Andrew Carnegie Medals for Excellence Winner From journalist Adam Higginbotham the New York Times bestselling  
account that reads almost like the script for a movie The Wall Street Journal a powerful investigation into Chernobyl and how  
propaganda secrecy and myth have obscured the true story of one of the history s worst nuclear disasters Early in the  
morning of April 26 1986 Reactor Number Four of the Chernobyl Atomic Energy Station exploded triggering one of the  
twentieth century s greatest disasters In the thirty years since then Chernobyl has become lodged in the collective  
nightmares of the world shorthand for the spectral horrors of radiation poisoning for a dangerous technology slipping its  
leash for ecological fragility and for what can happen when a dishonest and careless state endangers its citizens and the  
entire world But the real story of the accident clouded from the beginning by secrecy propaganda and misinformation has  
long remained in dispute Drawing on hundreds of hours of interviews conducted over the course of more than ten years as  
well as letters unpublished memoirs and documents from recently declassified archives Adam Higginbotham brings the  
disaster to life through the eyes of the men and women who witnessed it firsthand The result is a riveting deeply reported  
reconstruction Los Angeles Times and a definitive account of an event that changed history a story that is more complex  
more human and more terrifying than the Soviet myth The most complete and compelling history yet The Christian Science  
Monitor Higginbotham s superb enthralling and necessarily terrifying extraordinary The New York Times book is an indelible  
portrait of the lessons learned when mankind seeks to bend the natural world to his will lessons which in the face of climate  
change and other threats remain not just vital but necessary     Scientific and Technical Books and Serials in Print ,1989
