics today including Meghnad Desai G C Harcourt Pat Devine Egon Matzner Malcolm Sawyer Sir Alan Budd Jan Toporowski Philip Arestis Eleni Paliginis Victoria Chick and Ben Fine **Long-term Conflict Prevention and Industrial Development** Ralf Bredel,2021-10-25 *Nation States as Schizophrenics* Roberta N. Haar,2001-05-30 The demise of the Cold War continues to pose new challenges to the international system Central to these challenges is the extent of German and Japanese security commitments within their regions and to the global maintenance of peace and stability It is important to know whether two of the world s acknowledged economic powers will play significant stabilizing roles If they choose not to what are the reasons and what can be done to convince them that their military might and political leadership are critical Certainly in the first decade since the end of the Cold War Germany and Japan did not fulfill the roles that their allies and many realist scholars expected they would Haar seeks to explain German and Japanese reticence to assume their anticipated roles In order to undertake this task she evaluates various models of foreign policy In the future Haar asserts Japanese and German foreign policy are likely to remain torn with both practicing a have it all ways policy If their allies the United States in particular continue to insist that they bear more of the burdens of world security then their foreign policy must be better understood This is a provocative analysis that will be of particular interest to scholars researchers and policy makers involved with German and Japanese foreign policy analysis Integration vs. Autonomy Geir Hønneland,Anne-Kristin Jørgensen,2018-12-21 Published in 1999 On the basis of leading theoretical work on civil military relations the authors elaborate their own model emphasising the continuum between military autonomy which has traditionally characterised the military sector in Russia and integration with civil society which one might expect would be the result of the political changes having taken place in Russia over the past decade Three Indicators of this relation are selected the participation of military personnel in civilian life and it particular politics the status of closed cities conversation of military industry to civilian production These indicators are investigated at the federal level and at the regional level pertaining to Murmansk oblast the Kola Peninsula which is one the most heavily militarised areas of the world The study is based on intensive on the spot data gathering in Murmansk including interviews with officers redundant officers and inhabitants of such closed cities **Interoperability of U.S. and NATO Allied Air Forces** Eric Victor Larson,2003 The
