adventure like Sarah Bakewell's book about Montaigne *How to Live* Hugh Aldersey Williams sets off not just to tell the story of Browne's life but to champion his skeptical nature and inquiring mind Mixing botany etymology medicine and literary history Aldersey Williams journeys in his hero's footsteps to introduce us to witches zealots natural wonders and fabulous creatures of Browne's time and ours We meet Browne the master prose stylist responsible for introducing hundreds of words into English including electricity hallucination and suicide Aldersey Williams reveals how Browne's preoccupations how to disabuse the credulous of their foolish beliefs what to make of order in nature how to unite science and religion are relevant today *In Search of Sir Thomas Browne* is more than just a biography it is a cabinet of wonders and an argument that Browne standing at the very gates of modern science remains an inquiring mind for our own time As Stephen Greenblatt has written Browne is unnervingly one of our most adventurous contemporaries

Thomas Browne and the Writing of Early Modern Science Claire Preston, 2005-02-17 Claire Preston argues that Thomas Browne's work can be fully understood only within the range of disciplines and practices associated with natural philosophy and early modern empiricism Early modern methods of cataloguing collecting experimentation and observation organised his writing on many subjects from medicine and botany to archaeology and antiquarianism Browne framed philosophical concerns in the terms of civil behaviour with collaborative networks of intellectual exchange investigative selflessness courtesy modesty and ultimately the generosity of the natural world itself all characterising the return to innocent knowledge which for Browne is the proper end of human enquiry In this major evaluation of Browne's oeuvre Preston examines how the developing essay form the discourse of scientific experiment and above all Bacon's model of intellectual progress and cooperation determined the unique character of Browne's contributions to early modern literature science and philosophy

The Ludic Self in Seventeenth-Century English Literature Anna K. Nardo, 1991-09-03 This book argues that play offered Hamlet John Donne George Herbert Andrew Marvell Robert Burton and Sir Thomas Browne a way to live within the contradictions and conflicts of late Renaissance life by providing a new stance for the self Grounding its argument in recent theories of play and in a historical analysis that sees the seventeenth century as a point of crisis in the formation of the western self the author demonstrates how play helped mediate this crisis and how central texts of the period enact this mediation

Milton and the Natural World Karen L. Edwards,2005-07-07 Milton and the Natural World overturns prevailing critical assumptions by offering a fresh view of Paradise Lost in which the representation of Eden s plants and animals is shown to be fully cognizant of the century s new scientific natural history The fabulous lore of the old science is wittily debunked and the poem embraces new imaginative and symbolic possibilities for depicting the natural world suggested by the speculations of Milton s scientific contemporaries including Robert Boyle Thomas Browne and John Evelyn Karen Edwards argues that Milton has represented the natural world in Paradise Lost with its flowers and trees insects and beasts as a text alive with meaning and worthy of close reading
