Tangled Wing Biological Constraints On The Human Spirit Harper Colophons:

Conceptual Foundations for Multidisciplinary Thinking Stephen Jay Kline,1995-01-01 Our current intellectual system provides us with a far more complete and accurate understanding of nature and ourselves than was available in any previous society This gain in understanding has arisen from two sources the use of the scientific method and the breaking up of our intellectual enterprise into increasingly narrower disciplines and research programs However we have failed to keep these narrow specialities connected to the intellectual enterprise as a whole The author demonstrates that this causes a number of difficulties We have no viewpoint from which we can understand the relationships between the disciplines and lack a forum for adjudicating situations where different disciplines give conflicting answers to the same problem We seriously underestimate the differences in methodology and in the nature of principles in the various branches of science This provocative and wide ranging book provides a detailed analysis and possible solutions for dealing with this problem **The**

Intimacy Paradox Donald S. Williamson,2002-07-01 Although most people physically leave home by their early 20s emotional separation from one's family is a more difficult process that can continue for a lifetime Now available in paper for the first time this acclaimed book addresses the struggle of adults to establish autonomy without sacrificing family connections Donald S Williamson presents personal authority therapy an approach designed to simultaneously foster individual development and family of origin intimacy Therapists are taken step by step through conducting individual couple and small group sessions that culminate in several sessions with each client and his or her parents Writing with sensitivity and humor the author demonstrates effective ways to help adult children construct new personal and family narratives resolve intergenerational intimidation and enjoy healthier more equal relationships with parents and significant others

Origin of Values Michael Hechter,Lynn Nadel,Richard E. Michod,1993-01-01 Although values play a leading role in nearly every explanatory theory in the broad realm of the social and behavioral sciences very little multidisciplinary research material on values is available Addressing this need the editors bring together distinguished social scientists psychologists and biologists who collaboratively explore fundamental questions about values What are the determinants of social values taboos and ideologies What are the determinants of individual values What is the nature of motivations and rewards Is there

an evolutionary basis for the development of values **Christian Perspectives on Sexuality and Gender** Elizabeth Stuart, Adrian Thatcher, 1996 This collection of articles present a variety of broadly Christian responses to issues such as sexuality and gender sexuality and spirituality gay and lesbian sexuality sexuality and violence sexuality and singleness and the family *Left Brain - Right Brain Differences* James F. Iaccino, 2014-03-05 This volume integrates past clinical findings with the latest research on cerebral asymmetry in order to identify why humans process information in different ways A must for anyone who wants to understand human cognitive nature further specifically the reasons why we are wired a certain way and whether these cortical circuits are flexible enough to be altered this book presents the most up to date information on hemispheric differences within normal and clinical populations Its focus on sex handedness and developmental differences is critical to the derivation of a better perspective on how future research should be conducted in this expanding science Iaccino begins by explaining basic brain structures and types of cognitive styles assigned to each hemisphere He then details studies involving various clinical populations psychophysiological split brain dyslexic and psychotic to support the claim that the two hemispheres are different morphologically and functionally speaking Applying this clinical research to the more normal population the author uncovers striking cortical variations between the sexes and between the handedness groups along with developmental changes which occur as a function of time Finally he provides a detailed summary of the previous chapters and highlights where asymmetrical research may be headed in the future **Manhood in the Making** David D. Gilmore, 1990-01-01 Offers a cross cultural study of manhood as an achieved status and looks at two androgynous cultures that are exceptions to the manhood archetype **Why We Get Sick** Randolph M. Nesse, MD, George C. Williams, 2012-02-08 The next time you get sick consider this before picking up the aspirin your body may be doing exactly what it s supposed to In this ground breaking book two pioneers of the science of Darwinian medicine argue that illness as well as the factors that predispose us toward it are subject to the same laws of natural selection that otherwise make our bodies such miracles of design Among the concerns they raise When may a fever be beneficial Why do pregnant women get morning sickness How do certain viruses manipulate their hosts into infecting others What evolutionary factors may be responsible for depression and panic disorder Deftly summarizing research on disorders ranging from allergies to Alzheimer s and from cancer to Huntington s chorea Why We Get Sick answers these questions and more The result is a book that will revolutionize our attitudes toward illness and will intrigue and instruct lay person and medical practitioners alike **The Decline of Males** Lionel Tiger, 2000-09-02 Tiger links current social problems such as the increasing numbers of single mothers abortions working women and men abandoning their families to the rise of efficient methods of contraception which has marginalized men in the process of reproduction Jacket **One Culture** George Lewis Levine, Alan Rauch, 1987 This is the first in a planned series of volumes on science and literature which grow from three basic assumptions explicit in this first volume first that science and literaure are two alternative but related expressions of a culture s values and beliefs and

second that understanding science in its relation to culture and literature requires some understanding not only of its own internal processes but of pressures exercised by social political and psychological forces third that the idea of influence of one upon the other must work both ways It is not only science that influences literature but literature that influences science the authors say ISBN 0 299 11300 0 45 00 ISBN 0 299 11304 3 pbk 12 95 **Nature's Thumbprint** Peter B.

Neubauer,Alexander Neubauer,1996 Examining the interactive roles of nature and nurture in psychological and physical development Neubauer and Neubauer show how each person is greater than the sum of his or her parts They discuss how temperament tastes and skills unfold throughout life and the need for this to remain unimpeded **The Moral Animal**

Prettiest Nancy Etcoff,2011-02-02 A provocative and thoroughly researched inquiry into what we find beautiful and why skewering the myth that the pursuit of beauty is a learned behavior In Survival of the Prettiest Nancy Etcoff a faculty member at Harvard Medical School and a practicing psychologist at Massachusetts General Hospital argues that beauty is neither a cultural construction an invention of the fashion industry nor a backlash against feminism it s in our biology Beauty she explains is an essential and ineradicable part of human nature that is revered and ferociously pursued in nearly every civilization and for good reason Those features to which we are most attracted are often signals of fertility and fecundity When seen in the context of a Darwinian struggle for survival our sometimes extreme attempts to attain beauty both to

become beautiful ourselves and to acquire an attractive partner suddenly become much more understandable Moreover if we understand how the desire for beauty is innate then we can begin to work in our own interests and not just the interests of our genetic tendencies

Evolutionary Medicine Wenda Trevathan, Euclid O. Smith, James Joseph McKenna,1999 Evolution is the single most important idea in modern biology shedding light on virtually every biological question from the shape of orchid blossoms to the distribution of

species across the planet Until recently however the theory has had little impact on medical research or practice Evolutionary Medicine shows how this is beginning to change Collecting work from leaders in the field this volume describes an array of new and innovative approaches to human health that are based on an appreciation of our long evolutionary history For example it shows how evolution helps to explain the complex relationship between our immune systems and the virulence and transmission of human viruses It also shows how comparisons between how we live today and how our hunter gatherer ancestors lived thousands of years ago illuminate a variety of contemporary ills including obesity lower back pain and insomnia Evolutionary Medicine covers issues at every stage of life from infancy colic jaundice SIDS parent infant sleep struggles ear infections breast feeding asthma to adulthood sexually transmitted diseases depression overeating addictions child abuse cardiovascular disease breast and ovarian cancer to old age osteoporosis geriatric sleep problems Written for a wide range of students and researchers in medicine anthropology and psychology it is an invaluable guide to this rapidly developing field

Rhetoric and Philosophy Richard A. Cherwitz, Henry W. Johnstone Jr., 2014-06-03 This important volume explores alternative ways in which those involved in the field of speech communication have attempted to find a philosophical grounding for rhetoric Recognizing that rhetoric can be supported in a wide variety of ways this text examines eight different philosophies of rhetoric realism relativism rationalism idealism materialism existentialism deconstructionism and pragmatism The value of this book lies in its pluralistic and comparative approach to rhetorical theory Although rhetoric may be the more difficult road to philosophy the fact that it is being traversed by a group of authors largely from speech communication demonstrates important growth in this field Ultimately there is recognition that if different thinkers can have solid reasons to adhere to disparate philosophies serious communication problems can be eliminated Rhetoric and Philosophy will assist scholars in choosing from among the many philosophical starting places for rhetoric

Good Reasons for Bad Feelings Randolph M. Nesse, MD, 2019-02-12 A founder of the field of evolutionary medicine uses his decades of experience as a psychiatrist to provide a much needed new framework for making sense of mental illness Why do I feel bad There is real power in understanding our bad feelings With his classic Why We Get Sick Dr Randolph Nesse helped to establish the field of evolutionary medicine Now he returns with a book that transforms our understanding of mental disorders by exploring a fundamentally new question Instead of asking why certain people suffer from mental illness Nesse asks why natural selection has left us all with fragile minds Drawing on revealing stories from his own clinical practice and insights from evolutionary biology Nesse shows how negative emotions are useful in certain situations yet can become overwhelming Anxiety protects us from harm in the face of danger but false alarms are inevitable Low moods prevent us from wasting effort in pursuit of unreachable goals but they often escalate into pathological depression Other mental disorders such as addiction and anorexia result from the mismatch between modern environment and our ancient human past And there are good evolutionary reasons for sexual disorders and for why genes for schizophrenia persist Taken together these and many more insights help to

explain the pervasiveness of human suffering and show us new paths for relieving it by understanding individuals as individuals
