## Talking To Architects:

**Talking to Architects** Colin Ward, 1996-01-01 A collection of ten lectures exploring the alternative traditions in housing design that stress both user needs AND pleasure principles disputing professional assumptions of architectural design Wide ranging and as with all Ward's work well informed *Talking Architecture* Ramin Jahanbegloo, 2019-01-21 Talking Architecture is a part of the series of Ramin Jahanbegloo's conversations with prominent Indian intellectuals This revised edition presents additional visuals and an extended dialogue between Jahanbegloo and Raj Rewal one of India's leading architects The conversation flows effortlessly and we learn of Rewal's early life and experiences in Europe The discussions also encompass the aesthetic foundations of Indian architecture as well as the role of architecture in the twenty first century

**Talking to Architects** Colin Ward, 2022-12 **Talking Architecture** Hanno Rauterberg, 2012 Now available in a revised and updated paperback edition this revealing volume features interviews with twenty of the world's most influential living architects in which they discuss their accomplishments challenges inspirations and dreams What makes an architect tick What is the state of architecture today How do architects view each other's work No one can answer these questions better than the practitioners themselves Here such distinguished figures as Cecil Balmond Norman Foster Frank Gehry Zaha Hadid Philip Johnson Rem Koolhaas Daniel Libeskind I M Pei and others offer a wide ranging assortment of perspectives on contemporary architecture and the architect's roles in shaping the state of art today Each interview focuses on the unique contributions of its subject and is accompanied by images of their most important works With a no holds barred approach the author obtains interesting details about their ideas on architecture in general from where they get their inspirations to what formative experiences led them to become architects in the first place Updated with new images this informative accessible and endlessly fascinating collection offers a chance to compare contrast and get to know the architects that are shaping the world we live in *Global Perspectives on Critical Architecture* Gevork

Hartoonian, 2016-03-03 Judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis New design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular These developments have changed the architect's role in the design and production processes of architecture Moreover critical architectural theories including those of Breton Heidegger and Benjamin which explored the concepts of technology modernism labour and capital and how technology informed the cultural along with later theories from the 1960s which focused more on the architect's theorization of his/her own design strategies seem increasingly irrelevant In an age of digital reproduction and commodification these theoretical approaches need to be reassessed Bringing together essays and interviews from leading scholars such as Kenneth Frampton Peggy Deamer Bernard Tschumi Donald Kunze and Marco Biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture It poses

questions such as Is architecture a conservative cultural product servicing a given producer consumer system Should architecture s affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm Is architecture s infusion into the cultural the reason for the visibility of architecture today What room does the city leave for architecture beyond the present delirium of spectacle Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism Or alternatively putting the notion of criticality aside is it enough to confine criticism to the production of insightful and pleasurable texts The Architectural Forum ,1921

and society itself would undergo a profound shift once the war ended with private commissions giving way to centrally planned projects. The magazine *Architectural Forum* coined the term 194X to encapsulate this wartime vision of postwar architecture and urbanism. In a major study of American architecture during World War II, Andrew M. Shanken focuses on the culture of anticipation that arose in this period as out-of-work architects turned their energies from the built to the unbuilt, redefining themselves as planners and creating original designs to excite the public about postwar architecture. Shanken recasts the wartime era as a crucible for the intermingling of modernist architecture and consumer culture. Challenging the pervasive idea that corporate capitalism corrupted the idealism of modernist architecture in the postwar era, 194X shows instead that architecture's wartime partnership with corporate America was founded on shared anxieties and ideals. Business and architecture were brought together in innovative ways as shown by Shanken's persuasive reading of magazine advertisements for Revere Copper and Brass, U.S. Gypsum, General Electric, and other companies that prominently featured the work of leading progressive architects including Louis I. Kahn, Eero Saarinen, and Walter Gropius. Although the unexpected prosperity of the postwar era made the architecture of 194X obsolete before it could be built and led to its exclusion from the story of twentieth-century American architecture, Shanken makes clear that its anticipatory rhetoric and designs played a crucial role in the widespread acceptance.

*Time for Architecture* Robert Adam, 2020-02-24 Using time as a unifying theme, this book critically analyses many of the key concepts in modern architecture and urban design such as modernity, innovation, timelessness, and sustainability. Drawing on the statements of contemporary architects and with reference to a wide range of sources from history, philosophy, sociology, and anthropology, as well as studies in diverse subjects such as science fiction, colonialism, and archaeology, the text provides a new perspective on much of the thinking behind contemporary design. In addition, it develops original and practical theories on the meanings of modernity, the variable ageing of the environment, the central role of longevity in sustainability, the significance of authenticity in conservation, and the relationship between collective memory and tradition.

*Hip-Hop Architecture* Sekou Cooke, 2021-03-25 This book is not for you. It is not for architectural academic elites. It is not for those who have gentrified our neighborhoods, overly intellectualized the profession, and ignored all contemporary Black theory within the discipline. You have made architecture a symbol of exclusion, oppression, and domination rather than expression, aspiration, and inspiration. This book is not for conformists, Black, White, or other. As architecture grapples with its own racist legacy, *Hip Hop Architecture* outlines a powerful new manifesto, the voice of the underrepresented, marginalized, and voiceless within the discipline. Exploring the production of spaces, buildings, and urban environments that embody the creative energies in hip hop, it is a newly expanding design philosophy which sees architecture as a distinct part of hip hop's cultural expression and which uses hip hop as a lens through which to provoke new architectural ideas. Examining the present and the future of *Hip Hop Architecture*, the book also explores its historical antecedents and its theory, placing it in a wider context both within architecture and within Black

and African American movements Throughout the work is illustrated with inspirational case studies of architectural projects and creative practices and interspersed with interludes and interviews with key architects designers and academics in the field This is a vital and provocative work that will appeal to architects designers students theorists and anyone interested in a fresh view of architecture design race and culture Includes Foreword by Michael Eric Dyson      **Speaking of Buildings** Naomi Stead,Janina Gosseye,Deborah van der Plaats,2019-10-15 By and large architectural historians use texts drawings and photographs to craft their narratives Oral testimony from those who actually occupy or construct buildings is rarely taken as seriously Speaking of Buildings offers a rebuttal theorizing the radical potential of a methodology that has historically been cast as unreliable Essays by an international group of scholars look at varied topics from the role of gossip in undermining masculine narratives in architecture to workers accounts of building with cement in midcentury London to a sound art piece created by oral testimonies from Los Angeles public housing residents In sum the authors call for a renewed form of listening to enrich our understanding of what buildings are what they do and what they mean to people      *The American Architect Specification Manual* ,1923      *Architecture* ,1929 The professional architectural monthly varies      **Philip Johnson and His Mischief** Christian Bjorne,The Images Publishing Group,2014-04-04 In the world of modern art the idea of appropriation or the conscious manipulation of the recognised world of another artist has long been accepted as a legitimate strategy in criticism of the tradition of art authorship challenging the context of viewing contemporary work and the manipulation of omnipresent media images The world of art itself is fair game to be pillaged or mined in the production of new art but there is almost no recognised equivalent aesthetic in architecture Philip Johnson consistently dealt with the concept of appropriation and used it as a design strategy from the very beginning of his illustrious career A singular taste maker Philip Johnson influenced art architecture and design during the second half of the 20th century Philip Johnson and His Mischief Appropriation in Art and Architecture looks at the concept of appropriation and how Johnson s style was influenced first by his mentor Mies van der Rohe and then by post modern ideas and artists This title serves to review Johnson s body of work and show that far from being a weakness his use of appropriation was a major part of his innovative success      **House of Commons Debates, Official Report** Canada.
