Gymnastics Properly it continues the series of talks to teachers The second and the third address belong together and continue another line of thought I wish I were able to make the second On a Certain Blindness in Human Beings more impressive It is more than the mere piece of sentimentalism which it may seem to some readers It connects itself with a definite view of the world and of our moral relations to the same Those who have done me the honor of reading my volume of philosophic essays will recognize that I mean the pluralistic or individualistic philosophy According to that philosophy the truth is too great for any one actual mind even though that mind be dubbed the Absolute to know the whole of it The facts and worths of life need many cognizers to take them in There is no point of view absolutely public and universal Private and uncommunicable perceptions always remain over and the worst of it is that those who look for them from the outside never know where The practical consequence of such a philosophy is the well known democratic respect for the sacredness of individuality is at any rate the outward tolerance of whatever is not itself intolerant These phrases are so familiar that they sound now rather dead in our ears Once they had a passionate inner meaning Such a passionate inner meaning they may easily acquire again if the pretension of our nation to inflict its own inner ideals and institutions vi et armis upon Orientals should meet with a resistance as obdurate as so far it has been gallant and spirited Religiously and philosophically our ancient national doctrine of live and let live may prove to have a far deeper meaning than our people now seem to imagine it to possess

Talks to Teachers, on Psychology William James,2015-06-25 Excerpt from *Talks to Teachers on Psychology And to Students Dents on Some of Ideals* In 1892 I was asked by the Harvard Corporation to give a few public lectures on psychology to the Cambridge teachers The talks now printed form the substance of that course which has since then been delivered at various places to various teacher audiences I have found by experience that what my hearers seem least to relish is analytical technicality and what they most care for is concrete practical application So I have gradually weeded out the former and left the latter unreduced and now that I have at last written out the lectures they contain a minimum of what is deemed scientific in psychology and are practical and popular in the extreme Some of my colleagues may possibly shake their heads at this but in taking my cue from what has seemed to me to be the feeling of the audiences I believe that I am shaping my book so as to satisfy the more genuine public need About the Publisher Forgotten Books publishes hundreds of thousands
