Sustainable Adaptation to Climate Change Katrina Brown, Eriksen Siri, 2012-06-25 This book sets out how to ensure that adaptation efforts are socially and environmentally sustainable contributing to poverty reduction as well as confronting the processes driving vulnerability. Over 100bn a year is pledged to help finance adaptation projects via the The Climate Adaptation Fund. These projects and their funding played a central role in the latest climate talks in Cancun, Mexico, ensuring that adaptation to climate change will be an international priority over the next few decades. Many existing adaptation projects are however not environmentally or socially sustainable. Adaptation projects that focus on reducing specific climate sensitivities can even if bringing benefits adversely affect vulnerable groups and create social inequity or even unintentionally undermine environmental integrity. Sustainable Adaptation to Climate Change examines how adaptation to climate change types of measures, policy frameworks and local household strategies interact with social and environmental sustainability. A mixture of conceptual and case study based papers draw on research from Europe, Asia and Africa. It will be of interest to all researchers and policymakers in climate change adaptation and development.

Relevance and Marginalisation in Scandinavian and European Performing Arts 1770-1860 Randi Margrete Selvik, Svein Gladsø, Annabella Skagen, 2020-12-30 *Relevance and Marginalisation in Scandinavian and European Performing Arts 1770-1860* Questioning Canons reveals how various cultural processes have influenced what has been included and what has been marginalised from canons of European music, dance and theatre around the turn of the nineteenth century and the following decades. This collection of essays includes discussion of the piano repertory for young ladies in England, canonisation of the French minuet, marginalisation of the popular German dramatist Kotzebue from the dramatic canon, dance repertory and social life in Christiania/Oslo, informal cultural activities in Trondheim, repertory of Norwegian musical clocks, female itinerant performers in the Nordic sphere, preconditions, dissemination and popularity of equestrian drama, marginalisation and amateur staging of a *Singspiel* by the renowned Danish playwright Oehlenschläger also with perspectives on the music and its composers and the perceived relevance of Henrik Ibsen's staged theatre repertory and early dramas. By questioning established notions about canon, marginalisation and relevance within the performing arts in the period 1770-1860, this book asserts itself as an intriguing text both to the culturally interested public and to scholars and students of musicology, dance research and theatre studies.

Recent Advances in Flowering Time Control Christian Jung,Klaus Pillen,Dorothee Staiger,George Coupland,Maria von Korff,2017-03-10 The onset of flowering is an important step during the lifetime of a flowering plant During the past two decades there has been enormous progress in our understanding of how internal and external environmental cues control the transition to reproductive growth in plants Many flowering time regulators have been identified from the model plant *Arabidopsis thaliana* Most of them are assembled in regulatory pathways which converge to central integrators which trigger the transition of the vegetative into an inflorescence meristem For crop cultivation the time of flowering is of upmost importance because it determines yield Phenotypic variation for this trait is largely controlled by genes which were often modified during domestication or crop improvement Understanding the genetic basis of flowering time regulation offers new opportunities for selection in plant breeding and for genome editing and genetic modification of crop species
