Taste Of China:

The Taste of China Ken Hom, Ka Tai Leong, 1990 COOKING WINE **The Taste of China** Ken Hom, 1992 A Taste of China combines a lively and informative narrative with authentic recipes from Ken Hom's travels within mainland China. His journey takes him from the private homes of family and friends through the food stalls in bustling urban markets to the local restaurants and tea houses. Ken travelled to almost every region of China and in this book presents a sense of the history, culture, and lives of the Chinese people. Here are recipes from all the regions of China: Green Beans stir-fried with Chilli from Sichuan, Wonton Noodle Soup from Canton, and Fantasy Pork from Yunnan. Seasoned with glimpses into everyday Chinese life, A Taste of China is a glorious and rare culinary journey to enjoy and savor. A Little Taste of China Deh-Ta Hsiung, Nina Simonds, 2003 Discover the world of Chinese food through the pages of this beautiful little book. The combination of photography and easy recipes will inject the flavours and ingredients of the Orient straight into your home. *The Coming Collapse of China* Gordon G. Chang, 2001-09-15 China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese American lawyer and China specialist, the People's Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere. Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism. Chang writes, "With its impending World Trade Organization membership for the first time, China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse." Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future.

The Cooking of China Matthew Locricchio, 2012-01-15 Provides readers with an introduction to foods of different cultures and includes food handling, kitchen safety, and nutrition tips. **China's Engine of Environmental Collapse** Richard Smith, 2020-07-20 As the world hurtles towards environmental oblivion, China is leading the charge. The nation's CO2 emissions are more than twice those of the US, with a GDP just two-thirds as large. China leads the world in renewable energy, yet it is building new coal-fired power plants faster than renewables. The country's lakes, rivers, and farmlands are severely polluted, yet China's police state can't suppress pollution even from its own industries. This is the first book to explain these contradictions. Richard Smith explains how the country's bureaucratic rulers are driven by nationalist, industrialist tendencies that are even more powerful than the drive for profit under normal capitalism. In their race to overtake the US, they must prioritise hyper-growth over the environment, even if this ends in climate collapse and eco-suicide. Smith contends that nothing short of drastic shutdowns and the scaling back of polluting industries, especially in China and the US, will suffice to slash greenhouse gas emissions enough to prevent climate catastrophe.
