The Tao of Bioenergetics George A. Katchmer,1993 THE TAO OF BIOENERGETICS traces the history and uses of Qi Chi the bioenergy of China from the I Ching through physics astrology Feng shui and alchemy The author shows that this force was known about by the early Greeks and also recognized through the ages by Paracelsus Mesmer Freud Jung Wilhelm Reich and others The Tao of Bioenergetics George A. theoretical concepts i the conformon the conformational wave packet in biopolymers carrying both the free energy and genetic information and ii the intracellular dissipative structures the chemical concentration waves inside the cell that serve as the immediate drivers of all cell functions Conformons provide the driving forces for all molecular machines in the cell and intracellular dissipative structures coordinate intra and intercellular processes such as gene expression and cell cell communications One of the predictions made by the cell language theory CLT is that there are two forms of genetic information the Watson Crick genes transmitting information in time identified with DNA and the Prigoginian genes transmitting information in space identified with RNA expression profiles The former is analogous to sheet music or written language and the latter is akin to audio music or spoken language both being coupled by conformons acting as the analog of the pianist The new theory of DNA structure and function constructed on the basis of CLT can rationally account for most of the puzzling findings recently unearthed by the ENCODE Encyclopedia of DNA Elements project The Cell Language Theory has important applications in biomedical sciences including drug discovery research and personalized medicine on the one hand and in the mind body research and consciousness studies on the other *Subject Guide to Books in Print* ,1997
