Neoliberal Morality in Singapore Youyenn Teo, 2013-11-11 Using the case study of Singapore this book examines the production of a set of institutionalized relationships and ethical meanings that link citizens to each other and the state It looks at how questions of culture and morality are resolved and how state society relations are established that render paradoxes and inequalities acceptable and form the basis of a national political culture The Singapore government has put in place a number of policies to encourage marriage and boost fertility that has attracted much attention and are often taken as evidence that the Singapore state is a social engineer The book argues that these policies have largely failed to reverse demographic trends and reveals that the effects of the policies are far more interesting and significant As Singaporeans negotiate various rules and regulations they form a set of ties to each other and to the state These institutionalized relationships and shared meanings referred to as neoliberal morality render particular ideals about family natural Based on extensive field work the book is a useful contribution to studies on Asian Culture and Society Globalisation as well as Development Studies

State, Society and Information Technology in Asia Alan Chong,Faizal Bin Yahya,2016-04-01 Many maintain that the arrival of computers networked across sovereign borders and physical barriers is a liberating force that will produce a global dialogue of liberal hues but this book argues that this dominant paradigm needs to be supplemented by the perspective of alterity in the impact of Information Technology in different regions Local experts draw upon a range of Asian cases to demonstrate how alterity defined here as a condition of privileging the hitherto marginal and subterranean aspects of a capitalist world order through the capabilities of information and communications technologies offers an alternative to the paradigm of inevitable material advances and political liberalization Calling attention to the unique social and political uses being made of IT in Asia in the service of offline and online causes predominantly filtered by pre existing social milieus the contributors examine the multiple dimensions of Asian differences in the sociology and politics of IT and show how present trends suggest that advanced electronic media will not necessarily be embraced in a smooth unilinear fashion throughout Asia This book will appeal to any reader interested in the nexus between society and IT in Asia **Renaissance Singapore?**
