

TRAFFIC IMPACT ASSESSMENT FOR PREPARERS

Traffic Impact Assessment (TIA) is an essential tool in determining the possible impacts of development projects, such as commercial establishments, educational facilities and housing, on the transportation system. The main goal of TIA preparation is to identify traffic control as well as transport facility improvements, including roadway and intersection geometry requirements, that are needed to accommodate the additional traffic generated by the proposed development. This training will provide a comprehensive understanding of the overall purpose, scope, processes, and analytical tools needed to prepare a TIA report.
