John D. Bonvillian,Nicole Kissane Lee,Tracy T. Dooley,Filip T. Loncke,2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering

spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike

Handbook of Early Language Impairment in Children Thomas L. Layton, Elizabeth R. Crais, Linda R. Watson, 2000

This innovative book covers the basic nature and description of children with specific language impairments. This text also provides information on the cognitive motor and communication problems in young children with language impairments. It also contains up to date information on a variety of disorders such as AD/HD, Fragile X, TBI, Prenatal Substance Abuse, Landau Kleffner syndrome and HIV infected children. Language Development Sandra Levey, Susan Polirstok, 2010-09-29

This work prepares nursery primary and secondary teachers to appreciate and understand how language development can affect learning and learn strategies for working with students with language differences and disorders. **Children with Hearing Loss** Elizabeth B. Cole, Carol Flexer, 2019-07-22

The fourth edition of *Children With Hearing Loss: Developing Listening and Talking Birth to Six* is a dynamic compilation of important information for the facilitation of spoken language for infants and young children with hearing loss. This text covers current and up to date information about auditory brain development, listening scenarios, auditory technologies, spoken language development and intervention for young children with hearing loss whose parents have chosen to have them learn to listen and talk. The book is divided into two parts. Part I: Audiological and Technological Foundations of Auditory Brain Development consists of the first five chapters that lay the foundation for brain based listening and talking. These chapters include neurological development and discussions of ear anatomy and physiology, pathologies that cause hearing loss, audiologic testing of infants and children and the latest in amplification technologies. Part II: Developmental Family Focused Instruction for Listening and Spoken Language Enrichment includes the second five chapters on intervention, listening, talking and communicating through the utilization of a developmental and preventative model that focuses on enriching the child's auditory brain centers. New to the Fourth Edition: All technology information has been updated as has information about neurophysiology. The reference list is exhaustive with the addition of the newest studies while maintaining seminal works about neurophysiology, technology and listening and spoken language development. New artwork throughout the book illustrates key concepts of family focused listening and spoken language intervention. This text is intended for undergraduate and graduate level training programs for professionals who work with children who have hearing loss and their families. This fourth edition is also directly relevant for parents, listening and spoken language specialists, LSLS Cert AVT and LSLS Cert AVEd, speech language pathologists, audiologists, early childhood instructors and teachers. In addition, much of the information in Chapters 1 through 5 and also Chapter 7 can be helpful to individuals of all ages who experience hearing loss, especially to newly diagnosed adults as a practical owner's manual.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
