century an interplay that has laid the ground for the semi sculptural or semi architectural works by architects such as Frank Gehry and artists such as Dan Graham The first half of the book looks at how the addition of sculpture enhanced several architectural projects including Mies van der Rohe s Barcelona Pavilion 1929 and Eiel Saarinen s Cranbrook Campus 1934 The second half of the book uses several additional case studies including Philip Johnson s sculpture court for New York s Museum of Modern Art 1953 to explore what architectural spaces can add to the sculpture they are designed to contain Curtis argues that it was in the middle of the twentieth century before sculptural and architectural forms began to converge that the complementary nature of though essential difference between the two art forms began to clearly emerge how figurative sculpture highlighted the modernist architectural experience and how the abstract qualities of that architecture imparted to sculpture a heightened role      Subject Guide to Books in Print ,1975      Arthibliographies Modern ,2004
