Snyders Mounds And Five Other Mound Groups In Calhoun County Illinois:

The Snyders Mounds and Five Other Mound Groups in Calhoun County, Illinois David P. Braun, James B. Griffin, Paul F. Titterington, 1982-01-01 In the 1940s Paul F. Titterington, a doctor and avocational archaeologist, excavated several prehistoric burial mounds in Calhoun County, Illinois. He did not publish the results of his research but he did donate his notebooks, photographs, and artifact collection to the University of Michigan in 1955. In this report, David Braun and James Griffin present Titterington's research. [The Moundbuilders: Ancient Societies of Eastern North America \(Second\)](#) George R. Milner, 2021-03-09 Brought up to date with the latest research, *The Moundbuilders* is the definitive visual guide to North America's eastern region and the societies that forever changed its landscape. Hailed by Bruce D. Smith, curator of North American archaeology at the Smithsonian Institution, as without question the best available book on the pre-Columbian societies of eastern North America, this wide-ranging and richly illustrated volume covers the entire prehistory of the Eastern Woodlands and the thousands of earthen mounds that can be found there, built between 3100 BCE and 1600 CE. The second edition of *The Moundbuilders* has been brought fully up to date with the latest research on the peopling of the Americas, including more coverage of pre-Clovis groups, new material on Native American communities in the thirteenth to sixteenth centuries CE, and new narratives of migration drawn from ancient and modern DNA. Far-reaching and illustrated throughout, this book is the perfect visual guide to the region for students, tourists, archaeologists, and anyone interested in ancient American history. *Archaic Hunters and Gatherers in the American Midwest* James L. Phillips, James A. Brown, 2016-09-16 This volume reports on a series of multidisciplinary projects involving the Archaic period of the American Midwest, a period of innovation and technical achievement. The articles focus on changes in environmental, social, and economic factors operating in this period and the adaptation of the hunter-gatherer peoples living at this time. *Prehistoric Copper Mining in Michigan* John R. Halsey, 2018-01-01 Isle Royale and the counties that line the northwest coast of Michigan's Upper Peninsula are called Copper Country because of the rich deposits of native copper there. In the nineteenth century, explorers and miners discovered evidence of prehistoric copper mining in this region. They used those ancient diggings as a guide to establishing their own, much larger mines, and in the process destroyed the archaeological record left by the prehistoric miners. Using mining reports, newspaper accounts, personal letters, and other sources, this book reconstructs what these nineteenth-century discoverers found, how they interpreted the material remains of prehistoric activity, and what they did with the stone, wood, and copper tools they found at the prehistoric sites. This volume represents an exhaustive compilation of the early written and published accounts of mines and mining in Michigan's Upper Peninsula. It will prove a valuable resource to current and future scholars. Through these early historic accounts of prospectors and miners, Halsey provides a vivid picture of what once could be seen. John M. O'Shea, curator of Great Lakes Archaeology, University of Michigan Museum of Anthropological Archaeology. *The Taking and Displaying of Human Body Parts as Trophies by Amerindians* Richard J.

Chacon,David H. Dye,2007-08-21 This edited volume mainly focuses on the practice of taking and displaying various body parts as trophies in both North and South America The editors and contributors which include Native Peoples from both continents examine the evidence and causes of Amerindian trophy taking Additionally they present objectively and discuss dispassionately the topic of human proclivity toward ritual violence This book fills the gap in literature on this subject

Archaeology and Ancient Religion in the American Midcontinent Brad H. Koldehoff,Timothy R.

Pauketat,2018-11-06 Analyses of big datasets signal important directions for the archaeology of religion in the Archaic to Mississippian Native North America Across North America huge data accumulations derived from decades of cultural resource management studies combined with old museum collections provide archaeologists with unparalleled opportunities to explore new questions about the lives of ancient native peoples For many years the topics of technology economy and political organization have received the most research attention while ritual religion and symbolic expression have largely been ignored This was often the case because researchers considered such topics beyond reach of their methods and data In Archaeology and Ancient Religion in the American Midcontinent editors Brad H Koldehoff and Timothy R Pauketat and their contributors demonstrate that this notion is outdated through their analyses of a series of large datasets from the midcontinent ranging from tiny charred seeds to the cosmic alignments of mounds they consider new questions about the religious practices and lives of native peoples At the core of this volume are case studies that explore religious practices from the Cahokia area and surrounding Illinois uplands Additional chapters explore these topics using data collected from sites and landscapes scattered along the Mississippi and Ohio River valleys This innovative work facilitates a greater appreciation for and understanding of ancient native religious practices especially their seamless connections to everyday life and livelihood The contributors do not advocate for a reduced emphasis on technology economy and political organization rather they recommend expanding the scope of such studies to include considerations of how religious practices shaped the locations of sites the character of artifacts and the content and arrangement of sites and features They also highlight analytical approaches that are applicable to archaeological datasets from across the Americas and beyond Gathering
