Focus On: 100 Most Popular Unreal Engine Games Wikipedia contributors, **Corporate Diplomacy** Ulrich Steger, 2003-08-01 Based on a wealth of empirical studies and case studies this book explains the strategic choices companies have to make in order to remain consistent In each chapter real life examples illuminate the key message managers should take away from the book It offers a purely managerial viewpoint focused on what managers can do to manage the business environment in any situation

Love's Knowledge Martha C. Nussbaum, 1992-04-02 This volume brings together Nussbaum's published papers on the relationship between literature and philosophy especially moral philosophy The papers many of them previously inaccessible to non specialist readers deal with such fundamental issues as the relationship between style and content in the exploration of ethical issues the nature of ethical attention and ethical knowledge and their relationship to written forms and styles and the role of the emotions in deliberation and self knowledge Nussbaum investigates and defends a conception of ethical understanding which involves emotional as well as intellectual activity and which gives a certain type of priority to the perception of particular people and situations rather than to abstract rules She argues that this ethical conception cannot be completely and appropriately stated without turning to forms of writing usually considered literary rather than philosophical It is consequently necessary to broaden our conception of moral philosophy in order to include these forms Featuring two new essays and revised versions of several previously published

essays this collection attempts to articulate the relationship within such a broader ethical inquiry between literary and more abstractly theoretical elements Science and Affect in Contemporary Literature Shannon Lambert, 2024-11-14 Moving from the micro world of quantum physics to the macro scales of earth science and ecology this book considers how in contemporary literature affective experiences like desire suffering anxiety and joy shape scientific persons practices and products This book brings into dialogue close readings of scientific writing and contemporary literary works by authors like Jeanette Winterson Richard Powers Hanya Yanagihara Thalia Field and Jenny Offill Combining narrative and affect studies it uses formal strategies such as moving metaphor visceral or affective description plot level analogy contraction and rhythm to engage with western scientific epistemologies which still tends towards the impassive universal and objective While each chapter focuses on a different field or fields of science all foreground bodies human and nonhuman as a way of exploring knowledge production Through close readings the book argues that select scientific stories raise important questions about how knowledge is defined and who and what is invited into its processes of production **A Process Theory of**

Organization Tor Hernes, 2014 This book presents a novel and comprehensive process theory of organization applicable to a world on the move where connectedness prevails over size flow prevails over stability and temporality prevails over spatiality The process theory developed in the book draws upon process thinking in a number of areas including process philosophy pragmatism phenomenology and science and technology studies Salient ideas from these schools are carefully woven into a process theory of organization which makes the book not only a thought provoking theoretical contribution but also a much needed glimpse into the challenges faced by organizers Taking a distinctly temporal view of organizational life the author shows how actors operate in an on going present in which they draw upon their past and project their past as ambitions for the future This on going work in which technologies concepts and social actors take part is crucial for the making of any type of organizational formation A key construct of the book is that of events which provide force movement and continuity to organizational life The book is suitable for scholars and advanced level students in organization studies management studies technology studies and sociology It contains a number of practical examples to illustrate the theoretical framework

Walter Benjamin and the Antinomies of Tradition John McCole, 2018-08-06 Few modern thinkers have been as convinced of the necessity of recovering the past in order to redeem the present as Walter Benjamin 1892 1940 Benjamin at once mourned and celebrated what he took to be an inevitable liquidation of traditional culture and his determination to think both of these attitudes through to their conclusions lends his work its peculiar honesty along with its paradoxical antinomial coherence In a landmark interpretation of the whole of Benjamin s career John McCole demonstrates a way of understanding Benjamin that both contextualizes and addresses the complexities and ambiguities of his texts Working with Pierre Bourdieu s concept of the intellectual field McCole traces Benjamin s deep ambivalence about cultural tradition through the longterm project an immanent critique of German idealist and romantic aesthetics which unites his writings McCole builds a sustained

reading of Benjamin's intellectual development which sheds new light on the formative role of early influences particularly his participation in the pre World War I German youth movement and the orthodox discourse of German intellectual culture and shows how Benjamin later extended the strategies he learned within these contexts during key encounters with Weimar modernism surrealism and the fiction of Proust The fullest account of Benjamin available in English this lucid and penetrating book will be welcomed by intellectual historians literary theorists and critics historians of German literature and Continental philosophers

The Enchanting Encounter with the East Michael Baizerman, 2022-07-20 The Enchanting Encounter with the East belongs to cross cultural studies and focuses on the attempts of European literati to get acquainted with the bizarre realm of the Far East during the Late Middle Ages It turns out that western intellectuals lured by the marvels and myths of the Far East did a lot of spadework before taking a route that led to unfamiliar oriental realms On this thorny path many Eurocentric medieval fantasies had been debunked The book shows how global connections

had surfaced centuries before industrialization The book falls into the genre of non fiction history and centers on the recognition of lands and cultures of India China and the Mongols by the Latin medieval society The storyline is based on the original online research and presents authentic arguments based on the author s engagement with the sources The readers might enjoy as well as profit from this comprehensive reference that does not require deep background knowledge The content is provided in clear language and is supplemented with a bibliography and illustrations that will enrich the entire work

Strategy Tools as Symbolic Objects in Managerial Language Games Dragan Djurić, 2015-04-22. Dragan Djurić looks at strategy tools from a process ontological worldview as proposed by the Process Organization Studies discourse. Building on Wittgenstein's later philosophy, he understands science and management as language games, thereby developing a view of strategy tools as objects with both an ontological and a symbolic function. This perspective is contrasted with the traditional understanding of strategy tools as technologies of rationality as well as with the practice-based view of strategy tools as boundary objects.

Field Notes from Elsewhere Mark C. Taylor, 2009. In the fall of 2005, Mark C. Taylor, the controversial public intellectual and widely respected scholar, suddenly fell critically ill. For two days, a team of forty doctors, many of whom thought he would not live, fought to save him. Taylor would eventually recover, only to face a new threat: surgery for cancer. *Field Notes from Elsewhere* is Taylor's unforgettable inverted journey from death to life. Each of his memoir's fifty-two chapters, and accompanying photographs, recounts a morning-to-evening experience with sickness and convalescence, mingling humor and hope with a deep exploration of human frailty and conversely resilience. When we confront the end of life, he explains, the axis of the lived world shifts and everything must be reevaluated. As Taylor sorts through his remembrances, much that once seemed familiar becomes strange, paradoxical, and contradictory. He reads his experience with and against ghosts from his past, recasting the meaning of mortality, sacrifice, solitude, and abandonment in light of modern ways of dying.
