City, Space and Trade Unionism Beltrán Roca, 2025-09-04 How does collective action shape economic landscapes This book examines the transformation of the workers movement in Spain's metal sector one of the country's most unionised industries Having faced restructuring delocalization subcontracting and increasing precarity metalworkers in Cádiz have used radical methods to challenge measures that threaten their income and industry Adopting a spatial approach to labour and social movements Beltrán Roca investigates the spatial strategies employed by unions to navigate these challenges debating whether to focus on factory bound action or engage the broader community In doing so the book highlights labour militancy as a social process deeply rooted in specific cities and places and of workers as producers of space through conflict

Social Conflict in the Age of Justinian Peter N. Bell, 2013-04-04 *Social Conflict in the Age of Justinian* explores a range of often violent conflicts across the whole empire during AD 527-565 These conflicts were reflected at the ideological level and lead to intense persecution of intellectuals and Pagans as an ever more robust Christian ideological hegemony was established **Creative Stratagems: Creative and Systems Thinking in Handling Social Conflict** Adam Matuszczyk, 2012 Stratagems that is what we call war ruses but also ruses in general They can decide victory or defeat We are all familiar with well known war ruses Just think of the Greek story of the Trojan horse These days we think of a Trojan horse mostly in connection with criminal computer hacking We then have to ask How does one think up stratagems To do so

one must have competency in creative and systemic thinking This book explains the value and meaning of these ways of thinking for the creation of stratagems Readers will learn How to think of the term stratagem What kinds of stratagems one might find e g from antiquity the Stratagemata of Frontin What creative and systems thinking is and how it expresses itself in the development of ruses How one might go about thinking up stratagems This book is meant for everyone who handles

social conflict as well as those with an interest in creative and systems thinking **Four Steeples Over the City Streets**

Kyle T. Bulthuis,2017-04 In the fifty years after the Constitution was signed in 1787 New York City grew from a port town of 30 000 to a metropolis of over half a million residents This rapid development transformed a once tightknit community and its religious experience These effects were felt by Trinity Episcopal Church which had presented itself as a uniting influence in New York that connected all believers in social unity in the late colonial era As the city grew larger more impersonal and socially divided churches reformed around race and class based neighborhoods Trinity s original vision of uniting the community was no longer possible In Four Steeples over the City Streets Kyle T Bulthuis examines the histories of four famous church congregations in early Republic New York City Trinity Episcopal John Street Methodist Mother Zion African Methodist and St Philip s African Episcopal to uncover the lived experience of these historical subjects and just how religious experience and social change connected in the dynamic setting of early Republic New York Drawing on a range of primary sources Four Steeples over the City Streets reveals how these city churches responded to these transformations from colonial times to the mid nineteenth century Bulthuis also adds new dynamics to the stories of well known New Yorkers such as John Jay James Harper and Sojourner Truth More importantly Four Steeples over the City Streets connects issues of race class and gender urban studies and religious experience revealing how the city shaped these churches and how their respective religious traditions shaped the way they reacted to the city Publisher **The Modern Social Conflict** Ralf

Dahrendorf,2011-12-31 Revolutions are melancholy moments in history brief gasps of hope that emerges from misery and disillusionment This is true for great revolutions like 1789 in France or 1917 in Russia but applies to lesser political upheavals as well Conflict builds into a state of tense confrontation like a powder keg When a spark is thrown an explosion takes place and the old edifice begins to crumble People are caught up in an initial mood of elation but it does not last Normality catches up Why do revolutions occur In this completely revised edition of The Modern Social Conflict Ralf Dahrendorf explores the basis and substance of social and class conflict Ultimately he finds that conflicts are about enhancing life chances that is they concern the options people have within a framework of social linkages the ties that bind a society which Dahrendorf calls ligatures The book offers a concise and accessible account of conflict s contribution to democracies and how democracies must change if they are to retain their political and social freedom This new edition takes conflict theory past the fall of the Berlin Wall in 1989 and into the present day Upon publication of the original 1988 edition Stanley Hoffmann stated Ralf Dahrendorf is one of the most original and experienced social and political writers of our time

this book is both a survey of social and political conflict in Western societies from the eighteenth century to the present and a tract for a new radical liberalism And Saul Friedlander wrote Ralf Dahrendorf has written a compelling book the brilliant contribution of a convinced liberal to the study of conflict within contemporary democratic society **Addiction, Modernity, and the City** Christopher B.R. Smith,2015-11-19 Examining the interdependent nature of substance space and subjectivity this book constitutes an interdisciplinary analysis of the intoxication indigenous to what has been termed our narcotic modernity The first section Drug Culture demonstrates how the body of the addict and the social body of the city are both inscribed by controlled substance Positing addiction as a pathology out of place that is specific to the late capitalist urban landscape the second section Dope Sick conducts a critique of the prevailing pathology paradigm of addiction proposing in its place a theoretical reconceptualization of drug dependence in the terms of prescription Remapping the successive stages or phases of our narcotic modernity the third section Narco State delineates three primary eras of narcotic modernity including the contemporary city of safe supervised consumption Employing an experimental intra textual format the fourth section Brain Disease mimics the sense state or scape of intoxication accompanying each permutation of narcotic modernity in the interchangeable terms of drug dream and or disease Tracing the parallel evolution of addiction the late capitalist cityscape and the pathological project of modernity the four parts of this book thus together constitute a users guide to urban space Gentrification of the City Neil Smith,Peter Williams,2013-10-15 The author and contributors of this book seek to present alternatives to the mainstream discussions of gentrification It does not present a single coherent vision of the causes effects and experiences of gentrification but a number of different views that do not always coincide What the authors have in common is the attempt to escape a naive empiricism which has dominated much mainstream research as well as the conviction that questions of social class lie at the heart of this issue This book was first published in 1986 **The entangled city** Gabriel Feltran,2020-03-03 This book tells the story of the world of crime in S o Paulo In so doing it presents a new framework to understand urban conflict in many other contexts **The City** Kevin Archer,2013 The City The Basics provides a brief yet compelling overview of the study of cities and city life The book draws on a range of perspectives economic political cultural and environmental aspects are all considered to provide a broad comparison of the evolution of cities in the rich Global North and the poorer Global South Topics covered in the book include a brief history of cities from ancient times to the post modern present the differences between global cities in the North and megacities in the South the environmental impact of urban life and the idea of sustainable cities urban planning urban politics and urban poverty Featuring suggestions for further reading recommended websites and a number of maps and illustrations this is the ideal starting point for those interested in any aspect of cities or urban studies **Knowledge Economy and the City** Ali Madanipour,2013-03-01 This book explores the relationship between space and economy the spatial expressions of the knowledge economy The capitalist industrial economy produced its own space which differed radically from its predecessor

agrarian and mercantile economies If a new knowledge based economy is emerging it is similarly expected to produce its own space to suit the new circumstances of production and consumption If these spatial expressions do exist even if in incomplete and partial forms they are likely to be the model for the future of cities The Routledge Handbook of Anthropology and the City Setha Low,2018-10-03 The Routledge Handbook of Anthropology and the City provides a comprehensive study of current and future urban issues on a global and local scale Premised on an engaged approach to urban anthropology the volume adopts a thematic approach that covers a wide range of modern urban issues with a particular focus on those of high public interest Topics covered include security displacement social justice privatisation sustainability and preservation Offering valuable insight into how anthropologists investigate make sense of and then address a variety of urban issues each chapter covers key theoretical and methodological concerns alongside rich ethnographic case study material The volume is an essential reference for students and researchers in urban anthropology as well as of interest for those in related disciplines such as urban studies sociology and geography *Spatial Justice in the City* Sophie Watson,2019-11-04 In the context of increasing division and segregation in cities across the world along with pressing concerns around austerity environmental degradation homelessness violence and refugees this book pursues a multidisciplinary approach to spatial justice in the city Spatial justice has been central to urban theorists in various ways Intimately connected to social justice it is a term implicated in relations of power which concern the spatial distribution of resources rights and materials Arguably there can be no notion of social justice that is not spatial Philippopoulos Mihalopoulos has argued that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time As such urban planning and policy interventions are always to some extent at least about spatial justice And as cities become ever more unequal it is crucial that urbanists address questions of spatial justice in the city To this end this book considers these questions from a range of disciplinary perspectives Crossing law sociology history cultural studies and geography the book s overarching concern with how to think spatial justice in the city brings a fresh perspective to issues that have concerned urbanists for several decades The inclusion of empirical work in London brings the political social and cultural aspects of spatial justice to life The book will be of interest to academics and students in the field of urban studies sociology geography planning space law and cultural studies **2022 2nd International Conference on Management Science and Software Engineering (ICMSSE 2022)** Syed Abdul Rehman Khan,Noor Zaman Jhanjhi,Hongbo Li,2024-03-09 This is an open access book Management science and engineering is a systematic discipline that combines modern information technology and digital technology and then uses some related discipline methods such as systems science mathematical science economics and behavioral science and engineering methods After analyzing and researching some problems arising from social economy engineering education finance etc and making corresponding countermeasures The main purpose is to achieve control and planning decision making and adjustment in

Perceptual and Cognitive Image of the City Chiranji Singh Yadav,1987 **The Making of Urban Japan** André Sorensen,2005-08-19 During the twentieth century Japan was transformed from a poor primarily rural country into one of the world s largest industrial powers and most highly urbanised countries Interestingly while Japanese governments and planners borrowed carefully from the planning ideas and methods of many other countries Japanese urban planning urban governance and cities developed very differently from those of other developed countries Japan s distinctive patterns of urbanisation are partly a product of the highly developed urban system urban traditions and material culture of the pre modern period which remained influential until well after the Pacific War A second key influence has been the

dominance of central government in urban affairs and its consistent prioritisation of economic growth over the public welfare or urban quality of life Andr Sorensen examines Japan s urban trajectory from the mid nineteenth century to the present paying particular attention to the weak development of Japanese civil society local governments and land development and planning regulations

Heritage, Gentrification and Resistance in the Neoliberal City Feras Hammami, Daniel Jewesbury, Chiara Valli, 2022-07-08 What happens when versions of the past become silenced suppressed or privileged due to urban restructuring In what ways are the interpretations and performances of the past linked to urban gentrification marginalization displacement and social responses Authors explore a variety of attempts to interrupt and interrogate urban restructuring and to imagine alternative forms of urban organization produced by diverse coalitions of resisting groups and individuals Armed with historical narratives oral histories objects physical built environment memorials and intangible aspects of heritage that include traditions local knowledge and experiences memories authors challenge the devaluation of their neighborhoods in official heritage and development narratives

Endangered City Austin Zeiderman, 2016-05-19 Security and risk have become central to how cities are planned built governed and inhabited in the twenty first century In *Endangered City* Austin Zeiderman focuses on this new political imperative to govern the present in anticipation of future harm Through ethnographic fieldwork and archival research in Bogot Colombia he examines how state actors work to protect the lives of poor and vulnerable citizens from a range of threats including environmental hazards and urban violence By following both the governmental agencies charged with this mandate and the subjects governed by it *Endangered City* reveals what happens when logics of endangerment shape the terrain of political engagement between citizens and the state The self built settlements of Bogot s urban periphery prove a critical site from which to examine the rising effect of security and risk on contemporary cities and urban life
