Gian Vittorio Caprara, Daniel Cervone

Situation Cognition And Coherence In Personality An Individual Centered Approach:

Situation Cognition and Coherence in Personality Barbara Krahé, 1990 Re examines the long standing controversy about consistency in personality from a social psychological perspective whether there is evidence of consistent expression of the personality in different situations or whether behaviour is largely situation specific *The Oxford Handbook of Personality and Social Psychology* Kay Deaux, Mark Snyder, 2018-10-30 The second edition of The Oxford Handbook of Personality and Social Psychology uniquely integrates personality and social psychology perspectives together in one volume Contributors explore historical conceptual methodological and empirical foundations that link the two fields together Further this new edition offers readers comprehensive coverage of new and emerging areas of theory research and application and assesses the fields growth and development since the publication of the first edition Personality: Determinants, Dynamics, and Potentials Gian Vittorio Caprara, Daniel Cervone, 2000-08-15 This book first published in 2000 is a comprehensive survey of research and theory in personality psychology **Introduction to Personality** Walter Mischel, Yuichi Shoda, Ozlem Ayduk, 2007-09-10 This Eighth Edition reflects the new developments within personality psychology and gives the student a picture of the field as a cumulative integrative science that builds on its rich past and now allows a much more coherent view of the whole functioning individual in the social world This revision subtitled Toward an Integrative Science of the Person is committed to making that integration and its practical applications and personal relevance to everyday life even more clear and compelling for our students In this new edition the focus is placed on distilling how findings at each of the six major levels of analysis of personality trait disposition biological psychodynamic motivational behavioral conditioning phenomenological humanistic and social cognitive still speak to and inform each other and how they add to the current state of the science and its continuing growth *Connectionist Models of Social Reasoning and Social Behavior* Stephen John Read, Lynn C. Miller, 2014-01-14 Although neural network models have had a dramatic impact on the cognitive and brain sciences social psychology has remained largely unaffected by this intellectual explosion The first to apply neural network models to social phenomena this book includes chapters by nearly all of the individuals currently working in this area Bringing these various approaches together in one place it allows readers to appreciate the breadth of these approaches as well as the theoretical commonality of many of these models The contributors address a number of central issues in social psychology and show how these kinds of models provide insight into many classic issues Many chapters hint that this approach provides the seeds of a theoretical integration that the field has lacked Each chapter discusses an explicit connectionist model of a central problem in social psychology Since many of the contributors either use a standard architecture or provide a computer program interested readers with a little work should be able to implement their own variations of models Chapters are devoted to the following topics and models the learning and application of social categories and stereotypes causal reasoning social explanation and person perception personality and social behavior classic dissonance

phenomena and belief change and the coherence of large scale belief systems *Control Theories of Crime and Delinquency* Chester L. Britt, Michael R. Gottfredson, 2011-12-31 For the past twenty to thirty years control theories of crime have been at the center of theoretical development in criminology Key to the control theory perspective is the notion that crime is an inherently individual act and its explanation requires that we focus on the characteristics of individuals who commit crimes Consequently control theory focuses on such issues as self control and social control The contributions to this volume explicate and extend the application of control theory It is divided into three general areas Part 1 focuses on key assumptions and components of control theories Contributors discuss the notion of learning or socialization in the context of control theory and the effects that families peers and the criminal justice system have on self control social ties and criminal behavior Part 2 applies control theory to areas typically assumed to be out of the domain of self control theory and social control theory such as gender differences in crime domestic violence and group crime Considering control theory's emphasis on explaining individual criminal acts these chapters suggest an interesting area of development by highlighting the possibility that differences in crime across or within groups may begin with individual characteristics and then making inferences about groups and group processes Part 3 approaches the explanation of crime cross nationally and at the macro level Although the authors take different approaches they all illustrate that a theory of crime does not require culture specific elements in order to be a valid cross cultural explanation Contributors to this volume include Robert Agnew Todd Armstrong Leana Allen Bouffard Augustine Brannigan Chester Britt Barbara Costello Maja Dekovic Matt DeLisi Michael Gottfredson Henriette Haas Kelly H Hardwick Travis Hirschi Marianne Junger Martin Killias Helen Mederer Kevin Thompson and Alexander Vazsonyi Personality and Personality Disorders Steven Hyman, 2013-10-08 First published in 2001 This is Volume 7 in a series of ten on the Science of Mental Health One of the most challenging areas of behavioral research is the study of personality and personality disorders The main challenge can be stated directly it is difficult to know with certainty which personality traits are fundamental and which are complex elaborations of fundamental traits This is a collection of works under the sections of Description Epidemiology Genes and Environment Peers and Neighborhoods Neurobiology and Behavior and Treatment **Methods of Psychological Intervention** Gordon Sammut, Juliet Foster, Sergio Salvatore, Ruggero Andrisano Ruggieri, 2017-01-01 Methods of Psychological Intervention provides a rich collection of chapters that provide an invaluable resource to scholars researchers and practitioners in psychology Psychological interventions are becoming increasingly popular in contemporary societies This volume is intended to help psychologists and other professionals understand how general psychological knowledge can serve to guide local and particular interventions The present volume helps bridge the gap between general knowledge in the psychological sciences and particular instances of human behavior as it takes place in everyday life The volume forms part of the series Yearbook of Idiographic Science Authors draw on principles of idiographic science to formulate interventions applicable to a broad diversity of settings and

institutions such as educational settings organizations and medical settings It similarly deals with various psychological behaviours targeted for intervention such as gambling family therapy and crime The volume will be of interest to scholars researchers and practitioners working in the fields of psychology social work counseling family therapy education organizational behavior criminal justice *Proceedings of the Fourteenth Annual Conference of the Cognitive Science Society* Cognitive Science Society (US) Conference,2014-05-12 This volume features the complete text of all regular papers posters and summaries of symposia presented at the 14th annual meeting of the Cognitive Science Society *Virtue as Social Intelligence* Nancy E. Snow,2010-07-29 Virtue as Social Intelligence An Empirically Grounded Theory takes on the claims of philosophical situationism the ethical theory that is skeptical about the possibility of human virtue Influenced by social psychological studies philosophical situationists argue that human personality is too fluid and fragmented to support a stable set of virtues They claim that virtue cannot be grounded in empirical psychology This book argues otherwise Drawing on the work of psychologists Walter Mischel and Yuichi Shoda Nancy E Snow argues that the social psychological experiments that philosophical situationists rely on look at the wrong kinds of situations to test for behavioral consistency Rather than looking at situations that are objectively similar researchers need to compare situations that have similar meanings for the subject When this is done subjects exhibit behavioral consistencies that warrant the attribution of enduring traits and virtues are a subset of these traits Virtue can therefore be empirically grounded and virtue ethics has nothing to fear from philosophical situationism **Psychology of Individual Differences: Personality** Gregory John Boyle,Donald H. Saklofske,2004 **Crime Opportunity Theories** Mangai Natarajan,2017-07-05 Opportunity theories of crime seek to explain the occurrence of crime rather than simply the existence of criminal dispositions They emphasize the fundamental element in the criminal act of opportunity how this arises how it is perceived evaluated and acted on by those with criminal dispositions This volume brings together influential research articles on opportunity theories of crime by leading theorists such as Cohen and Felson on routine activity theory and Clarke and Cornish on the bounded rational choice perspective The articles also include more recent theoretical developments and studies of situational crime prevention of specific twenty first century crimes These articles attest to the sheer volume as well to as the richness and the variety of work designed to reduce crime that has forever changed the face of criminology and criminal justice *Judicial Character in Hard Times* Tomasz Wdłak,2025-03-12 This insightful book analyses how judges intellectual traits and personalities impact the rule of law and the proper performance of judicial roles Focusing on times of crisis the book discusses manifestations of judicial character under internal and external pressures social unrest and attacks on judges when their status independence and impartiality are under strain *Psychology of Individual Differences* Gregory J Boyle,Donald H Saklofske,2004-01-31 A comprehensive up to date and international synthesis of some of the most significant publications in the psychology of individual differences over the past two decades including highly cited empirical articles critical review articles and key book chapters that have
