Talking Criminal Justice Michael Coyle, 2013-10-28 The words we use to talk about justice have an enormous impact on our everyday lives As the first in depth ethnographic study of language Talking Criminal Justice examines the speech of moral entrepreneurs to illustrate how our justice language encourages social control and punishment This book highlights how public discourse leaders from both conservative and liberal sides guide us toward justice solutions that do not align with our collectively professed value of equal justice for all through their language habits This contextualized study of our justice language demonstrates the concealment of intentions with clever language use which mask justice ideologies that differ greatly from our widely espoused justice values By the evidence of our own words Talking Criminal Justice shows that we consistently permit and encourage the construction of people in ways which attribute motives that elicit and empower social control and punishment responses and that make punitive public policy options acceptable This book will be of interest to academics students and professionals concerned with social and criminal justice language rhetoric and critical criminology

Culture, Work and Psychology Pedro F. Bendassolli, 2019-04-01 This book arises from the observation that mainstream psychology especially work and organisational psychology WOP suffers from critical limitations in its attempts to deal with the complexities of work as a cultural phenomenon We can only mention a few examples here In the WOP field especially in Anglo Saxon tradition work experiences are seen through the lenses of traditional behavioural approaches whereas culture is seen as a software of the mind to use a popular definition found in this field based on cross cultural mainstream psychology Competences to take another example are thought of as something that do or do not people have inside them Suffering like stress a common work based problem of our times is considered to be dependent on a person's personality perceptions or as a set of behaviours triggered by facing an objective environment Even meaning making process can be found to be defined from a WOP mainstream point of view meanings are social cognitions shared by people by means of unidirectional socialisation processes Therefore the goal of this book is to deliver to the reader a new and challenging theoretical and methodological tool box inspired by insights developed from a broad cultural psychological perspective Its focus is on the consideration of work and organisations based on core concepts developed inside cultural psychology Therefore it is designed to discuss potential extensions of these concepts to work psychology
