Talking Gender:

Talking Gender and Sexuality Paul McIlvenny, 2002-01-01 This edited volume brings together scholars from psychology linguistics sociology and communication science to investigate how performative notions of gender and sexuality can be fruitfully explored with the rich set of tools that have been developed by conversation analysis and discursive psychology for analyzing everyday practical language use agency and identity in talk Contributors re examine the foundations of earlier research on gender in spoken interaction critically appraise this research to see if and how it translates successfully into the study of sexuality in talk and promote innovative alternatives that integrate the insights of recent feminist and queer theory with qualitative studies of talk and conversation Detailed empirical analyses of naturally occurring talk are used to uncover how gender and sexual identities agencies and desires are contingently accomplished in conversational practices Collectively they pose the important question of what a critical theory of talk gender and sexuality ought to look like if it is to be sensitive to a politics of conversation analysis *Talking Gender* Ruth Elizabeth King, 1991

Reading, Writing, and Talking Gender in Literacy Learning Barbara J. Guzzetti, Josephine Peyto Young, Margaret M. Gritsavage, Laurie M. Fyfe, Marie Hardenbrook, 2013-10-08 Until now there has been no systematic analysis or review of the research on gender and literacy With all the media attention and research surveys surrounding gender bias and the inequities that continue to flourish in education a synthesis of the research studies was needed to raise awareness of gender issues in learning and literacy to provide successful interventions and recommendations to educators and to point out the direction for future inquiries by examining the unanswered questions of the existing research For the convenience of readers the studies are organized by genre gender and discussion reading writing electronic text and literacy autobiography Published by International Reading Association An Interdisciplinary Bibliography on Language, Gender and Sexuality (2000-2011) Heiko Motschenbacher, 2012-09-11 This comprehensive state of the art bibliography documents the most recent research activity in the vibrant field of language gender and sexuality It provides experts in the field and students in tertiary education with access to language centred resources on gender and sexuality and is therefore an ideal research companion The main part of the bibliography lists 3 454 relevant publications monographs edited volumes journal articles and contributions to edited volumes that have been published within the period from 2000 to 2011 It unites work done in linguistics with that of neighbouring disciplines covering studies dealing with a broad range of languages and cultures around the globe Alphabetical listing and a keyword index facilitate finding relevant work by author and subject matter The e book version additionally enables users to search the entire document for specific terms Sections on earlier bibliographies and general reference works on language gender and sexuality complete the compilation *Women Speaking Up* C. Ford, 2008-04-01 Countering popular myths of women s deficiencies in communicating in traditionally male professions the author uses women s talk to illustrate the interactional skills required to contribute effectively to workplace meetings and

presents new insights on the organization of talk in meetings while celebrating women's clear competence **Claiming Power in Doctor-Patient Talk** Nancy Ainsworth-Vaughn, 1998-06-25 Nancy Ainsworth Vaughn studied stories, topic control, true questions and rhetorical questions in 101 medical encounters in US private practice settings. In exceptionally lucid and accessible style, Ainsworth Vaughn explains how power was claimed by and co-constructed for both patients and doctors. Previous studies have focused upon doctors' power. The discourse varied along a continuum from interview-like talk to conversational talk. Six chapters are organized around data and include extended examples of actual talk in detailed transcription. Four of these data-oriented chapters focus upon dynamic moment-to-moment use of speech activities in emerging discourse such as doctors' and patients' stories that co-constructed selves and a patient's sexual rhetorical questions. Two more chapters offer non-statistical quantitative data on the frequency of questioning and sudden topic changes in relation to gender diagnosis and other factors. Contributing to discourse theory, Ainsworth Vaughn significantly modifies previous definitions for topic transitions and rhetorical questions and discovers the role of storytelling in diagnosis. The final chapter provides implications for physicians and medical educators *Linguistic Dimensions of Crisis Talk* Claudia Sassen, 2005-08-31 This book offers an HPSG-based discourse grammar for a controlled language, Air Traffic Control, that allows the identification of well-formed discourse patterns. A formalisation of discourse theoretical structures that occur especially in crisis situations that involve potential aviation disasters is introduced. Of particular importance in this context are discourse sequences that help secure uptake among the crew and between crew and tower in order to coordinate actions that might result in avoiding a potential disaster. In order to describe the relevant phenomena, an extended HPSG formalism is used. The extension concerns the capability of modelling speech acts as proposed by Searle (Vanderveken 1985). The grammar is modelled by employing XML as a denotational semantics and is applied to the corpus data. This work thus lays the foundation for the automatic recognition of discourse structures in aviation communication **The Interactional Organization of Academic Talk** Holger Limberg, 2010 This book provides interesting and critical insights into a common university practice, the academic office hour. Office hours are a discursive site for a variety of different issues ranging from administrative matters to course-related and study-related concerns. The study offers both an ethnographic account of this speech event within the socio-cultural context of a German university as well as a more detailed analysis of the interactional organization of academic consultations. It draws on natural recordings of entire office hour interactions in order to show how participants' actions at different stages of the talk organize and accomplish the consultation. The analytical focus is set on the sequential activities teachers and students engage in as they conduct a consultation. This includes, for instance, how participants open an office hour talk, how they establish an agenda, how they manage advice-giving and how they close the consultation. As such, this book will be of practical use to students and faculty members as well as scholars from different disciplines who work in the areas of institutional talk and talk in interaction *Discourse and Identity* Bethan

Benwell,2006-03-15 Identity is a central organizing feature of our social world Across the social sciences and humanities it is increasingly treated as something that is actively and publicly accomplished in discourse This book defines identity in its broadest sense in terms of how people display who they are to each other Each chapter examines a different discursive environment in which people do identity work everyday conversation institutional settings narrative and stories commodified contexts spatial locations and virtual environments The authors describe and demonstrate a range of discourse and interaction analytic methods as they are put to use in the study of identity including performative analyses conversation analysis membership categorization analysis critical discourse analysis narrative analysis positioning theory discursive psychology and politeness theory The book aims to give readers a clear sense of the coherence or otherwise of these different approaches the practical steps taken in analysis and their situation within broader critical debates Through the use of detailed and original identity case studies in a variety of spoken and written texts in order the book offers a practical and accessible insight into what the discursive accomplishment of identity actually looks like and how to go about analyzing it

The Japanese Sentence-final Particles in Talk-in-interaction Hideki Saigo,2011 The Japanese sentence final particles ne yo and yone have proved notoriously difficult to explain and are especially challenging for second language users This book investigates the role of the particles in talk in interaction with the aim of providing a comprehensive understanding that accounts for their pragmatic properties and sequential functions and that provides a sound basis for second language pedagogy This study starts by setting up an original particle function hypothesis based on the figure ground gestalt and then tests its validity empirically with unmarked marked and native non native talk in interaction data The analysis illustrates not only expectable but also unexpected or strategic use of particles as well as the problems posed for native speakers by non native speakers whose use of particles is idiosyncratic The study demonstrates that the proposed hypothesis is capable of accounting for all the uses of particles in the extensive and varied data set examined This book will be of interest to students and scholars in pragmatics and CA and to teachers of Japanese as a foreign language **Talk in interaction** Markku

Haakana,Minna Laakso,Jan Lindström,2009-01-01 During the recent decades Conversation Analysis has developed into a distinctive method for analyzing talk in interaction The method is utilized in several disciplines sharing an interest in social interaction like anthropology linguistics social psychology and sociology and it has been applied to a great variety of languages and types of interaction Conversation Analysis then is coming of age as a truly comparative enterprise This volume presents and discusses comparative approaches to analyzing interactional practices and structures The contributors to the volume have their background in sociology linguistics and logopedics They offer comparative analyses of activity types participant roles and identities displays of emotion and design of actions such as questions and corrections The languages covered by the chapters include English Finnish German and Swedish This volume is of interest to all those interested in the research of language and social interaction Because of its methodological nature the book can also be utilized in teaching

and in learning the discovery procedures typical of Conversation Analysis **Negotiation of Contingent Talk** Emi Morita, 2005-01-01 LC number 2005048396 When Listeners Talk Rod Gardner, 2001-01-01 Listeners are usually considered recipients in conversational interaction whose main activity is to take in messages from other speakers In this view the listening activity is separate from speaking Another view is that listeners and speakers are equal co participants in conversations who construct the talk together In support of this latter view one finds a group of vocalisations which are quintessentially listener talk little conversational objects such as uh huh oh mm yeah right and mm hm These utterances do not have meanings in a conventional dictionary sense but are nevertheless loaded with complex and subtle information about the stance listeners take to what they are hearing information that is gleaned not only from their phonetic form but also from their complex prosodic shape and their placement and timing within the flow of talk This book summarises eight of these objects and explores one mm in depth **Stance in Talk** Ruey-Jiuan Regina Wu, 2004-06-22 Guided by the methodology of conversation analysis CA this book explores how participants in Mandarin conversation display stance in the unfolding development of action and interaction and in particular how this is accomplished through the use of two Mandarin final particles Through a close examination of the sequential environments of these two particles and the interactional work accomplished by their use the research presented in this book seeks to demonstrate how a participant oriented action based micro approach to data can help us gain analytic leverage in understanding the functions and meanings of these particles an area which has long posed a challenge to Chinese linguists On the other hand in utilizing a CA based framework applied to Mandarin this study also seeks to contribute to conversation analytic research by revealing previously uninvestigated language specific phenomena while at the same time showing how talk in interaction in a non western language i e Mandarin can also display the same striking systematicity and orderliness as observed in many western languages As one of the pioneering CA studies of Mandarin this book will be of interest to researchers in Chinese linguistics and conversation analysis as well as those in fields which touch upon the relationships between languages and cultures Online Sex Talk and the Social World Chrystie Mykietiak, 2020-10-09 This book develops a feminist and queer linguistic account of the construction of sex sexuality and desire through a linguistic and discursive analysis of naturally occurring sex talk from an online community Critical discourse analysis is used to analyse a corpus of data drawn from incidental sex talk observed in the community over the course of an 18 month period Sub types of sex talk that are examined include cybersex self disclosure confidences joking games flirting and automated sexual commands that generate sex between participants The book will be of use to students and researchers interested in the language of gender and sexuality as well as feminist and queer accounts of technology and sexual communication The Post-communist Condition Aleksandra Galasińska, Dariusz Galasiński, 2010 This volume offers interdisciplinary perspectives on discourses in one national context of post communist transformation Proposing a macro micro approach to discourse analysis and transformation it examines a spectrum of topics

including Polish history with its interpreters changes in political bodies and the media policies of the Catholic Church and the Institute of National Remembrance xenophobia and anti-Semitism with the emergence of unemployment and homelessness experiences of new gender relations and migrations In effect drawing upon unique sets of data the book shows how post communist transformation can be understood through analyses of the changing public and private discourses It shows Polish post communism as a fragile and uneasy transformation with people and institutions struggling to make sense of it and of life within it The volume will be of interest to a broad range of social scientists discourse analysts sociologists modern historians and political scientists as well as to the informed lay public

The Nonverbal Shift in Early Modern English

Conversation Axel Hübler, 2007-01-18 This is the first historical investigation on the nonverbal component of conversation In the courtly society of 16th and 17th century England it is argued that a drift appeared toward an increased use of prosodic means of expression at the expense of gestural means Direct evidence is provided by courtesy books and personal documents of the time indirect evidence by developments in the English lexicon The rationale of the argument is cognitively grounded given the integral role of gestures in thinking for speaking it rests on an isomorphism between gestural and prosodic behavior that is established semiotically and elaborated by insights from neurocognitive frequency theory and task dynamics The proposal is rounded off by an illustration from present day conversational data and the proof of its adaptability to current theories of language change The cross disciplinary approach addresses all those interested in historical pragmatics cognitive linguistics cultural semantics semiotics or language change

Social Constructionist Psychology David Nightingale, John Cromby, 1999-09-16 How can ideas about the social construction of reality be reconciled with the material and embodied aspects of our being In what ways can a realist framework inform social constructionist research What are the limits of social constructionism This accessible text draws together for the first time a wide range of emerging issues ideas and discussions in constructionist psychology It shows how these issues are relevant to everyday life using carefully chosen examples to illustrate its arguments and provides a coherent and challenging introduction to the field The book explores the growing conviction that dominant discursive trends in social constructionism which deal with the analysis of language and discourse to the exclusion of the material world embodiment personal social history and power are inadequate or incomplete and risk preventing social constructionism from maturing into a viable and coherent body of theory method and practice In highlighting what are seen as deficiencies in current constructionist approaches it inevitably takes a somewhat critical stance However the contributing authors are committed to

a constructionist analysis of the human condition into which they seek to reintegrate the material and embodied aspects of our nature As a result the completion of social constructionism is brought a step closer and its continued importance is underlined

Gendering War Talk Miriam Cooke, Angela Woollacott, 2014-07-14 In a century torn by violent civil uprisings civilian bombings and genocides war has been an immediate experience for both soldiers and civilians for both women and men But has this reality changed our long held images of the roles women and men play in war or the emotions we attach to violence or what we think war can accomplish This provocative collection addresses such questions in exploring male and female experiences of war from World War I to Vietnam to wars in Latin America and the Middle East and how this experience has been articulated in literature film and drama history psychology and philosophy Together these essays reveal a myth of war that has been upheld throughout history and that depends on the exclusion of the feminine in order to survive The discussions reconsider various existing gender images Do women really tend to be either pacifists or Patriotic Mothers Are men essentially aggressive or are they threatened by their lack of aggression Essays explore how cultural conceptions of gender as well as discursive and iconographic representation reshape the experience and meaning of war The volume shows war as a terrain in which gender is negotiated As to whether war produces change for women some contributors contend that the fluidity of war allows for linguistic and social renegotiations others find no lasting positive changes In an interpretive essay Klaus Theweleit suggests that the only good war is the lost war that is embraced as a lost war Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
