White, 2014-09-04 The use of measures of economic output to guide policymaking has been criticized for decades because of their weak ties to human well being Recently many scholars and politicians have called for measures of happiness or subjective well being to be used to guide policy in people s true interests In The Illusion of Well

Being Mark D White explains why using happiness as a tool for policymaking is misguided and unethical Happiness is too vague a term to define and too general a concept to measure in a way that captures people s true feelings He extends this critique to well being in general and concludes that no measure of well being can do justice to people s true interests which are complex multifaceted and subjective White suggests instead that policymaking be conducted according to respect and responsiveness promoting the true interests of citizens while addressing their real needs and devoting government resources to where they can do the most good
